

## Solve the Mystery! Science Experience for Blind and Low-Vision Students

Join the NFB of Oregon for an exciting day of investigation and discovery on June 6 at the Oregon Commission for the Blind. This year, blind and low-vision students will become forensic scientists.

Using accessible, nonvisual tools and techniques, participants will analyze clues, solve challenges, and uncover the truth through hands-on forensic experiments. Every activity builds confidence and shows how science can be accessible, engaging, and exciting for everyone.

This opportunity offers your child:

- Blind role models
- Accessible experiments
- Hands-on nonvisual skills instruction

### ***Apply Now***

This program is free to all registered blind and low-vision youth (K-12). Learn more and apply at [nfb.org/stem2u](https://nfb.org/stem2u).

Contact Justin Harford at 530-864-3277 or by email at [blindstein@gmail.com](mailto:blindstein@gmail.com) for more information.

Thanks to a generous donation from General Motors (GM) and support from Independence Science, blind students across the country will gain foundational nonvisual tools and techniques to pursue further education and careers in STEM.
