## ***Updated for 2026-2027***

One of Godley Independent School District's strategic design goals is to empower students with the digital tools necessary to lead in tomorrow's world. Our learners will utilize a variety of multimedia tools for learning and communicating; and they will develop the ability to differentiate and apply appropriate social and professional communication skills.

### ***Device Purpose***

The Godley School District is supplying students with a Chromebook device. This device is property of Godley ISD. The supplied instructional device's function will provide each student access to required educational materials needed for each student to be successful. The Chromebook allows student access to Skyward, Google Apps for Education, educational web-based tools, as well as many other useful sites. The supplied device is an educational tool not intended for gaming, social networking or high end computing.

## 11. CHROMEBOOK FAQ's

### **Q. What is a Chromebook?**

A. "Chromebooks are mobile devices designed specifically for people who live on the web. With a comfortable, full-sized keyboard, large display and clickable trackpad, all-day battery life, lightweight and built-in ability to connect to Wi-Fi, the Chromebook is ideal for anytime, anywhere access to the web. They provide a faster, safer, more secure online experience for people who live on the web, without all the time-consuming, often confusing, high level of maintenance required by typical computers." ("Google")

### **Q. What kind of software does a Chromebook run?**

A. "Chromebooks run millions of web-based applications, or web apps, that open right in the browser. You can access web apps by typing their URL into the address bar or by installing them instantly from the Chrome Web Store." ("Google")

### **Q. How are these web-based applications managed?**

A. Each Chromebook we provide to students will be a managed device. Members of Godley Independent School District's Information & Instructional Technology Dept. will maintain devices through our Google Apps for Education account. As such, the school can pre-install web-applications as well as block specific web-applications from a centralized management console.

### **Q. What devices can I connect to a Chromebook?**

A. Chromebooks can connect to:

- USB storage, mice and keyboards (see [supported file systems](#))
- SIM cards
- SD cards
- External monitors and projectors
- Headsets, earsets, microphones
- Chromecast

### **Q. Can the Chromebook be used anywhere at anytime?**

A. Yes, as long as you have a WiFi signal to access the web.

B. Chrome offers the ability through Apps so users can work in an "offline" mode.

### **Q. Will our Chromebook have 3G?**

A. No. The district Chromebooks will not have 3G broadband.

### **Q. Do Chromebooks come with Internet Filtering Software?**

A. No. Chromebooks do not come with internet filtering software. However, while in district, Chromebooks will use the School's WiFi to access the internet which is filtered. Student chromebooks are also configured to use GISD student accounts that are filtered both in and out of the district's network.

**Q. Is there antivirus built into it?**

A. It is not necessary to have antivirus software on Chromebooks because there are no running programs for viruses to infect.

**Q. Battery life?**

A. Chromebooks have a rated battery life of 6.5 hours, based on typical usage. However, we do expect that students charge them in their assigned storage carts each evening to ensure maximum performance during the school day. It should be noted that extensive media streaming, using the USB ports to charge personal phones, etc. will drain the battery much faster. Ultimately, it is still the student's responsibility to keep their chromebook charged.
