

SCHOOL LEVEL ADMINISTRATOR RUBRIC for EDUCATOR EVALUATION

[Updated June 2023]

The updated Educator Evaluation rubrics are grounded in DESE’s Educational Vision for effective teaching and leadership, and reflect input¹ from educators, students, and families across Massachusetts on antiracist, inclusive, and equitable practices that support *all students* to attain academic knowledge and skills, understand and value themselves and others, and engage with the world.²

The School Level Administrator Rubric describes elements of effective practice across four Standards of Administrative Leadership:

- Standard I: Instructional Leadership
- Standard II: Management and Operations
- Standard III: Family and Community Engagement
- Standard IV: Professional Culture

These four Standards guide the development of Massachusetts educators from preparation through employment, articulating the key knowledge, skills, and behaviors essential of all school leaders to disrupt patterns of inequity and well serve richly diverse student bodies with varied educational needs.

For each Standard, there are Indicators that describe specific knowledge, skills, and performance at four levels³. Distinctions by performance level are determined based on variations in quality (the ability to perform the skill, action, or behavior), scope (the scale of impact), and consistency (the frequency that skill, action, or behavior is demonstrated with quality). Continued growth and reflection are expected across all levels of performance, as described below:

Proficient		
The educator’s performance fully meets the requirements. This is the expected, rigorous yet attainable level of performance for most educators.		
Unsatisfactory	Needs Improvement	Exemplary
The educator’s performance is consistently below the requirements and has not shown improvement.	The educator’s performance is below the requirements but not considered to be Unsatisfactory at this time. Improvement is necessary and expected.	The educator’s performance exceeds requirements and consistently demonstrates high-quality practice with schoolwide impact.

NOTE: In this rubric, “**all students**” represents *each and every student*, with particular focus on students who have been historically marginalized or underserved by our education systems, including but not limited to those who identify as Black, Hispanic/Latino, Asian, Indigenous, and Multiracial students, students with disabilities, multilingual learners, LGBTQIA+ students, students experiencing homelessness and/or financial insecurity, and students who are undocumented.

Culturally and linguistically sustaining practices affirm and value students’ cultures, prior experiences, and linguistic resources to make learning more relevant and effective, promote academic achievement, cultural competence, and sociopolitical awareness, and value multilingualism as an asset. These practices are essential for all students in the classroom, regardless of their background, culture, or identity. All students benefit from an approach that is intended to meet the needs of diverse learners; from expanded cultural competence and sociopolitical consciousness; and from explicit instruction in the functions of language.

¹ DESE partnered with educators on the 2021-22 Principal and Teacher Advisory Cabinets as the key advisory group for this project. We also received input and feedback from students and families through a series of Student and Family Roundtables. For more information about these contributors, please see [Acknowledgements](#).

³ This rubric includes examples of ways that educators may demonstrate Exemplary, Needs Improvement, or Unsatisfactory performance of each Indicator (indicated after “e.g.”). This is meant to illustrate, not prescribe, evidence that an educator “exceeds Proficient expectations,” “demonstrates some progress towards meeting Proficient expectations,” or “demonstrates performance consistently below the standard.”

Using the Rubric in the Educator Evaluation Process

Rubrics are designed to help educators and evaluators (1) develop a consistent, shared understanding of what Proficient performance looks like in practice, (2) develop a common terminology and structure to organize evidence, and (3) make informed professional judgments about Formative and Summative Performance Ratings on each Standard and overall. As a result, rubrics play a part in all five components of the evaluation cycle.

1. **Self-Assessment:** Educators use the rubric to examine their own practice and to identify areas of strength as well as areas for further growth and development.
2. **Analysis, Goal Setting, and Plan Development:** Educators and evaluators together review the rubric and agree on Indicators that will be the focus of their attention during the evaluation cycle. In addition, educators and their evaluators develop goals for improving professional practice and student learning. The rubric helps to paint a clear picture of what it will look like to move practice from Proficient to Exemplary in one Indicator or from Needs Improvement to Proficient in another. These distinctions are the starting point for conversation about setting specific, measurable, actionable, equity-focused goals.
3. **Implementation of the Educator Plan:** Educators and evaluators use the rubric to ensure that they are gathering evidence from multiple sources that will support a fair and comprehensive assessment of the educator’s practice on each Standard. The elements of effective practice defined in each Proficient descriptor can be used as a guide for feedback, professional learning, and the collection of evidence. Given the breadth and depth of practices represented, it is recommended that educators and evaluators prioritize certain Indicators aligned to educator, school and district goals for professional learning, feedback, support, and evidence collection.

Note: The rubrics are written to support educators and evaluators in making judgments about evidence gathered across multiple measures – not from a single observation. Observations are a valuable way to gather evidence on educators’ performance against many, but not all, of the Standards and Indicators, and should be paired with other sources of evidence, such as artifacts of practice, student and family feedback, and evidence of student learning. The model rubrics were not designed to be observation tools and should not be used for that purpose.

4. **Formative Assessment/Evaluation and Summative Evaluation:** The rubric serves as the organizing framework for these conferences and reports as evaluators assess the educator’s performance on the continuum of practice described by the rubric.

I-E: Student Learning

1. **Academic Student Outcomes:** Demonstrates expected impact on academic student outcomes based on multiple measures of student learning, growth, and achievement, including student progress on common assessments and statewide student growth measures where available.
2. **Non-Academic Student Outcomes:** Demonstrates expected impact on non-academic student outcomes, such as student engagement and sense of belonging, based on student feedback and local measures of engagement where available.⁴

The model rubrics describe educator practice and provide clear criteria across four performance levels that focus on the educator's actions and behaviors. The Student Learning Indicator is about the impact of those actions relative to student learning. Did students learn as much as educators set out to teach?

For administrators, evidence of impact on student learning based on multiple measures of student learning, growth, and achievement must be taken into account by the evaluator when determining a performance rating for Standard I. An educator's impact on non-academic outcomes is also important to consider given the relationship between non-academic experiences and outcomes (e.g., student engagement, participation, and grade progression) and academic outcomes.

Because evaluators are not required to make a rating determination for any individual Indicator, this allows them to consider evidence of impact alongside evidence of practice when determining a rating for Standard I. There are no associated elements or performance descriptors for the Student Learning Indicator.

Evaluators and educators should identify the most appropriate measures and assessments of academic and non-academic outcomes and anticipated gains associated with those measures when developing the Educator Plan.

⁴ This element is included based on a growing body of research that broadens the definition of teacher efficacy and educator impact beyond test outcomes. See Gershenson, S. (2016); Jackson, C. K. (2018); Kraft, M. A. (2019); Liu, J., & Loeb, S. (2021); Backes, B., Cowan, J., Goldhaber, D., & Theobald, R. (2022a and 2022b).

Glossary of Terms

Academic Achievement: Attainment of academic skills and knowledge to meet or exceed grade-level standards in a comprehensive and diverse range of subjects with ability to apply competencies in relevant, real world contexts.

All Students: This rubric frequently references “all students,” which represents *each and every student*, with particular focus on students who have been historically marginalized or underserved by our education systems, including but not limited to, those who identify as Black, Hispanic/Latino, Asian, Indigenous, and Multiracial students, students with disabilities, English learners, LGBTQIA+ students, students experiencing homelessness and/or financial insecurity, and students who are undocumented.

Anti-racist Teacher and Leader: Believes racial groups are equals in all their differences and continually engages in self-reflective work that leads to educational policies, practices, conditions, and cultures that resist and dismantle inequities due to individual and systemic racism to advance racial equity. ([Guidelines for the Preparation of Administrative Leaders](#))

Asset-Based: Asset-based approaches intentionally build on the strengths and capacities that learners bring to school, including their languages, cultures and experiences versus deficit-based thinking that views differences as weaknesses.

Bias: A disproportionate weight that may be created intentionally or unintentionally in favor of or against an idea, thing, individual, or group. ([Guidelines for the Preparation of Administrative Leaders](#))

Cultural Broker: Individuals who act as bridges between schools and diverse families and collaborate with families to support the school’s goals to improve student achievement ([Massachusetts Family, School, and Community Partnership Fundamentals 2.0](#)).

Cultural Competence: Individuals’ affirmation in their own culture and identity and respect and understanding for different cultures and identities.

Culturally Responsive Practice: Cultural responsiveness is an approach to viewing students’ culture and identity (including race, ethnicity, multilingualism, and other characteristics) as assets, and creating learning experiences and environments that value and empower them. ([Supporting Culturally and Linguistically Sustaining Practices](#))

Culturally Relevant: Aligned with and affirming to students’ cultures, backgrounds, and identities. Culturally relevant pedagogy promotes students’ academic achievement, cultural competence, and sociopolitical awareness. ([Supporting Culturally and Linguistically Sustaining Practices](#))

Culturally and Linguistically Sustaining: Affirming and valuing of students’ cultures, prior experiences, and linguistic resources to make learning more relevant and effective, promote academic achievement, cultural competence, and sociopolitical awareness; valuing multilingualism as an asset. ([Supporting Culturally and Linguistically Sustaining Practices](#))

Curricular materials are resources teachers use to facilitate sequences of learning experiences (e.g., lesson and unit plans, texts); also called adopted or written curriculum, or instructional materials. ([Curriculum Matters](#))

Curriculum: a sequence of student learning experiences teachers facilitate, may use curricular materials as a foundation; also called enacted or taught curriculum. ([Curriculum Matters](#))

Digital Literacy: The ability to use digital technology, communication tools or networks to locate, evaluate, use, and create information; the ability to understand and use information in multiple formats from a wide range of sources

when it is presented via computers; and the ability to perform tasks effectively in a digital environment. Literacy includes the ability to read and interpret media, reproduce data and images through digital manipulation, and evaluate and apply new knowledge gained from digital environments ([Digital Literacy and Computer Science Framework](#)).

Equity: Placing a heightened focus on groups, particularly racial groups, experiencing disproportionate impact through the development of systems to remediate disparities in their experiences and outcomes.

Evidence-based: Practices or programs that have evidence to show that they are effective at producing results and improving outcomes when implemented as supported by valid and reliable research. ([US Department of Education, Every Student Succeeds Act](#))

Historically Marginalized Groups: Groups and communities that systematically experience discrimination and exclusion (social, political, economic and financial) because of unequal power relationships across economic, political, social, and cultural dimensions. These groups include but are not limited to race, culture, language, LGBTQ+, gender, and ability. Significant disparities exist for marginalized people.

High-quality Instructional Materials: High-quality materials exhibit a coherent sequence of target skills and knowledge, empirical evidence of efficacy, and other characteristics such as engaging content and inclusive design. Some factors in quality are nonnegotiable, while others vary by context: for example, compatibility with a school's technology infrastructure or cultural relevance to its student population. ([Curriculum Matters](#))

Inclusive Practices: Pursuing deliberate actions to create welcoming environments and ensure differences are actively sought and heard, and that every individual feels a sense of belonging and a role in impacting decision-making, practices, and policies.

Linguistically Responsive: Aligned with and affirming to students' and families' linguistic backgrounds and skills. This includes use of high-quality translation and interpretation, as well as translanguaging (see below). ([The Massachusetts Blueprint for English Learner Success](#))

Non-Academic Student Outcomes: Outcomes associated with students' capacity to understand and value self (know their own strengths, interests, and areas of growth, be self-aware, be a self-advocate, and make responsible decisions), understand and value others (understand differences and multiple perspectives, empathize with others, and build connections with peers and adults), and engage with the world (understand and think critically about local, national, and world events and societal systems; and create positive change through civic action).

Restorative Practice: A framework of processes that schools can use to prevent and address conflict and poor behavior, including, but not limited to, restorative circles, family group conferences, social and emotional learning, and informal practices such as affective questioning. Rather than implementing a program, restorative practices focus on building and maintaining healthy relationships among individuals and maintaining a sense of community. In the case of a disciplinary infraction, restorative practices allow individuals to take full responsibility for their behavior by addressing the individual(s) affected by the behavior. Through these practices, individuals come to understand how their behavior affected others, recognize that their behavior was harmful to others, move toward repairing the harm, and work on not repeating that behavior again. ([National Center on Safe and Supportive Learning Environments](#))

Sociopolitical Awareness: The ability to identify, analyze, and work to solve real-world problems by thinking critically and drawing conclusions about complex issues related to equity, identity, power, or bias.

Translanguaging: The process whereby multilingual speakers utilize all of their languages as an integrated communication system to learn. ([The Massachusetts Blueprint for English Learner Success](#))

Universal Design for Learning (UDL) is intended to increase access and engagement in learning by reducing physical, cognitive, intellectual, and organizational barriers, and other obstacles. It includes providing learners with multiple means of engagement, representation, action and expression. ([Multi-Tiered System of Support](#))
