FAQ

1.	How long does summer school last?	Classes run from June 1st through June 19th for most classes. EOC classes (Algebra, Lit & Comp 2, US History, Biology) have EOC's June 23, 24, & 25.
2.	Can students take new credit?	Yes, but on a limited basis. Counselors must communicate with NHEC prior to registration.
3.	What about NCAA eligibility for student athletes?	We can provide NCAA classes during the summer. Students in this situation must complete the entire course as a New Credit and cannot end prior to the last day of summer school.
4.	What about attendance?	Students must attend in-person at New Hope, 2 days a week on Monday/Tuesday OR Wednesday/Thursday. Preferential days of attendance cannot and will not be guaranteed. Transportation is NOT provided by PCSD. The required time of in-person attendance is 8:00 a.m. – 11:00 a.m. Students will work virtually on days that they are not attending in person.
5.	How many classes can a student take?	Students may register for either 0.5 or 1.0 credit. Students may only take 1 course. Course fee must be paid via NHEC Revtrak at the time of registration. Refunds will NOT be given due to incomplete coursework.
6.	When are the grades sent to the school?	Because NHEC is a PCSD program, grades are available to schools once summer school ends and all EOC scores have been received.
7.	Are teachers available to help students?	Yes. We have certified teachers that are available to reteach and support students with their coursework. All student work is completed on a computer.
8.	Is there anything else that I need to know?	Summer school is a relatively brief but concentrated school semester so attendance during in-person days is important. Due to the length of summer school, students should expect to spend 4-8 hours per day working on their courses. Student courses are available to them 24 hours a day, 7 days a week. We have had great success with our students successfully completing summer school each year. The student controls the pace of the coursework within the summer school time frame and may even complete the course before the last day of summer school. Teachers are available in-person to help students navigate successfully through summer school.
