AP Precalc Summer Work 2026

- At the beginning of the 2026-2027 school year, you will be taking a test covering the topics below.
- You can use any platform (Khan Academy, DeltaMath, i.e.) to help prepare for the exam.
- I have set up a DeltaMath classroom with videos and practice problems to help you review.
- The "assignments" in DeltaMath will not be for a grade but are strictly there for you to prepare for the test.
- You will be able to use a 1/2-sheet of paper as a "cheat sheet".

- In DeltaMath, use the link below to join the 2026 AP Precalc Summer Work class. The class code is: 3DM7-4YJ2 (in case the link doesn't work).
  https://www.deltamath.com/students?code=3DM7-4YJ2

The following topics will be on the Summer Work Exam (which will be given on Thursday, August 27th, tentatively. We will not be spending time covering these topics in class. If you need any help, please use the time during Homeroom.

**One more thing…I highly suggest purchasing a TI-84 graphing calculator (although you can purchase any brand) before the start of the school year, if you can. The math department does have some for check-out on a first-come, first-served basis.

Topics:

- Interval Notation
- Exponent Properties
- Linear Inequalities
- Equations of Lines (including horizontal, vertical, parallel, and perpendicular)
- Simplifying Radicals
- Factoring Quadratics
- Quadratic Formula
- Completing the Square
- Imaginary and Complex Numbers
- Systems of Equations

See you in August!
Mrs. Sisneros
