Board of Education Policy

Section: Business and Finance
Title: Tuition Policy
Policy #: 300-09
Date Approved: 08/15/12
Date Revised: 05/10/2012

TUITION

The tuition charge is determined by adding (1) the costs of education for current expenditures; (2) the payments on any bonds and interest thereon; and (3) any other educational purpose for which local taxes are to be used in the current school year. The cost shall include only the cost for such grades and programs as are authorized in the local district. The sum so obtained shall be divided by the total number of pupils attending schools of the district for the current fiscal year.

PAYMENT OF TUITION

A school district receiving any pupil who is a resident of another school district shall collect a tuition charge for the non-resident pupil. Such tuition charge shall be paid by the Board of Education of the school district in which the pupil is a resident from the proceeds of a local tax which shall be levied for this specific purpose.

The Board of Education will not agree to the transfer of a pupil from the district in which his legal guardian resides except as follows:

1. The pupil qualified for a special education program not given in the home district. [Orthopedically handicapped, "trainable", etc.].
2. When there is an extreme emotional or health problem and the administration demonstrates that it would not be in the best interest of the pupil to attend school in the home district.
3. If a pupil resides in the district until the beginning of the second semester of the school year, he will be permitted to finish the year. In this case, the Board will neither pay nor demand tuition payment.
4. If a pupil moves after the completion of his junior year, he may be permitted to finish his senior year provided both boards agree and, provided an agreement is reached for the payment of tuition.
