JACKSON
PUBLIC SCHOOLS

School–Community Relation Goal Policy Revision

Zy'Quria McClendon
Lanier Jr. Sr. High School
Student Board Representative

Original Policy

The Board of Trustees, in an effort to ensure and enhance the possibilities for excellence in the education of children in a free society presents this statement on school and community relations because of its conviction that (a) the public schools belong in every sense to the people who created them by consent and support of the people of the community; and (b) the people's support is based upon their knowledge of, their understanding about, and their participation in the aims and efforts of the public schools. The Board reaffirms and declares its design and intent:

Original Policy (cont.)

The Board reaffirms and declares its design and intent:

- ★ To keep the citizens of the community regularly and thoroughly informed on all the policies and programs of the school district, and to carry out this policy through the offices of the superintendent.
- ★ To invite the people of the school district and the community to all monthly meetings of the board except to executive sessions.
- ★ To solicit ideas and involvement of business and professional leaders for the successful operation of the school program to support endeavors for the continuance of the Adopt-A-School Program.

Pros & Cons

This policy clearly states the district's intentions to inform the community of all their policies, include them in all monthly meetings except for executive meetings, and touch on the method of funding for all public school institutions (such as the Adopt-A-School Program), but it fails to include the students in this discussion. It is an amazing policy when it comes to keeping the public invested in the potential of the district, but it doesn't take into account the lives of the students who actually attend these schools.

Revised Policy

The Board of Trustees, in an effort to ensure and enhance the possibilities for excellence in the education of children in a free society presents this statement on school and community relations because of its conviction that (a) the public schools belong in every sense to the people who created them by consent and support of the people of the community; (b) the people's support is based upon their knowledge of, their understanding about, and their participation in the aims and efforts of the public schools; and (c) any scholar's academic future is guaranteed the moment they become apart of the Jackson Public Schools District.

Revised Policy

The Board reaffirms and declares its design and intent:

- ★ To keep the citizens of the community regularly and thoroughly informed on all the policies and programs of the school district, and to carry out this policy through the offices of the superintendent.
- ★ To invite the people of the school district and the community to all monthly meetings of the board except to executive sessions.
- ★ To solicit ideas and involvement of business and professional leaders for the successful operation of the school program to support endeavors for the continuance of the Adopt-A-School Program.
- ★ To discuss what hinders a scholar from reaching the full potential of their academic success, such as truancy, mental illnesses, terminal illnesses, familial responsibilities, alternative reception of information, and etc.

Why this works?

My revision to this policy ensures accountability and encourages more communication between the Board of Trustees and the scholars of their district. It also helps provide support for the students on all levels of their education, while giving their families and their communities the option to weigh in on the solutions to the hypothetical situations presented in my contributed bullet point.

Thank you for your time !
