One Session Only!

June 15 - July 2
(no school June 19th)

Automotive Technology

Experience working in a 4,500 square foot, state of the art shop. Students will not only learn to diagnose and repair real world customer vehicles but also gain skills in industry documentation. Foundational welding skills will also be part of the summer class. (Occupational or Elective Credit)

Culinary Arts

Enhance your skills in the kitchen through a variety of recipes and cooking techniques. Students will work in teams to produce tantalizing dishes and elegant presentation. (Occupational or Elective Credit)

Digipen Animation

Bring ideas to life by creating them in your own digital world. Using 3ds Max, the same software used by industry leading companies, students will create 3d models and animate them in digital space. (Fine Arts, Occupational or Elective Credit)

Fire Science

A course that prepares students to perform the duties of firefighters. Course includes instruction in firefighting equipment operation and maintenance, principles of fire science, methods of controlling different types of fires, and fire rescue procedures. This class participates in group projects and requires students to participate in moderate indoor/outdoor exercise. Incoming 11th & 12th grade students only. (Occupational or Elective Credit)

Health Care Careers

Explore the world of health care in 13 days! Students will learn the fundamentals of working in the health care field including some medical terminology and career opportunities. (Occupational or Elective Credit)

Video Production

Learn how to be the director of your own videos. Use powerful non-linear video editing software with special effects capabilities to bring ideas to the small screen. (Fine Arts, Occupational or Elective Credit)
