Digital Displays

*These **are not** to be used as digital bulletin boards. We are in the process of creating an option for this type of display.*

Please note that there are three options for digital display. When requesting an account, please indicate the option you wish with details.

*Non-Interactive displays **are not used** as TVs; they are simply digital displays.*

Option 1 Non-Interactive: *This digital display would be used in a conference room or a PD room where users must bring in their own laptop. This option comes with the following.*

- Digital display
- HDMI cable

Option 2 Non-Interactive: *This digital display is used in classroom where the student is **not interacting** with the board and only uses the board as another monitor to display information. This display can be connected to a laptop with an HDMI cable or the built in micro-PC. This device offers greater cost-efficiency. This option comes with the following.*

- Digital display
- Micro-PC

Option 3 Interactive: *This digital display is used in the classroom where the student interacts with the content on the board. This display can be connected to a laptop with an HDMI cable or the built in micro-PC. This is a more costly device.*

RICHLAND ONE

This is a digital display that comes with Request with the quote of the display a micro-PC so that you can use the panel as an actual computer.

- *Digital display*
- *Micro-PC*
- *HDMI cable*
