Payments for comprehensive full-banded orthodontic treatment are made in installments. Benefit payments will be made every 3 months. The first payment is due when the appliance is installed. Later payments are due at the end of each 3-month period. The first installment is 25% of the charge for the entire course of treatment. The remainder of the charge is prorated over the estimated duration of treatment. Payments are only made for services provided while a person is insured. If insurance coverage ends or treatment ceases, payment for the last 3-month period will be prorated.
