Phillip Corley and me jam in the music room. He plays bass and I play electric lead. I've been trying to get a group going for two years and I've been writing music for three. At present I'm 13 years old but by the time you read this I'll be 113 years old. Maybe in a few years I'll have a group going and you may have heard of me. But that is in the future for me now. It's kind of an eerie thought that I'll probably be dead and gone when you read this. 1976

Music future really interests me. Like, right now, the top groups are Led Zeppelin, Pink Floyd and Ted Nugent. What will it be in 50 years?
