

The purpose of this essay is to tell what the world will be like in the year 2026.

First, for transportation there will be moving sidewalks, and planes shaped kind of like bubbles, and cars will be run by electricity.

Second, for education there will be machines that look like televisions that will replace teachers and the kids will do their work at home.

Third, for energy, things will be run by atomic power.

Fourth, for government and law it will be getting worse. There will be a lot of fighting. Laws will be more lenient.

Fifth, for religion, people won't be going to church and the rules for the churches will not be as

Sixth, for sports and recreation games will be played by pushing buttons, there will be space games.

Seventh, for housing there will be space houses and everything in them will be push buttons.

Eighth, it is hard to say what Michigan City will look like in 50 years. But I think Michigan City will have a lot of computer run things.
