Course Title:	Introduction to French
Grade(s):	6

Course Description
In the Grade 6 Introduction to French class, students discover the French language and the cultures that speak it. Students will explore where French is spoken around the world. Students will take part in discussing the benefits of learning a world language and why French is an important tool for communication and cultural understanding. Throughout the semester, students will learn numbers, practice saying the alphabet and spelling words (including those with accents), and communicate simple introductions and expressions of feelings. Essential classroom expressions will be mastered, while attention to letter pairs and phonetics will help build strong foundational skills for reading, speaking, and understanding French.
