

Summer Engagement Philosophy: Summer should be a time for fun, relaxation, and family time. However, intentional practice of math skills has been shown to be helpful for student retention of topics learned during the previous school year. The assigned work is designed to **review** some essential skills/concepts/math facts to ensure a smooth transition back to school.

Expectations: Students are expected to complete the assigned Khan Academy work. Our goal is for students to spread out this practice with approximately one hour per week so there is a continual engagement with mathematics. Teachers will be checking progress prior to the first day of school. This is intended to be a part of the first check for understanding prior to our beginning units.

What parents can do to support their child:

- Make a practice plan and help your child set goals in order to complete the required work by the start of the school year. Spacing the practice throughout the summer will be more effective in terms of keeping skill sets in place (ex: Monday Math fun!)
- Establish a place where your child can work without distractions and encourage independence when appropriate.

Students entering **AP Statistics** should complete the “[Get Ready for AP Statistics](#)” course on Khan Academy
