

CAREER READINESS

HELPING YOUR CHILD PREPARE FOR FUTURE SUCCESS!

Career readiness isn't just about getting a job—it's about building the skills, mindset, and confidence your child needs to succeed in school, work, and life.

1. Encourage Exploration

Talk with your child about their interests and strengths. Expose them to different careers through videos, books, or conversations with others.

2. Connect School to Real Life

Help your child understand how subjects like math, reading, and science relate to real-world jobs.

3. Build Responsibility

Assign chores and encourage time management. Responsibility at home builds strong work habits.

4. Support Goal Setting

Help your child set short-term and long-term goals. Celebrate progress, not just results.

5. Promote Problem-Solving

Let your child make decisions and learn from mistakes. Ask guiding questions instead of giving all the answers.
