

Cache County School District Policy Series 3000: Students

Policy No. 3250 P6

Emergency Administration of Opiate Antagonist Naloxone (Nasal Narcan)

- A. Nasal Narcan will be maintained in all Cache County Secondary Schools.
- B. Trained school personnel (e.g., administrators, school resource officers, and school nurses) may administer Nasal Narcan to any person(s) who may be suffering from an opioid overdose.
- C. The above trained school personnel should make every reasonable effort to include the use of Nasal Narcan combined with CPR, to revive the victim of any apparent drug overdose.
- D. A face shield/mask should be used when providing CPR breathing.
- E. The school will only maintain and provide Naloxone (Narcan) in a nasal route of administration.
- F. School nurses will provide initial and annual refresher training that will include:
 - a. Techniques for identifying an opiate-related drug overdose event;
 - b. Standards and procedures for the storage and emergency use of an opiate antagonist.
 - c. Calling 911 and contacting, if possible, the student's parent/guardian.
- G. Medication supply and storage
 - a. The supervising physician for Cache County School District will be the authorized prescriber to obtain Nasal Narcan and will write prescriptions as needed to replace medications.
 - b. Nasal Narcan has an expiration date of about 12-18 months from the date of manufacture. Schools should notify the school nurse when medication is expiring.
 - c. Nasal Narcan will be stored in an area out of reach of the student body, but accessible to staff when needed.
