

Hello Future Algebra 2 Honors Students,

Algebra 2 Honors is a challenging and quickly paced course that will require you to have mastered specific Algebra 1 skills. Expectations will be high.

Your task this summer is to complete a review on Deltamath.com. It is accessible by any device (computer, tablet, or phone) with internet access. Register by clicking or typing this address:

<https://www.deltamath.com/students?code=6YR6-SF3D>. This link will register you in the Algebra 2 Honors Summer Work Class. For easy access, sign in/register with your school Google account when prompted. If you do not have a CCSD address you may use your personal address, just ensure your name is listed as it would be during school registration.

Upcoming 1 Complete

Algebra 2 Honors Summer Work

If you have used DeltaMath with a previous teacher, make sure to select the Algebra 2 Honors class on the left-hand side to see your assignment.

If you have never used DeltaMath before, please view the Intro to DeltaMath Video, also found on the left-hand side.

The beauty of DeltaMath is the ability to earn 100% mastery. There are worked out examples and video tutorials to help you as you work out each problem.

If you have any issues, please feel free to email me at melanie_phillips@charleston.k12.sc.us. I will be checking my email periodically this summer.

All students will be assessed on this Algebra 1 material within the first two weeks of your Algebra 2 Honors class. Students will be expected to execute similar type problems without answers provided.

The flow of next year will be dependent on your ability to use Algebra 1 skills, critically think, and walk into class with confidence knowing you have put in quality time over the summer. If you find yourself struggling with the summer work, please consider placement into Algebra 2 CP where more time will be given for review and less depth of material will be covered.

Looking forward to seeing you next school year!

Sincerely,

Ms. Phillips
