WASTE MANAGEMENT SERVICES RFP #931-2026-2027

Questions Regarding Clarification or Interpretation of the RFP

1. Question- 05/06/2026:

The cover sheet shows bids due on May 20, however Page 2 "Submission of Proposal" shows the date as April 22, 2026.

District Response:

Addendum #1 posted to FISD Website on 5/7/2026 for date clarification.

- Item 2. SUBMISSION OF PROPOSAL, 2.1 Correct Date: May 20, 2026, Time: 11:00 am

2. Question- 5/7/2026:

IN regards to the RFP I had a couple of questions:

- The RFP identifies "Firm fixed rates" through term of contract.
 - Does that mean no PI's in any year?
 - Does that mean we can provide a Fixed PI for each year?
- There is a SL can need identified in the Container Specs (pg 6), however I do not see it listed this way in the bid pricing documents.
 - Please confirm if this is the case as SL and FL are serviced from 2 different types of trucks

District Response:

As stated under Section 4. CONTRACT REQUIREMENTS, Item #4 Type of Contract.

- Firm fixed rates for the standard waste containers for the term of the contract.

In this agreement, the term would be the initial July 1, 2026, through June 30, 2029, contract period.

However, the District will issue Addendum #2 stating that these terms may be negotiated for the two (2) additional one-year periods. All extensions must be executed in writing prior to the expiration of the current contract.

The container for the District Administrative Office can be a Front Load (FL) 4- yard container. This clarification will also be included in Addendum #2.

FredericksburgISD

3. Question- 5/7/2026:

My apologies, 1 more question,

In the RFP it also states Compactor Service, are you referring to the large rolloff compactors? We don't currently provide compactor services. If the district is interested in compactor services, where would that service be located and what sizes? Any help is greatly appreciated.

District Response:

The additional pricing should be for Large Waste Roll-off Containers as noted in section 7.4 (page 7), not for Compactor Service. This clarification will also be included in Addendum #2.

We would need a 30-yard or 40-yard roll-off container on an as-needed basis. The container would be used at the maintenance department and, when necessary, for bulk campus cleanup.
