

AIG Student

Middle School Experience

What can I expect in middle school AIG?

AIG shifts from an enrichment focus in elementary to a content acceleration focus in middle school.

AIG students are clustered in classes and have classroom teachers that are trained in working with AIG students.

Compacted Math Classes

6th Grade: 6th grade and some 7th grade standards

7th Grade: Remaining 7th and 8th grade standards

8th Grade: Remaining 8th grade and Math I standards (High School Course)

ELA Cluster Classes

30-70% of the students in the class are identified as AIG in reading. These classes move at a faster pace and read more complex text.

Opportunities for AIG Students

Students will be invited to join an AIG Google Classroom in the fall. Updates and opportunities throughout the year will be shared here.
