

W.B. Beam Intermediate Overview

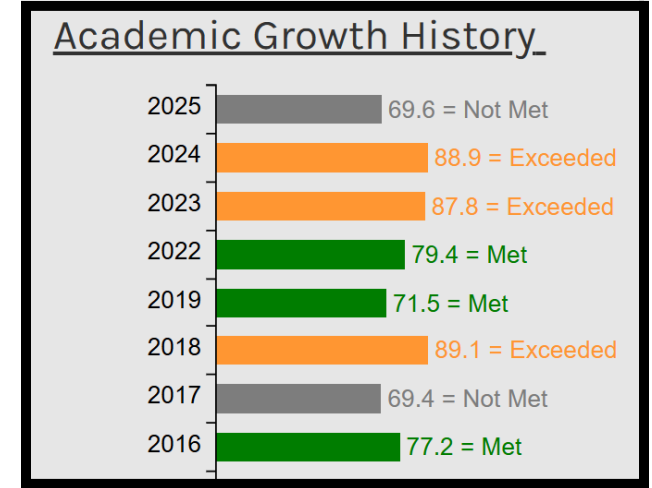

W.B. Beam Intermediate has 'met growth' expectations as measured by EVAAS only two times since 2016.

Cherryville Elementary Overview

Cherryville Elementary has met growth expectations in every year but one, since 2016

Chavis Middle Overview

Chavis Middle has Met or Exceed growth in all but two years since 2016. They have exceeded 3 times.

EVAAS is a value-added growth model that includes student performance on all applicable subject assessments for that school. The growth model calculations result in a composite index growth value which determines a growth designation for the school of **exceeds expected growth**, **meets expected growth**, or **does not meet expected growth**. For the purposes of the school performance grades, the growth composite index is converted to a 100-point scale, so it can be combined with the school achievement score to create the overall school performance grade score.

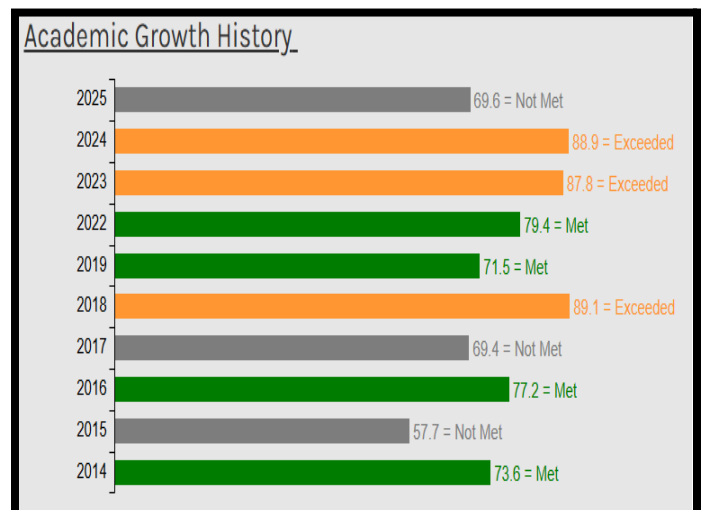

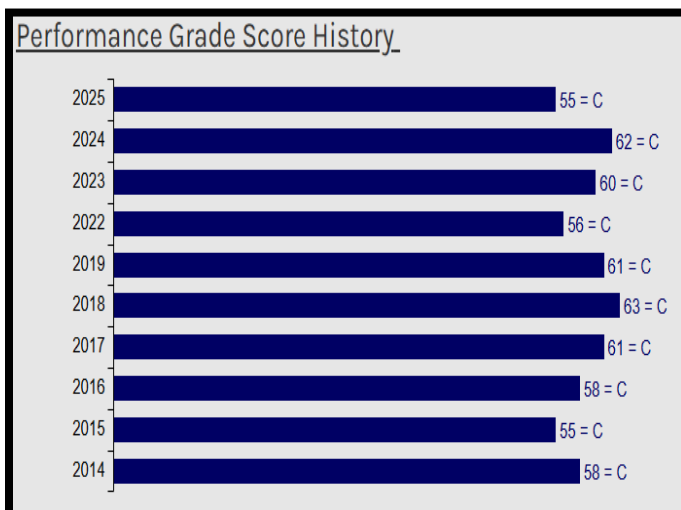

John Chavis Middle School

A: 85-100
B: 70-84
C: 55-69
D: 40-54
F: 0-39

John Chavis Middle School has maintained a **School Performance Grade (SPG)** at a C level since 2014. The range in order to achieve a C in SPG grades is 55-69. The scores at John Chavis have varied from 55 (in 2015 and 2025) to 63 (In 2018). Most recently, the school SPG dropped from a 62 in 2024 to a 55 in 2025.

Growth at Chavis has ranged from a low of 57.7 (in 2015) to a high of 89.1 (in 2018). The school has exceeded growth in both the 2023 and 2024 school years. The range for Growth scored and SPG performance can be seen below:

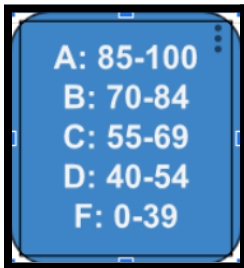

Growth Range	Growth Status
85.0-100.0	Exceeded
70.0-84.9	Met
50.0-69.9	Not Met

Although Chavis met or exceeded growth in all subjects/grade levels in value-added reports in EVAAS for the 2023 and 2024 tested years, many subjects/grades saw a decline in 2025. The largest decline was in 6th grade math which exceeded growth in 2024 with an index of 2.15 and then dropped to not meeting growth in 2025 with an index of -3.79. This had an impact on overall math growth at the school, dropping from 3.25 (exceeds growth) in 2024 to -3.03 (does not meet growth) for the 2025 tested year.

Overall **proficiency results** for the last three years are in the low 50s. There was a slight increase from 2023 results to 2024 results but then a slight decline in 2025.

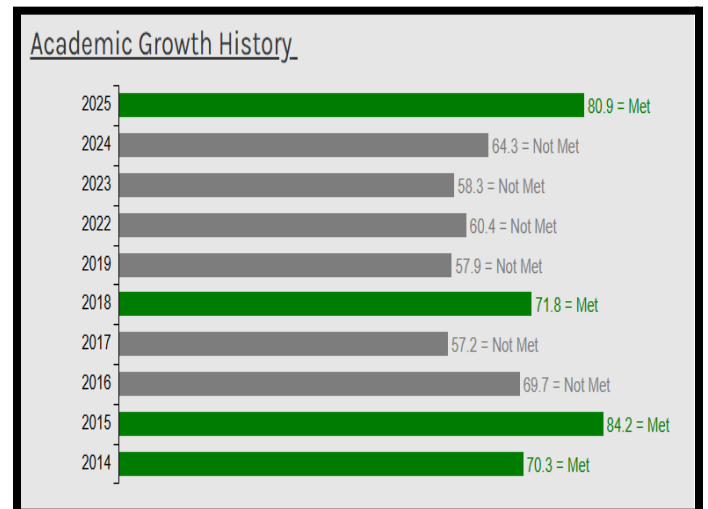

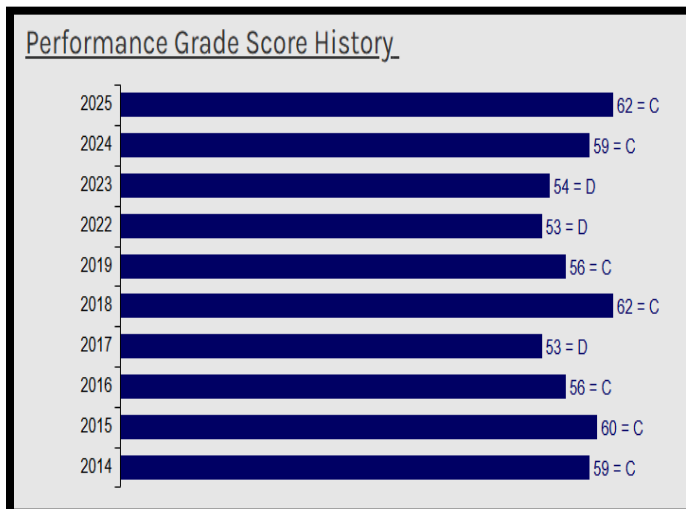

School	22-23	23-24	24-25
John Chavis Middle	51.7	52.1	50.5

W.B. Beam Intermediate has had a **School Performance Grade (SPG)** of both a C and D level since 2014. 7 times they achieved a 'C' and 3 times they achieved a 'D'. The range in order to achieve a C in SPG grades is 55-69. The scores at W.B. Beam have varied from 53 (in 2017 & 2022) to 62 (In 2018 & 2025). Most recently, the school SPG increased from a 59 in 2024 to a 62 in 2025.

Growth at W.B. Beam has ranged from a low of 57.2 (in 2017) to a high of 84.2 (in 2015). The school never exceeded growth in the last 10 opportunities. They have not met growth 6 times. They met growth 4 times. The range for Growth scored and SPG performance can be seen below:

Growth Range	Growth Status
85.0-100.0	Exceeded
70.0-84.9	Met
50.0-69.9	Not Met

W.B. Beam did 'Meet Growth' across all grades and subjects combined in 2025. The only specific grade and subject combination that they received a rating of 'Does Not Meet Growth' in was 4th grade Math. 4th grade math has not met growth expectations for 3 consecutive years. While 5th grade science growth did not meet expectations in 2023 & 2024, students did meet expected growth in 2025. Overall, 2025 represented the most positive year out of the last three for growth.

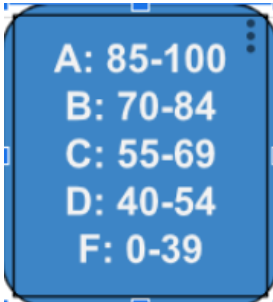

Overall **proficiency results** for the last three years are relatively consistent and show a slight upward trend. Proficiency across all combined grades and subjects increased by about three percentage points from 2023 to 2025.

School	22-23	23-24	24-25
W.B. Beam	53.6	55.8	56.3

Cherryville

Elementary School

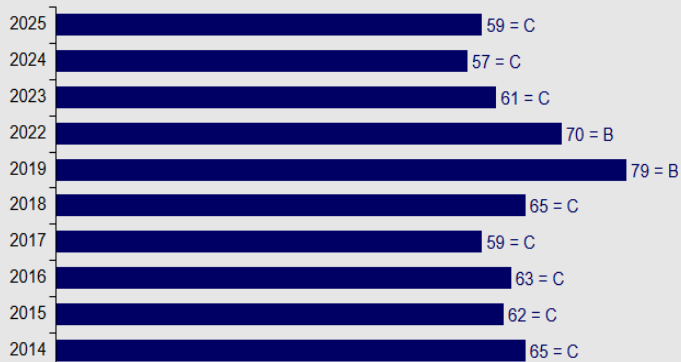

Cherryville Elementary School has had a **School Performance Grade (SPG)** of both a B and C level since 2014. In 2019 & 2022 they achieved a "B" and in 2014–2018, 2023–2025 they achieved a "C". The scores at Cherryville Elementary have been consistent within a "C" range of 57–65. Most recently, the school SPG increased from a 57 in 2024 to a 59 in 2025.

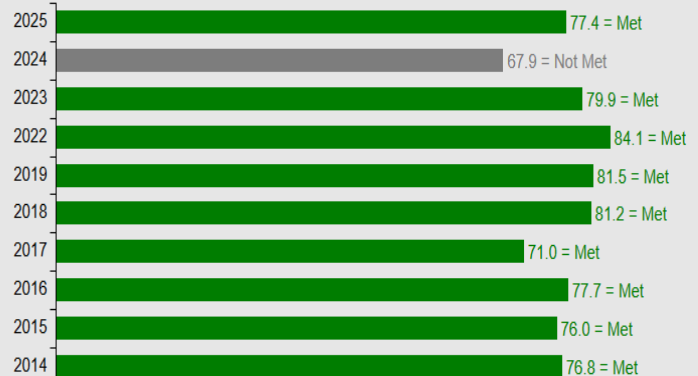

Growth at Cherryville Elementary has been consistently met, ranging from a low of 71.0 (in 2017) to a high of 84.1 (in 2022). The school did not meet growth in 2024. They have never exceeded growth. The range for Growth scored and SPG performance can be seen below:

Growth Range	Growth Status
85.0-100.0	Exceeded
70.0-84.9	Met
50.0-69.9	Not Met

Performance Grade Score History

Academic Growth History

Cherryville Elementary did "Meet Growth" across all grades and subjects combined in 2025 with an increase of over nine percentage points from 2024. In 2024, 1st grade and 3rd Grade Reading did "Not Meet Growth" causing the school to fall into the "Not Met" category. Overall, Cherryville Elementary has consistently met growth expectations since 2014.

Overall **proficiency results** for the last three years are relatively consistent and show a decline in 23–24 and then an increase in 24–25. The only tested grade and subject that is represented in this data is 3rd Grade Reading.

School	22-23	23-24	24-25
Cherryville Elementary	56.3	50.5	53.9
