

SUMMER MATH WORK

RISING 1st GRADE

Math is a subject that continually builds on itself. Having a solid foundation in Math is important for continued growth and learning in the subject.

- Keeping this in mind, we are asking students to practice mathematical foundations over the summer to return to school in the Fall ready to take on the content with confidence. **During the first week of school your Monarch will complete a math assessment based on the criteria below.** Practice and proficiency over the summer will be necessary for success in both the assessment, as well as in math class throughout the year.

*Please note that the “Suggested Activities for Practice” are simply meant to help your daughter prepare for the Math assessment at the beginning of the school year. **These activities do not need to be turned in.***

Content	Suggested Activities for Practice	Assessment Format
Counting to 100	• Collect 100 items (beans, beads, leaves, fruit loops, etc.) and practice counting them • Cut up a filled in 100's chart in different pieces to create a puzzle and practice putting it together - Printable 100's Chart • Sing along to counting songs - Counting to 100 & Counting to 100	Students will be assessed on counting to 100 and filling in a blank 100's chart within the first week of school.
