Committee Member Perspectives

From: **John McGarrity**, President Cornwall Park Neighborhood Association

- The neighborhoods served by Parkview Elementary School will benefit by having a greatly improved facility for our children and our neighbors' children.
- This new construction at Parkview will eliminate a host of problems, large and small, that have interfered with the everyday use of our school.
- Another benefit of the planned improvements is the higher regard our neighborhoods will be held because of the investments we make in our school.
- Investment in Parkview is also an investment in our homes, neighborhoods, and community.
- I am pleased that the whole community has been invited to contribute thoughts and concerns about improving our school.

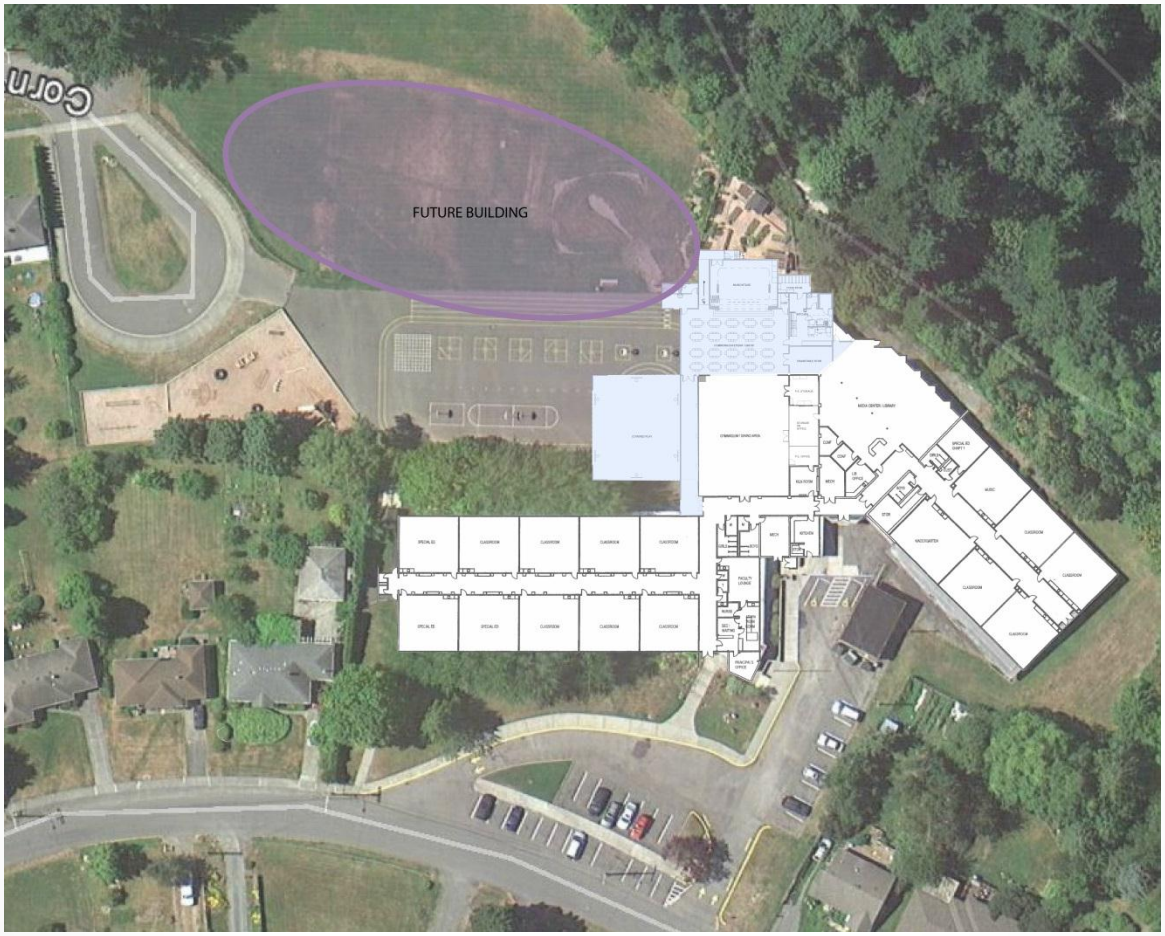

From: **Nic Castona**, Parkview Physical Education Teacher

- The currently shared space at Parkview limits our ability to fully meet our student's needs. The new addition is a much needed improvement that will benefit multiple areas of our school. These improvements will allow for a wider variety of curriculum due to the ability to dedicate these new spaces solely to teaching and learning. More flexible scheduling will allow for more sensible and student friendly class, recess and lunch schedules along with eliminating current congestion issues. Lastly, the increase in space will provide Parkview the flexibility to host outside organizations, after school clubs and other school related functions that we currently cannot offer.

From: **Greg Seeligson**, Parkview Parent

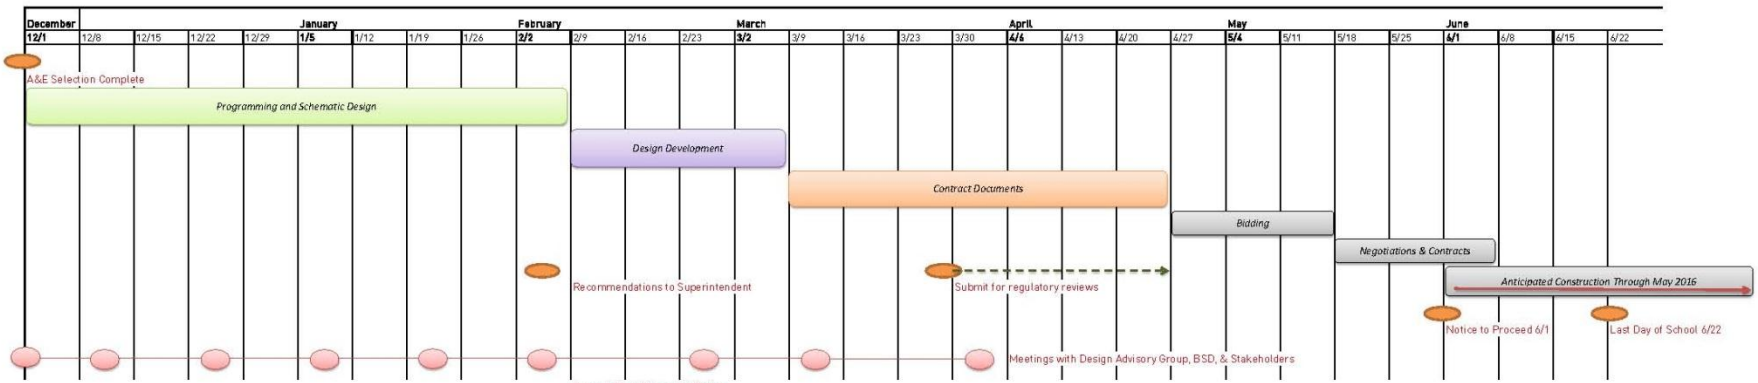

- The new facilities are going to serve our children by reducing congestion in the hallways, providing a designated lunchroom and a designated gym. The food provided will be able to be prepared on site. The staff will have more flexibility with scheduling of lunch and p.e. This will enhance the quality of time our kids enjoy at Parkview.

Feedback

What resonates or what do you like about the committee's proposed design concept?

What don't you like or what concerns do you have?

Do you have suggestions for improvement to the proposed design concept?

What other building or site improvements would you like to see if funds allow?

Questions/Other:

Please return to the Department of Communications and Community Relations, Bellingham Public Schools, 1306 Dupont Street, Bellingham, WA 98225 by noon on January 12, 2015.

Feedback may also be emailed to Lisa.Hust@bellinghamschools.org by noon on January 12, 2015.
