August 3rd - August 7th

Grades K-5 (26-27 Grade Level)

9am - 5pm

HUES

FEE: \$400

Builders & Body Science Camp!

Last Day to Register: 7/21

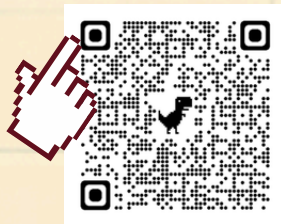

Build, experiment, and explore the amazing science of engineering and the human body in this hands-on STEM camp! Campers will become junior engineers and future physicians as they design structures, test simple machines, and discover how the body works from the inside out.

Students will build exciting projects using pulleys, wedges, screws, and levers while creating catapults and giant geodesic domes through fun teamwork challenges. Campers will also explore anatomy and body systems by making model cells, inflatable lungs, Mad Mucus, and even a mashed potato brain!

Each day is filled with creative STEM activities, experiments, teamwork, and hands-on projects to take home.

Important Information:

- Students must bring a bagged lunch each day.
- All students must be picked up by an adult 18 years or older.
- Transportation is not provided.
