

Scottsdale Unified School District Artificial Intelligence | Appropriate Usage Levels

Purpose

SUSD is committed to purposeful AI integration, guiding teachers to assign AI use levels that intentionally leverage AI's learning benefits while preserving tasks that foster independent thinking. This chart helps students understand how AI may be used for each assignment and ensures consistent, ethical, and appropriate AI usage across classrooms.

How To Use This Poster

Teachers:

- Choose the AI level for each assignment and communicate it clearly.
- Use the examples as guidance for what is and isn't allowed.

Students:

- Follow the AI usage level your teacher assigns.
- If an assignment doesn't clearly specify an AI Usage Level, assume it is Level 1. When in doubt, check with your teacher.

AI Use Levels & Guidelines

Level 5

Full AI Co-Creation

Students may use AI to brainstorm, draft, revise, and co-create content (i.e., text, images, audio, code, designs, summaries, etc.) with proper citation.

Level 4

AI-Supported Revision

AI may help improve student-created work (editing, feedback, suggestions). Students create the work; AI helps improve it. Students clearly indicate how AI supported their work.

Level 3

AI-Supported Research

AI may help students gather background information, outline ideas, ask/answer clarifying questions, explain concepts, and/or help students plan. Students clearly indicate how AI supported their work.

Level 2

Limited AI Use (Idea Support Only)

AI may only be used in specific ways (e.g., brainstorming only), defined by and with permission from the teacher. Students clearly indicate how AI supported their work.

Level 1

No AI Use Allowed

AI may not be used in any way for this assignment — regardless of setting (school/home).

Always double-check AI-generated content for accuracy, as it may not always reflect accurate or complete information!
