Liberty Auto Shop Auto Club Built Firetruck

@Libertyautoclub

Paint correction done by the students in the class. The single stage paint was very difficult to clean and polish.

Custom installed Cummins 12 valve engine, Allison Transmission, radiator and inter-cooler. New gaskets and seals on all.

Exhaust and turbo picked out and installed by the students.

The entire fuel system is a custom design, including the Airdog Fuel pump installed by the students.

Thank you to our sponsors!!!
