Stronger Together: A Powerful Week of Partnership at Our Parent Teacher Conferences

There was a real buzz around the school in Week 3 of this term as parents, teachers and students came together for our Parent-Teacher Conferences. What an incredible week it was!

From the moment families walked through our doors, the atmosphere was filled with positivity, encouragement and meaningful conversations focused on **one common goal: helping every child succeed.**

The fantastic turnout from parents was truly inspiring and reflected the strong partnership that exists between our school and families. Meeting rooms were filled with conversations celebrating student achievements, discussing learning goals, sharing progress and exploring ways to continue supporting students both at school and at home. **The week was a powerful reminder that education works best when parents and teachers stand together.**

Throughout the conferences, teachers had the opportunity to share the wonderful growth students have been making academically, socially and emotionally. Parents also shared valuable feedback, encouragement and insights that helped strengthen communication and deepen the connection between home and school. These conversations were not simply about report cards or classroom results — **they were about building relationships, creating trust and working collaboratively to support every learner.**

The positive energy across the school throughout the week highlighted the importance of strong parent-teacher partnerships.

One of the most encouraging aspects of the week was **seeing our school community united with a shared commitment to student success.** Parents asked thoughtful questions, teachers shared strategies and goals and together we celebrated the growth and potential of every child. It was a powerful example of partnership in action.

We would like to sincerely thank all parents, caregivers, teachers and staff who contributed to making the Parent-Teacher Conferences such a success. Your time, support, encouragement and dedication continue to make a meaningful difference in the lives of our students.

Last week was more than just a series of meetings — **it was a celebration of connection, collaboration and community** because when **schools and families work together, children truly thrive.**

Integrating Health and Wellness Overview with Mothers Day

During Weeks 3 and 4, our Health and Wellness Program focused on the theme of love, care, and appreciation in preparation for Mother's Day. The children explored heart shapes and the colour pink through a variety of creative and hands-on learning activities.

Learning experiences across the classroom were integrated with a special focus on celebrating mothers and the important role they play in our lives. The children participated in art and craft activities, discussions, songs, and group experiences that encouraged them to express their love and appreciation for their mothers.

To conclude the celebrations, mothers were warmly invited into the classroom to join a special Mother's Day celebration with the children. It was a joyful occasion filled with smiles, laughter, and meaningful moments shared together.

Concluding 2 weeks of Heart and Pink Learning with ELV Mothers Day Celebration

Welcome to Grade 1RD

WELCOME TO THE INFORMER

This week, our class took part in a fun and meaningful Mathematics exploring the three parts lesson through an addition and subtraction unit**.**

Part 1

Mental Starter:
This is the first part of the lesson whereby the students are taken on a quick, fast- paced, active and focused skill. It takes about 8-10 minutes of revising, rehearsing and refining the skill.

Inductee doing the Number bonds to 10

Part 2

Clear teaching of the concept

Interactive Teaching is the heart of the Maths lesson: This is where new learning is introduced , explored and shared with the students and not just delivered to them. Clear teaching of the concept, questioning throughout, students participation and worked examples provide the opportunity for the students to practice the skills.

Student's Participation

Questioning throughout

Guided Groups

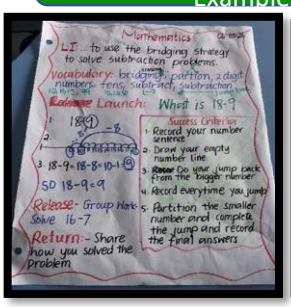

Part 3

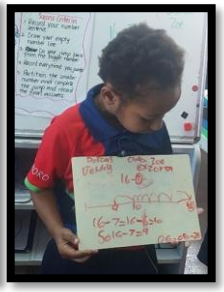

The Plenary: Today's lesson plenary is about , thinking, pairing and sharing what went well and what the students misunderstood.

Think, Pair, Share

Teacher and Student's Worked Examples

Success…Being Your Own Best

Welcome to Grade 3RR

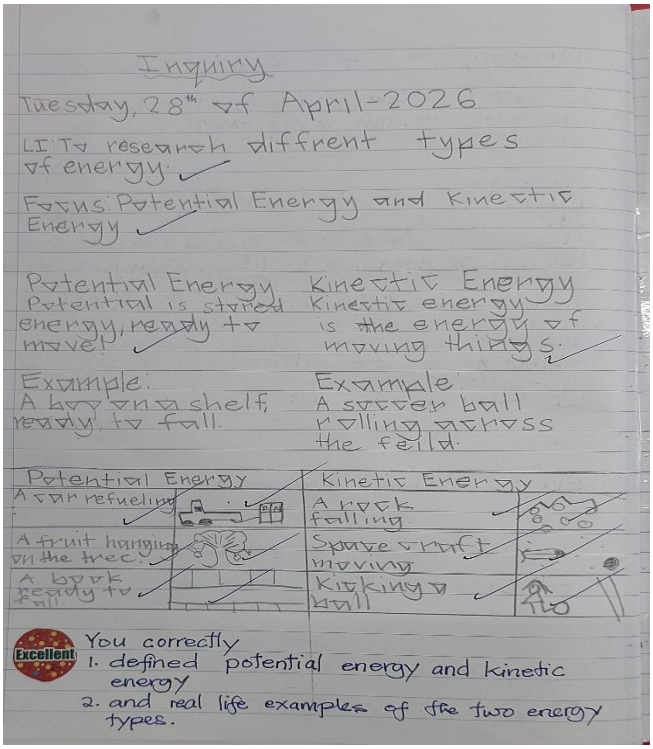

WELCOME TO THE INFORMER

3RR students have transitioned from Term 1 into Term 2 as a constellation of keen, curious, and caring learners, shining brighter with every challenge they embrace. Their resilience, determination, and willingness to grow have transformed the classroom into a place of discovery, courage, and excellence. Each student has blossomed into an amazing learner who truly lives out the school motto, **"Success being your own best,"** striving not to compete with others, but to become the very best version of themselves each day.

Students' Book Work

Developing neat, organized, and presentable book work is an important habit for Grade 3 students, as it encourages responsibility, pride, and care in their learning. From clear handwriting and accurate margins to recording learning intentions, lesson focus, completed tasks, and teacher feedback. Each part helps students build strong learning routines and attention to detail. These habits support independence, improve understanding, and teach students the value of presenting their best work every day—skills that will benefit them throughout their learning journey and beyond.

Inquiry

Tuesday, 28th of April-2026

LI: To research diffrent types of energy.

Focus: Potential Energy and Kinetic Energy

Potential Energy
Potential is stored energy, ready to move!

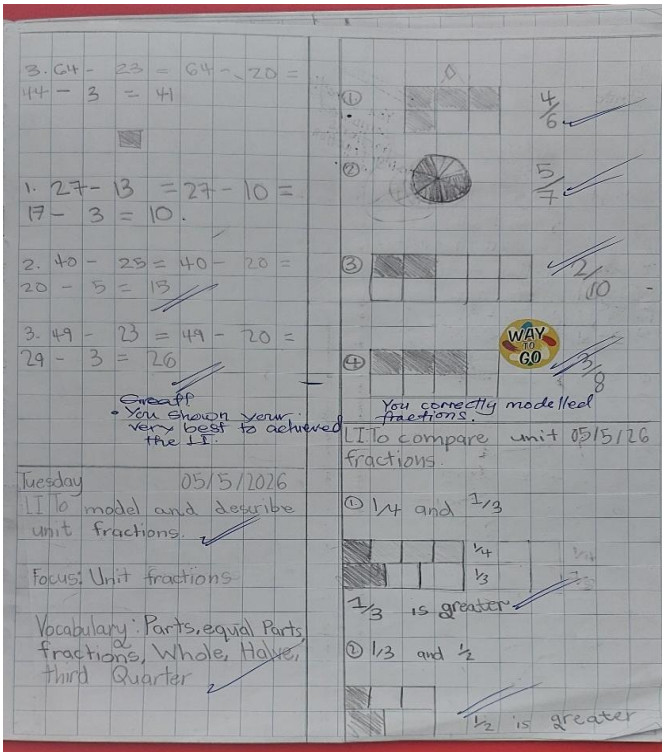

Example:
A box on a shelf, ready to fall.

Kinetic Energy
Kinetic energy is the energy of moving things.

Example
A soccer ball rolling across the field.

Potential Energy	Kinetic Energy
A car refueling	A rock falling
A fruit hanging on the tree	Space craft moving
A book ready to fall	Kicking a ball

Excellent
You correctly
1. defined potential energy and kinetic energy
2. and real life examples of the two energy types.

3. 64 - 23 = 64 - 20 =
14 - 3 = 41

1. 27 - 13 = 27 - 10 =
17 - 3 = 10.

2. 40 - 25 = 40 - 20 =
20 - 5 = 15

3. 49 - 23 = 49 - 20 =
29 - 3 = 26

Great!!
• You showed your very best to achieved the LI.

You correctly modelled fractions.

LI: To compare unit fractions. 05/5/26

Tuesday 05/5/2026
LI: To model and describe unit fractions.

Focus: Unit fractions

Vocabulary: Parts, equal Parts, fractions, Whole, Halve, third Quarter

① 1/4 and 1/3
1/4
1/3
1/3 is greater.
② 1/3 and 1/2
1/2 is greater
