

Free high school sports physicals

At TRIA, our sports physicals are completed by primary care sports medicine physicians and orthopedic surgeons. So, whether you're a professional or high school athlete, you'll receive the same expert care and attention you need to start the season at the top of your game.

TREATED BY TRIA

REGISTER

Register at tria.com/physicals.

Student-athletes must register at tria.com/physicals to reserve appointment time.

These sports physicals are pre-participation exams (PPE) intended to meet Minnesota State High School League (MSHSL) requirements. They are used to screen for physical or medical conditions that might put the student-athlete at risk for participation. A PPE does not replace annual checkups or child wellness exams. If the student-athlete is currently under medical care or requires further follow-up prior to clearance for athletic participation, they will be referred to the appropriate medical provider.
