

Tools for Schools (TFS)/Indoor Air Quality (IAQ)

Did You Know...?

There is an Annual TFS Survey Every Spring

May 4, 2026

By JoAnn Inserra

Did you know that Westport Public Schools conducts an annual Tools For Schools (TFS)/Indoor Air Quality (IAQ) survey every spring?

At the end of March, this survey is sent to all employees, including teachers, administrators, nurses, custodians, and staff. Participants are given two weeks to complete the brief questionnaire regarding the primary space where they spend the most time each day.

The survey includes questions about cleanliness, moisture incursion, thermal comfort, pests, odors, and overall air quality compared to the prior year. There is also an open-ended section for specific concerns or comments. We encourage everyone to participate, as this data helps us identify areas to address during our school walkthroughs in May.

Once the survey closes, the data from each school is summarized and shared with TFS Team Members for review before the May meeting. Some items may be addressed by the team chair and head custodian immediately, while others will be discussed during the May meeting.

The final summary is filed in the TFS binder at each school. For more information, please contact your school's team chair or the keeper of the log. The team member list is on the district website at www.westportps.org under District, Indoor Air Quality/Tools For Schools (IAQ/TFS).
