NORTH READING PUBLIC SCHOOLS

"Pursuit of Excellence"

May 1, 2027

Dear North Reading School Committee Member:

I am pleased to present to you the Fiscal Year 2027 Final Budget for the North Reading Public Schools. In accordance with the direction provided by the School Committee, the Final Budget focuses on both recovery and growth, by restoring some of the positions lost in previous budget cycles while aligning with the "NRPS 2030: strategic goals. The Final budget (1) reflects costs associated with level services; (2) the highest of priorities in the restoration of key positions eliminated over the past two years; (3) the highest of priorities in the district's strategic plan, "NRPS 2030"; (4) associated costs to properly maintain all school campuses; (5) and increases to continue to support specialized programs for our high needs' student population.

The budget for FY 2027, as compared to FY 2026, reflects an overall increase of 4.3%. The final budget for FY 2027 is $42,537,423. This reflects an increase of $1,757,374 over the FY 2026 budget figure of $40,780,049. Several factors account for the increase in the overall Final Budget as presented:

- Changes to staffing levels to (1) achieve educationally sound student/teacher ratios especially at the elementary level; (2) enhance adequate health and safety services for all students, staff and the school community (3) enhance current structures to address the social, emotional, and mental health needs of all students (4) and an increase staffing in specialized programs to support an increase in students in our high needs and special education population; (5) enhance academic support systems for students struggling in math and literacy;
- Contractual obligations with employees and employee unions;
- Continuation of the Districts digital learning goals and technology support systems;
- Associated operational costs to continue to provide the same level of services including student transportation and access to athletic and fine arts programs;
- Associated operational costs to maintain all five schools and surrounding campuses.

The FY 2027 Final Budget represents a modified level services budget. This consists of funding needed to maintain the same level of services as the previous year, including new positions driven by enrollment increases and restoration of key academic and operational positions that were eliminated the past two years. These additions are illustrated in the two tables below and account for 0.7% increase to the budget proposal.

School /Dept.	FY' 27 Enrollment Needs	Amount	Enrollment Need
Elementary	3.0 FTE General Full Day Kindergarten Paraprofessionals	$112,908	Restore general para support at kindergarten level, increase in FDK enrollment
Elementary	1.0 FTE Classroom Teacher	$85,959	Add teacher due to an increase in grade one enrollment

Elementary	1.0 Special Education Teacher	$85,959	Add teacher due to increase in special education program enrollment
Total	**5.2 FTE**	**$284,826**	

School /Dept.	FY' 27 Restoration Priority	Amount	Impact
Middle School	1.0 FTE Special Education	$85,959	Academic support needs especially in area of literacy
District	0.5 FTE Floater School Nurse	$42,500	Health and safety needs and new state mandates
Elementary	1.5 FTE Academic Support Tutors	$75,998	Academic support needs especially in area of literacy/math
Total	**3.5 FTE**	**$203,457**	

The District continues to work towards achieving its strategic objectives and making revisions annually to its strategic plan, "NRPS 2030", for continued educational improvements. Many of these initiatives have been deferred over the past several fiscal years as we deal with the current financial constraints. The high priorities that are included in the FY' 2027 Final Budget request is illustrated in the table below. There are several other positions but the below request reflects the highest of priorities.

School /Dept.	NRPS: 2030 Needs	Amount	NRPS 2030 Strategy
Elementary	0.60 FTE School Adjustment Counselor	$63,235	Student Support
District	1.0 Humanities Coordinator	$114,897	Teaching and Learning
Total	**1.6 FTE**	**$166,473**	

In Year 2 of the strategic budget vision, the proposal as presented would result in an expenditure of $166,473, which would only account for an additional 0.4% increase to the budget proposal.

Despite two very difficult budget cycles and reductions to level services, the past two years the District is pleased they have been able to restore a small amount of those positions and services lost in FY'2025 and FY'2026. I look forward to working with you and the citizens of North Reading to ensure that all students are provided the best possible educational program.

In closing, I wish to acknowledge the efforts of the district administrators for their many contributions to the development of the Fiscal Year 2027 Final Budget for North Reading Public Schools.

Sincerely yours,

Dr. Patrick C. Daly, Superintendent

TO: North Reading School Committee

Dr. Patrick Daly, Superintendent

FROM: Michael A. Connelly, Assistant Superintendent of Finance & Operations

---

Enclosed is the North Reading Public School's preliminary budget for fiscal year 2027. While I believe it addresses the goals of transparency and simplicity, I know that there are refinements to be made and I welcome your comments. It is still relatively early in this process and it is important to note that these budget numbers will most likely change as we receive more information from the state and additional guidance from the North Reading Finance Planning Team.

The preliminary budget for FY 2027 is $42,537,423, which reflects a $1,757,374 increase over FY 2026, an increase of 4.3%. The level services budget is a budget that currently exceeds the Finance Planning Team's guideline budget amount.

The FY 2027 operating budget documents are presented in three different "views." The first view is in line with the template that has been provided in the past and displays the budget salary and expense detail by DESE function code. The next view is a budget sorted by major category of expenditure: salaries, contracted services, supplies/materials, professional development expenses, transportation, utilities, tuitions, and small capital and equipment. This view helps clarify the percentage of the budget spent on salaries, utilities, tuitions, and instructional supplies. This is included in the *Operating Budget* section of the budget book. The final view is a budget sorted by major DESE cost centers, including district administration, instructional, student services, operations and fixed charges, community services, equipment, and tuitions. A summary of the budget by major cost center is included in the *Operating Budget* section of the budget book. I have also included additional information in the budget book to allow for further analysis and discussion.

I want to acknowledge all of the work that was done by the Principals and Directors and by my colleagues on the Administrative Council, who worked so very hard to discuss student needs, think creatively, and make difficult decisions that ultimately affect the quality of the student experience at North Reading Public Schools.

This budget has been prepared in accordance with the guidelines of the School Committee and Finance Planning Team and includes a "modified level services" budget proposal, which considers necessary adjustments in existing personnel for contractual salary obligations as well as fixed cost increases in the areas of maintenance, utilities, transportation, and special education needs. This budget also includes personnel increases to restore a small amount of the staffing reductions that occurred in FY'25 and FY'26 and achieve some of the key educational objectives laid out in the district's five-year strategic plan for continuous improvement known as "NRPS 2030" although not to the extent necessary. The final budget for the 2026-27 fiscal year is $42,537,423**.** This represents a $1,757,374 increase from last year, which is 4.3% higher. The school department this year is recommending a "modified level services" budget. This means that the spending will essentially be same as the previous year except for modifications due to shifts in enrollment, contractual salary obligations, operational fixed cost increases, increases to restore key positions eliminated the past two years and modest enhancements driven by the school district's educational strategic plan, "NRPS 2030," to make continuous improvements to the school department's educational programs.

FY 2026 Final Adjusted Budget	FY 2027 Level Services Budget	% Increase
$40,780,049	**$42,437,423**	**4.31%**

Finance Planning Team Guidelines

The Finance Planning Team meets regularly and reviews the revenue and expense forecasts based on the most up-to-date information for the FY 2027 revenue picture at the state and local levels. These forecasts impact the recommended revenue amounts that are available for both the town and the school budgets after fixed costs for expenses, which among other expenses includes debt service, employee benefits, liability insurances, and regional school assessment costs. The FY27 final budget meets the guidelines set forth by the Finance Planning Team.

Key Budget Assumptions

Below is a list of key budget assumptions that were made as part of the FY 2027 budget proposal**.**

General Revenue Assumptions:

- Increases in unrestricted local aid and Chapter 70 are applied based on the most recent information in the state budget;
- Standard Federal and State entitlement grants budget offsets are assumed to be funded at the same level as FY 2026;
- State Circuit Breaker program is assumed to be funded with a 75% reimbursement rate, which is the estimated rate based on the most recent information in the state budget.

- The full-day kindergarten tuition fee will remain at $2,500 next school year, though support is offered to those families who qualify for free and reduced lunch;

Salary Assumptions:

- Includes all step, lane, and longevity contractual increases to meet contractual obligations for current administration and support staff;
- Includes a reduction of $175,000 for anticipated savings for staff retirements, resignations, and attrition;

New Enrollment & Programmatic Driven Positions:

- New enrollment driven positions are included in the budget proposal to address shifts among grades in enrollment (includes 1.0 elementary grade 1 teacher) student support needs in the full day kindergarten program (includes restoration of the 3.0 FTE General paraprofessional support positions) and in specialized programs due to an increase in student enrollment resulting from new students moving into the district this school year (1.0 FTE Special Education Teacher).

Fixed Cost Assumptions:

- 6.5% increase in the assessment for the district from the Middlesex County Retirement System by the Town;
- 8% increase in health insurance costs;
- 3% increase in Regional School Assessment for North Reading students attending both the Northeast Metropolitan Regional Vocational School and Essex Technical High School;
- 3% Increase in Worker's Compensation and General Liability Insurance;
- 4% increase in School Medicare costs.

Special Education:

- Assumes the circuit breaker reimbursement amount received in FY26 for FY25 expenses. This amount of $2,155,710 will represent the FY27 budgetary offset amount. This is a significant increase from the prior year due to the extra-ordinary special education cost increases in out-of-district tuitions and transportation that occurred in FY' 2025. Assumes the circuit breaker program will continue to be funded fully at a 75% reimbursement rate and includes new funding proposed as part of the Student Opportunities Act, which now includes reimbursement for transportation costs;
- Assumes a 3.5% COLA increase in special education outside placements and transportation cost;
- Assumes $150,000 of out of district tuitions will be prepaid with FY 2026 year-end funds which is allowed per state finance regulations.

Other Expenses and Contractual Services:

- School expense budgets include adjustments due to inflationary increases and to ensure a funding level at above the five year per pupil funding average at each school.
- Utility budgets are projected on a three-to five-year trend analysis based on usage, pricing, and on rate and usage information that is known at this time.
- Known contractual increases have been applied to contractual services, including regular transportation, audit services, legal services, print and copy machine management services, and other human resources and student management software increases have also been applied;
- Continuation of preventative maintenance service contracts to maintain the four school campuses including HVAC, Energy Management Systems, lighting controls, and security equipment are included in the budget proposal;
- Contractual increases have been applied to the district operational maintenance and on-call labor contracts for the following trades: HVAC, Electrical, Plumbing, Heating and boiler maintenance, Roofing maintenance, Fire and alarm system monitoring, Elevator and lift maintenance, Fire and sprinkler system maintenance, and security equipment maintenance;
- Waste Water Treatment Plant operational costs to maintain the plan has shifted to a Town/School fixed expense given there are now both Town and School buildings operating through the waste water facility;
- Increases for other maintenance and grounds service agreements for landscaping, athletic field treatment, and snow removal services have been applied.

Revenue and Budget Offsets/Subsidies:

- The transportation revolving account offset will remain at $462,000, which assumes the district will have $150,000 of carry over funds available.
- The athletic revolving account offset is estimated to be $330,000 annually from revenue generated from user fees and gate receipts. This offset assumes the district will have up to $30,000 of carry over funds available and represents 40% of all athletic expenses and supports all the non-salary related athletic program expenses including transportation, trainer, game officials and workers, team supplies and equipment, ice, pool, tennis and other rental costs, dues and membership fees, and scouting and other software systems. The costs for the athletic director, secretary, and coaches' salaries, are supported in the general operating budget.
- The extra-curricular revolving account offset will be $80,000. The budget assumes this user fee will remain at $200 for Middle and High School students.
- The performing arts user fee that was introduced in FY 2024 at each level the budget assumes this remain the same, which is $200 per activity with a $1,000 family cap at the High School, and $150 per Activity with a $600 family cap at the Middle School, and $100 at the elementary level. This accounts for a total general fund budget offset of $46,000.
- The building rental offset will remain at $75,000; the proposed rental fee rate scheduled remains unchanged.
- The detailed assumptions of school revenue budget offsets used in the FY 2027 budget, including federal and state grant levels, are included in the budget document.

All federal and state entitlement grant awards are expected to remain the same as FY 2026.

Major Budget Drivers

Contractual Salary Obligations

Funds are included to meet all required contractual salary obligations for the district's professional and support staff. Personnel services and salary obligations represent 82% of the total FY' 2027 level services budget request. This includes cost of living increases, steps, lane movements, and longevity increases for all eligible staff. The unit B administrators, paraprofessionals, custodians, administrative assistants, and other non-union staff members' contracts are currently being negotiated for FY'2027 and beyond. A salary pool is included in the final budget proposal to reflect likely outcomes of these negations with these bargaining units based on market trends. The teachers' contract is settled through the end of fiscal year 2027. A turnover amount is also calculated and subtracted from the FY' 2027 total salary budget based on historical trend data. The turnover reduction takes into account anticipated retirements, resignations, and leaves of absences, which historically occur after the budget is approved but prior to the start of the school year. In the rare event that no unanticipated turnover is realized, the school department's personnel service budget request would be underfunded.

Special Education Costs

Funds needed to support anticipated out-of-district tuitions and transportation costs are expected to decrease in FY' 2027. The district anticipates the number of students requiring out-of-district placements and transportation in FY' 2027 will increase by four students from 46 students to a total of 50 students. Many of these students next year are anticipated to be placed in more affordable collaborative placements thus controlling the amount needed in the out-district-tuition line item. In addition, the circuit breaker reimbursement, which is a state funded program that reimburses districts for eligible special education transportation and tuition costs above a specific dollar threshold, will be significantly higher in FY'2027 allowing the district to shift a larger amount of expenses from the operating budget to this state reimbursement revolving account.

The district continues to evaluate its special education programs and, where appropriate, has reallocated current resources to provide additional student support services and increased social and emotional support. These programs assist with reducing the potential need for outside placements and special education services. Currently, 21% of our student population, including students being educated outside the district, receive special education services. The 21% statistic is right at the state average of 21%, which is reflected in the table below. The table below illustrates that North Reading students in outside placements have ranged anywhere between 28 to 46 students over the last six years, currently representing 1.0% of all students being placed in out-of-district programs, which is right at the current state average of 1.1%. The anticipated 46 students in out-district placements in FY' 2027 would represent the most students being educated outside the district over the past decade. In addition, currently 10.2% of students receiving special education services are educated

outside the District. Many Districts in the area have seen this number increase significantly, especially since the Covid-19 pandemic, to above 10%. The average of over 12 north-shore communities recently polled was 10%. In North Reading, special education costs account for 23% of all net school spending costs, which is also just about at the state average of 22%.

Academic Year	Total Oct. 1 In-District Enrollment	# of Students on IEP's	% of Students on IEP's	% of Students Statewide on IEP's	# of Students Out of District
2008-09	2,792	428	15.1%	17.1%	34
2009-10	2,735	426	15.3%	17.0%	42

2025-26	2,336	450	21%	21%	46
2026-27 Projected	2,326	450	21%	21%	50

Operational Building and Fixed Costs

The district ensures the operating budget includes the operational costs needed to adequately maintain all four school campuses. The District has identified more funds since FY' 2014 to account for these costs. In recent years, these costs have stabilized as the district has been able to control increases in its operational costs and implement energy efficient measures, including LED lighting fixtures and modulating its energy management heating and cooling systems. The district has also experienced a significant increase in its utility costs since FY' 2014, driven by an increase in electricity costs and the demands of the four school campuses. The district's utility costs have increased significantly in recent years, accounting for a larger portion of the school budget. Over the past two fiscal years, funds have also begun to level out, indicating that the district has been able to better control new increases in operational costs by taking on energy efficient measures, including retrofitting all fixtures with new LED lights in all buildings.

The cost of school bus transportation has increased significantly over the past ten years, with rising fuel costs, significant increases in the cost of equipment, and a shortage of qualified bus drivers, these costs have increased significantly. The district contracts with qualified

outside providers through a competitive bid process for it's regular, athletic, and extra-curricular transportation needs as well as for the majority of it out-of-district special education transportation needs. The district does perform all of it's in-district specialized transportation in-house, as well as, when appropriate, athletic and extra-curricular runs to reduce and manage these costs. In FY'2027 these costs are expected to continue to rise by 10% and are a significant driver of the FY'2027 budget proposal.

FY' 27 Budget Restoration Staffing Needs

The FY' 2027 final budget proposal includes staffing adjustments driven by enrollment at the elementary level and special education programmatic needs due to enrollment increases in specialized programs mostly the result of new students moving into the District. It also includes restoration of some of the FY' 2025 and 2026 staffing reductions considered a high priority for restoration by the Administration for next school year.

School /Dept.	FY' 27 Enrollment Needs	Amount	Enrollment Needs
Little School	1.0 FTE Elementary Teacher	$85,959	Grade 1 Enrollment Increase
Hood School	1.0 FTE Special Education Teacher	$82,459	Enrollment Increase in specialized programs
Elementary	3.0 FTE General Paraprofessional FDK	$112,908	Early childhood support needs
Total	**5.0 FTE**	**$281,326**	

School /Dept.	FY' 27 Restoration Priority	Amount	Impact
Middle School	1.0 Special Education	$85,959	Academic support needs especially in area of literacy
District	0.5 FTE Floater School Nurse	$42,500	Health and safety needs and new state mandates
Elementary/MS	1.5 FTE Academic Support Tutors	$74,998	Academic support needs especially in area of literacy/math
Total	**3.0 FTE**	**$203,457**	

Strategic Plan "NRPS 2030" Initiatives

The District continues to work towards achieving its strategic objectives in their Strategic plan known as "NRPS 2030" for continued educational improvements. Many of these initiatives have been deferred over the past several fiscal years due to fiscal constraints the community has faced.

The high priorities that would be included in the FY' 2027 final budget requests, should additional funds be identified, is illustrated in the table below. There are several other positions but the below request reflects the highest of priorities.

School /Dept.	NRPS: 2030 Needs	Amount	NRPS 2030 Strategy
Elementary	0.60 FTE School Adjustment Counselor	51,576	Student Support
District	1.0 Humanities Coordinator	114,897	Teaching & Learning
Total	**1.6 FTE**	**$166,473**	

In Year 2 of the strategic budget vision, the proposal as presented would result in an expenditure of $166,473 which would only account for an additional 0.4% increase to the budget proposal.

The 0.6 FTE School Adjustment Counselor at the elementary level will allow for a designated adjustment counselor at each Elementary School. Currently, there is a designated adjustment counselor at the Batchelder Elementary School and a shared adjustment counselor at the Hood and Little Elementary Schools. The elementary schools will continue to work towards implementing a multi-tiered system of support known as MTSS. In addition to targeting reading, the elementary principals will also continue the work associated with social, emotional, and behavioral interventions as part of MTSS. This FTE increase will be instrumental in addressing student mental health needs and wellness. The role of School Adjustment Counselor is an extremely impactful one at the elementary level. This position allows not only for responsive services but is key in developing programs that are proactive rather than reactive. These positions are essential in addressing the social emotional needs of all students.

The Humanities Coordinator is a pivotal administrative role designed to drive academic excellence and K-12 systemic alignment across the district. By bridging the gap between high-level NRPS 2030 goals, this position ensures that curriculum, instruction, and assessment are not only compliant but high-performing similar to the existing STEM Coordinator position. The Humanities Coordinator will have oversight and evaluation of Humanities faculty and will provide coaching and mentoring to support continuous improvement in both English Language Arts and History of Social Sciences. Actively identifying and securing external grant funding to offset departmental costs and pilot innovative literacy and social studies will be another key aspect of this position.

Budget Priorities

Below is a list of key budget priorities that the Administration and the School Committee focused on in the development of the FY 2027 budget.

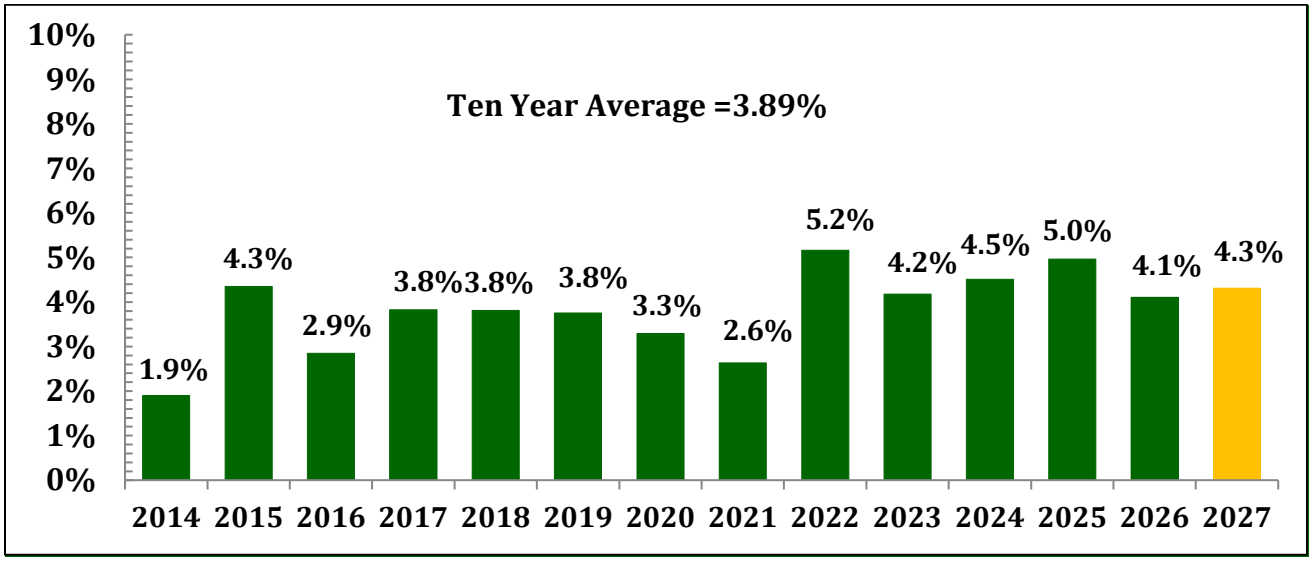

- Approve a Fiscal Year 2027 (FY27) budget that adequately meets district requirements for optimum student achievement in alignment with NRPS 2030.

- Continue to explore opportunities to reduce operational costs including energy savings by pursuing solar power, boiler upgrades, WWTP efficiencies, energy management modulation, etc.
- Support the development of the plan to reduce the Kindergarten fees leading toward the eventual goal of providing free Full Day Kindergarten and will explore the next steps to increase access to Universal Free Day Pre-K.
- Develop strategies to restore and preserve positions and educational support systems that were eliminated or reduced in FY'2025 and FY' 2026 while also continuing to move the district forward in alignment with NRPS 2030.
- Continue to collaborate with representatives of the Select Board, Finance Committee, the Town Administrator, and the town's Director of Finance.

The "modified level services" budget represents the funding required to maintain the same level of services in FY' 2027, while restoring some of the key academic support systems that were lost with the FY'2025/26 budget reductions, while achieving a small portion of District's strategic plan initiatives to address mental health support and the needs for curriculum alignment and leadership.

It is important to note that the North Reading Public Schools experienced moderate budget increases in the past. This has required the use of several one-time funds and revenue sources making it not feasible to maintain level services and achieve the educational objectives of the district that past few years. The operating budget history charted below illustrates the budget increases over the last several fiscal years during these challenging economic times.

Fiscal Year	Budget Amount	% Budget Increase
FY 2010	$22,802,875	1.90%
FY 2011	$23,143,886	1.50%
FY 2012	$24,021,751	3.79%
FY 2013	$25,169,692	4.78%
FY 2014	$25,648,524	1.90%
FY 2015	$26,764,015	4.40%
FY 2016	$27,495,074	2.73%
FY 2017	$28,546,142	3.80%
FY 2018	$29,633,545	3.80%
FY 2019	$30,746,047	3.80%
FY 2020	$31,757,773	3.29%
FY 2021	$32,593,216	2.60%
FY 2022	$34,276,665	5.20%
FY 2023	$35,709,330	4.20%
FY 2024	$37,319,595	4.50%
FY 2025	$39,171,970	5.00%
FY 2026	$40,780,049	4.10%
FY 2027	$42,537,423	4.31$

Budget Recommendation

The Administration recommends support of the FY' 2027 final budget. This budget will allow the district to maintain level services, restore some of the key positions and support systems reduced in recent years, and address a portion of the district's strategic objectives in these difficult economic times, as well as during periods of high fixed costs and contractual increases.

The FY' 2027 budget will allow the District to meet all contractual obligations with employees and employee unions, as well as address fixed operational cost increases to successfully operate and maintain all four-school campuses. It continues to address the need to maintain educationally sound class sizes at all grades, and achieves steps towards enhancing academic support and mental health support systems.

Adoption of the budget, will (1) provide the resources needed to maintain the school districts educational program; (2) provide an educationally sound program for all students; (3) enhance the mental health and academic support systems necessary for all students; and (4) uphold the vision and mission of North Reading Public Schools.

The annual budget is the financial framework of the educational program needs of the North Reading School Department. The budget is more than just a financial instrument and requires an orderly and cooperative effort on the part of the School Committee, the staff, and the community to ensure sound fiscal practices for achieving the educational goals and objectives of North Reading Public Schools.

A major portion of the income for the operation of the public schools is derived from local property taxes, and the North Reading School Committee will attempt to protect the valid interest of the taxpayers. However, the first priority in the development of our annual budget is the educational welfare of the children in our schools.

It is the intention of this School Committee to work closely with the Finance Planning Team as early as possible in the budget process to ensure that the final town budget submitted at the Town Meeting reflects funds needed to comply with state educational requirements and brings education in North Reading to a higher level of excellence.

As a trustee of local, state, and federal funds allocated for use in public education, the North Reading School Committee will fulfill its responsibility to see that these funds are used wisely for the purposes to which they are allocated.

Public school budgeting is regulated and controlled by federal and state legislation, state regulations, and local School Committee requirements. An operating budget representing the School Committee's best judgment of needs for the North Reading School System will be prepared and presented to the Town Administrator in a timely fashion.

The Superintendent will serve as budget officer and have overall responsibility for budget preparation, including the construction of and adherence to a budget calendar that conforms to the schedule set forth in the Town Charter. However, he may delegate portions of this responsibility to members of his staff as he deems appropriate. The three areas of responsibility for the Superintendent as budget officer will be budget preparation, budget presentation, and budget administration.

The operating budget consists of two components: personnel services and expenses. Personnel services (salaries) accounts for approximately 84.0% of the FY 2027 recommended budget. Actual class organization and staffing and enrollment data is gathered on October 1 of each year. Enrollment projections are generated based on the current year counts and historical data and trends. (Charts detailing trends in both enrollment and the budget are included in this analysis section of the budget book). In early October, budget leaders receive the enrollment projections and detailed historical expense data specific to their programs along with the School Committees' budget goals. During late November and December, central office administrators conduct a series of meetings with Directors and School Principals to review and discuss budget requests and potential cost saving measures. The Superintendent, using input from the administrative team, determines the appropriate allocation of resources across the schools. The Superintendent presents the

preliminary budget recommendation to the School Committee in March. The School Committee, working through its subcommittees, reviews the budget for the elementary, middle school and high school programs during late March. In early April, the School Committee holds public meetings to report on the subcommittee meetings and to hear public input. The school committee will vote on the FY 2027 budget no later than May 1, 2026.

FY 2027 School Committee Budget Goals

1. Approve a Fiscal Year 2027 (FY27) budget that reflects support of the district's strategic plan, NRPS 2030, and other strategic initiatives;

2. Continue to explore new opportunities to reduce expenses associated with energy costs (e.g. solar power)

3. Continue to support the development of the plan to reduce the kindergarten fees leading toward the eventual goal of providing free Full Day Kindergarten and will explore the next steps to increase access to Universal Free Day Pre-K;

4. Continue to review the current structure of user fees for extra-curricular and athletic activities and its impact on families;

5. Develop strategies to restore and preserve positions and educational support systems that were eliminated or reduced in FY'2025 and FY'2026 while also continuing to move the district forward in alignment with NRPS 2030;

6. Review all aspects of school transportation including the bus fees, contracts and rates, the process for route design, and emerging topics such as the electric school bus pilot. The Superintendent will prepare a presentation on this topic for the committee;

7. Continue to collaborate with representatives of the Select Board, Finance Committee, the Town Administrator, and the town's Director of Finance to discuss potential changes to the budget development calendar as a goal with having a revenue guideline budget amount earlier in the process.

June 8, 2026	**Town Meeting votes budget**

The personnel services component of the budget includes salaries for all staff. Full time equivalency (FTE) is tracked for all regular employees but not for on-call or temporary employees such as substitute teachers or coaches.

It is important to note that the definition of a 1.0 FTE varies with positions as defined in collective bargaining agreements. In order to calculate the personnel services budget request, staffing needs must be calculated first. Professional staffing needs are determined based on enrollment projections and professional staffing guidelines. Unless otherwise known, it is assumed that all current staff will be returning to work for the next school year. Using the current year staff as a base, the personnel service budget request is generated as follows:

1. All employees not at the maximum step are advanced one step.
2. Collective bargaining increases are applied to the salary table. During those years when a contract is in negotiation, a projected increase is applied to the salary table, when appropriate. By contract, teachers and professional support staff advance to a higher educational level during the following school year after providing satisfactory evidence that they have met all degree requirements. Historically, there have been twelve to fifteen teachers who have met this criteria. The cost impact is calculated and is included in the teacher salary budget request.
3. Longevity stipends are added and adjusted for those employees who qualify.
4. Staff changes based on enrollment are calculated. For teachers and professional support staff, these positions are budgeted at an average salary, typically Masters Step 6.
5. Salaries for staff known to be retiring or taking a leave of absence are deleted and replaced with the average salary noted above.
6. Salaries for substitute teachers, coaches, extra-curricular club advisors, professional development workshops, stipends, etc., are determined.
7. A turnover reduction is determined. The turnover reduction takes into account the anticipated retirements, resignations and/or leaves of absence, which historically occur after the budget is approved, but prior to the start of the school year. In the rare event that no unanticipated turnover is realized, the school department's personnel service budget request would be underfunded.

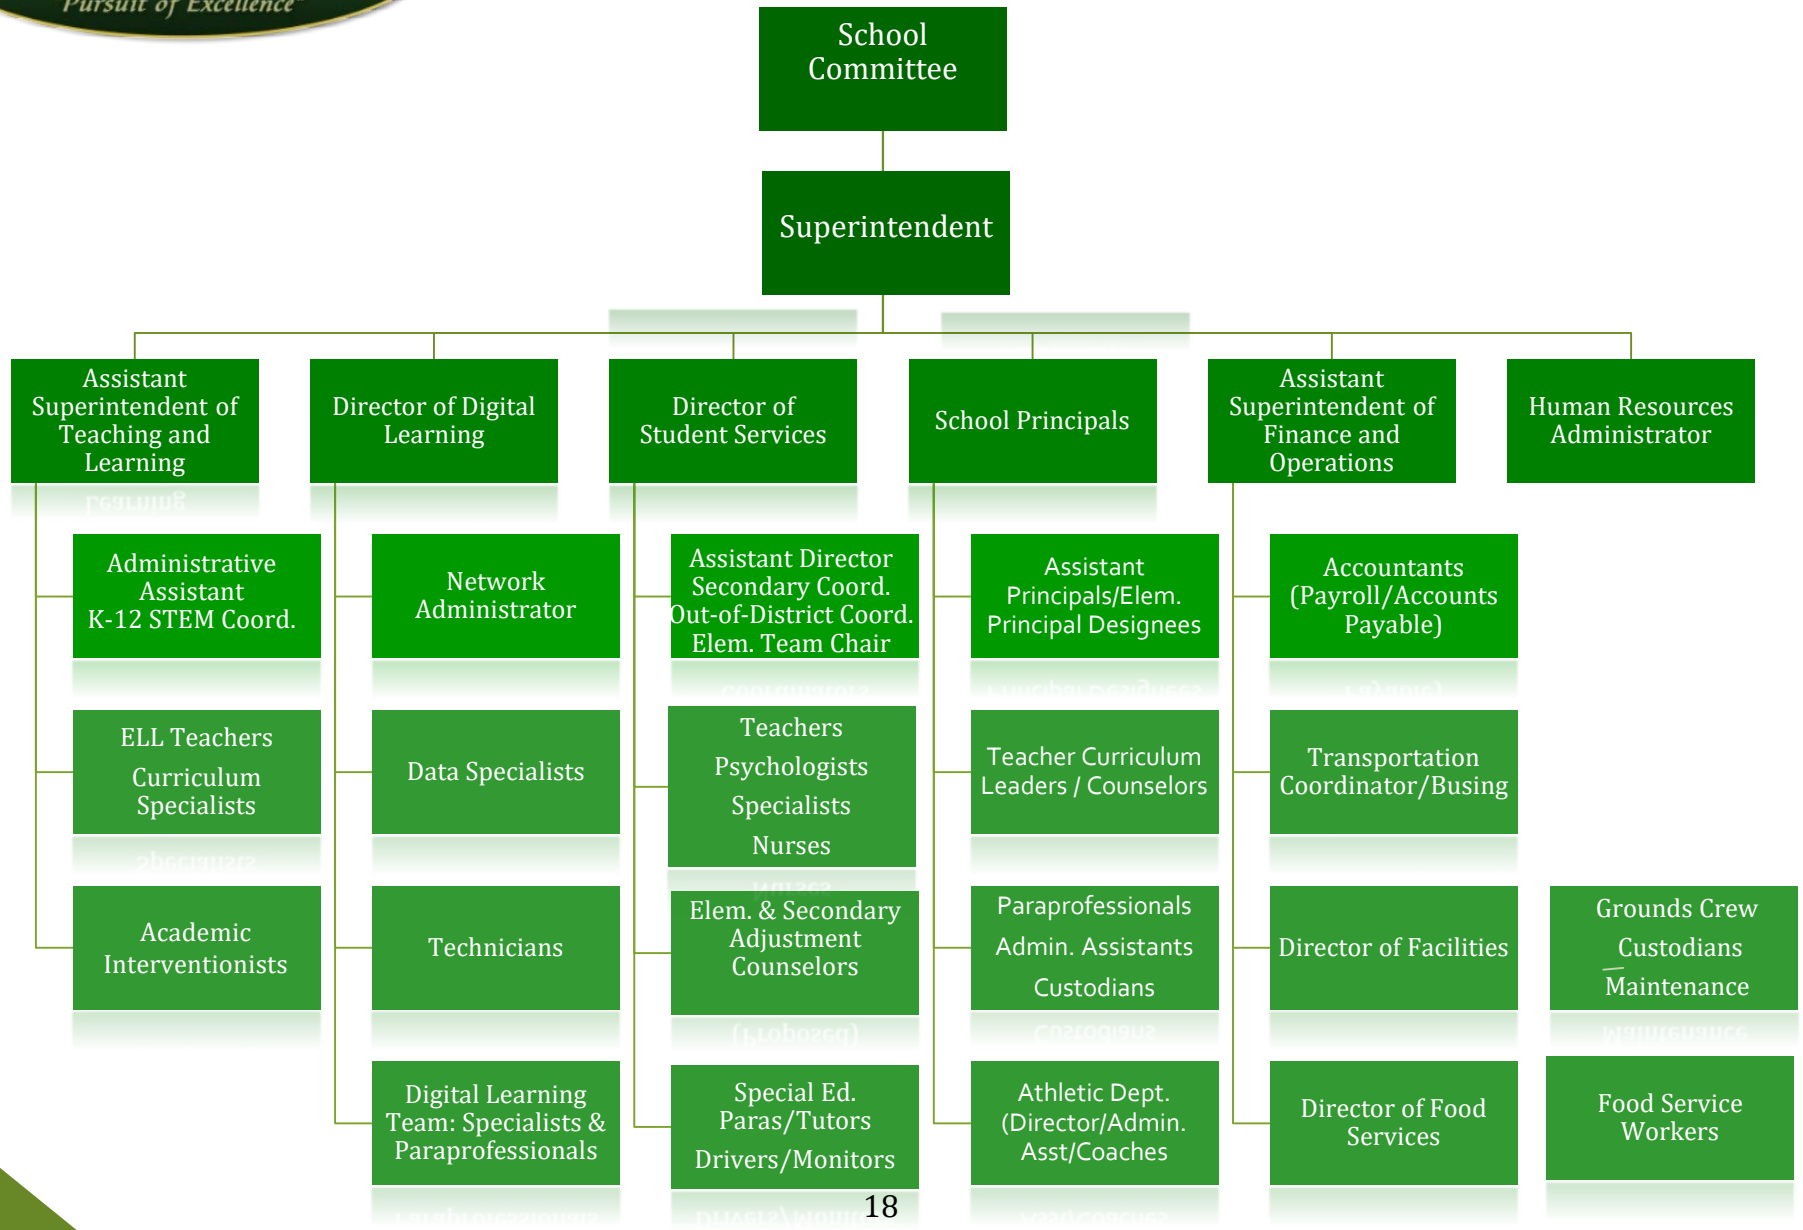

It is helpful to keep in mind that North Reading's teacher's salary scale, like that of all public schools in the Commonwealth and in the country, is based on a step system where salary increases are based on years of service and educational attainment beyond the bachelor's degree. The FY26 teachers' salary scale and a chart detailing the headcount of current staff by lane and step are included in this budget book. The FY27 salary scale is also included.

The FY27 personnel service operating budget recommendation funds a variety of positions that are funded through grant and revolving accounts. Based on current staffing and projected increases, this represents 420 full time and part-time employees covered in the

operating budget. On-call and temporary employees are included in the dollar amount but not in the total FTE or headcount.

Principals and budget leaders build their expense budgets from the bottom up. This means no automatic increases are given or assumed. Each Budget leader must provide detailed support for their budget requests. In addition to the instructional expense budgets, adjustments are made based on information known at the time for special education out-of–district tuitions, special education transportation, regular transportation, and utilities budget. Utilities budgets are built based on projected usage over a three year average and adjustments are made based on anticipated market fluctuations.

THE PROGRESSION RATE METHOD

The basic assumption of the progression rate method for predicting school enrollments is that what has happened in the past, will continue to happen in the future; that is, given the number of births, the net effect of all other influences on enrollment will remain proportionately the same. The basic technique requires calculating the ratio of the number of children in one grade in one year compared to the number of children who "progress" the year and enroll in the next grade the following year. Fluctuations in such data from year to year create a pattern from which an average progression rate can be calculated to project an enrollment. Percentages are calculated from the historical enrollment data to determine a reliable percentage of increase or decrease in enrollment between any two grades. For example, if 100 students enrolled in Grade 1 in 2024-25, increased to 104 students in Grade 2 in 2025-26, the percentage of progression would have been 104% or a ratio of 1.04. Such ratios are calculated between each pair of grades or years in school over several years.

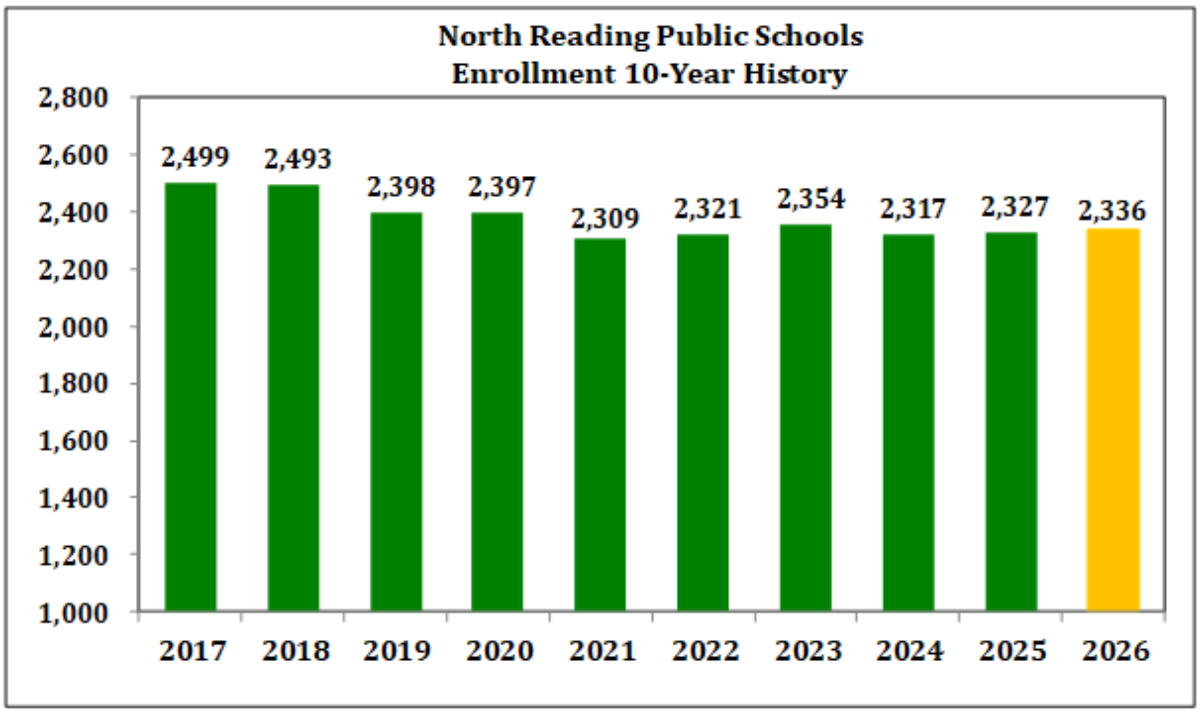

The data used to calculate this information includes birth records, census information, housing developments, real-estate market data and area private school enrollments. We find that we can predict the upcoming year's totals typically within a 1% variance. A progression rate method was calculated using a 3-year, 5-year, and 10-year historical database. Because North Reading is inward migration and birth have been stable and consistent, the ten-year calculation is generally considered more reliable.

Enrollment Report

The enrollment report includes actual student enrollment from the 1949-50 School Year through 10/01/2025, and a projection of enrollment through June 30, 2036. As depicted in the chart below. North Reading's total student enrollment has been cyclical. In the early fifties' enrollment grew quickly from 900 to 1,841 students. The 1960's saw the numbers rise to 3,217. In the 1970's enrollment grew as high as 3,461. Then in the 1980's enrollment decreased to 1,926 only to rise again during the 1990's, peaking at 2,319. The period since then has seen a growth back to 2,812 in 2008 with a steady decline since then. Currently, student enrollment stands at 2,336.

Historical enrollment over the last ten years has remained relatively stable as the below chart indicates. Enrollment was at about 2,500 students in fiscal year 2017 and has slowly declined over the last several years by 164 students from 2,499 students in fiscal year 2016 to a current total in fiscal year 2026 of 2,336 students.

There are two factors at work, which will have the greatest impact on future enrollments: 1. A steady number of births to North Reading residents and, 2. New in-migration of families with school age children. North Reading has experienced between 130 and 171 births annually over the last several years as shown in the chart below, a range that is expected to continue over the next 6 to 7 years, this will allow North Reading to continue to average approximately, 156 births per year.

Birth Time Period	# Births
Sept. 1, 2015–Aug. 31, 2016 (FY' 22)	151
Sept. 1, 2016-Aug. 31, 2017 (FY' 23)	171
Sept. 1, 2017-Aug. 31, 2018 (FY' 24)	132
Sept. 1, 2018-Aug. 31, 2019 (FY' 25)	170
Sept. 1, 2019-Aug. 31, 2020 (FY' 26)	169
Sept. 1, 2020-Aug. 31, 2021 (FY' 27) Next Year's Kindergarten Class	153
Sept. 1, 2021-Aug. 31, 2022 (FY' 28)	138
Sept. 1, 2022-Aug. 31, 2023 (FY' 29)	151
Sept. 1, 2023-Aug. 31, 2024 (FY' 30)	158
Sept. 1, 2024-Aug. 31, 2025 (FY' 31)	160
Average	**155**

North Reading, over the past five years, has registered on average about 116 kindergarteners for every 100 births (five years previous), a relationship that has remained steady for many years with a few outlier years. This fall, the ratio was much lower than the average at 108 kindergarteners for every 100 births, proving that it is difficult to predict the trend of in and out migration of families with school age children. This is the one of the lowest ratios over the past twenty years of births to students at the kindergarten level. Proposed or planned residential development and/or turnover of homes in North Reading can influence the cohort numbers. There is one major housing development plan located on Elem Street that could bring a surge of households with school age children to North Reading, this development could have an impact on these projections in the outer years once units start to come online. The report attempts to adjust the projected kindergarten enrollments to reflect typical incoming enrollments and to include a prediction of an increase in families with school age children based on market trends. Relying solely on birth rates five years earlier is not always accurate. Grade 1 is expected to remain between 3% and 5% larger than the previous year's Kindergarten class, which is the ten-year average.

The high school had typically experienced a consistent loss of between 12-14% of students enrolling in grade 9 at the end of Grade 8. However, that trend in the years following the new Middle/High School when it only experienced a loss between 4-7%. However, recent trends show this trend has returned to approx. 12% on average, with it being at 8% this past year. High School enrollment is anticipated to stay relatively consistent at about 630 to 640 students over the next five years before experiencing an increase again.

Over the next three years, K-5 enrollments are forecasted to decrease slightly by 30 students in the three-year period. However, new developments and changes to the tuition-based kindergarten program and PreK tuitions-based programs would have a significant impact on these projections.

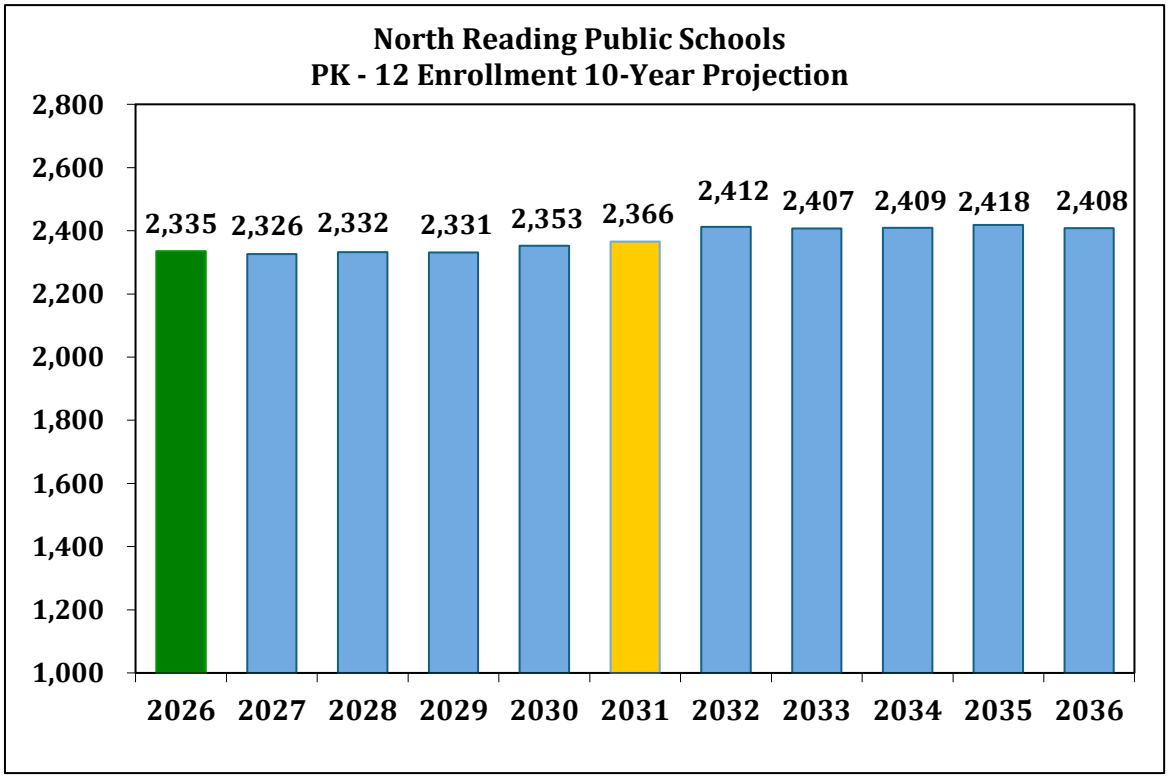

Middle School enrollment will experience a steady increase of 43 students as some larger class sizes make their way from the elementary schools to the middle school.
After that point, over the next five-year period projections show district wide enrollment will begin to steadily increase again from approximately 2,330 students to 2,365 students in grades Pre-kindergarten through grade 12, with about 1,140 at the elementary level, 570 at the Middle School, and 640 at the high school. The projections indicate that as the real estate market continues to increase, it will continue to bring additional new families to North Reading, if the real estate market slows down or is impacted by an economic recession it would have an impact of these projections in the outer years.

History of Enrollment Projections vs. Actuals

You may wonder how enrollments projections have compared to our actual enrollment over the last several years. The chart below indicates that our historical projections using this method have typically been within 1% of actual enrollment. The variance this past year in October 2025 was less than 1%.

FISCAL YEAR	2020	2021	2022	2023	2024	2025	2026
PROJECTION	2,392	2,357	2,299	2,356	2,351	2,377	2,337
ACTUAL	2,397	2,309	2,321	2,354	2,317	2,327	2,336
CHANGE (Actual-Projection)	5	-48	22	-2	-34	-50	+1

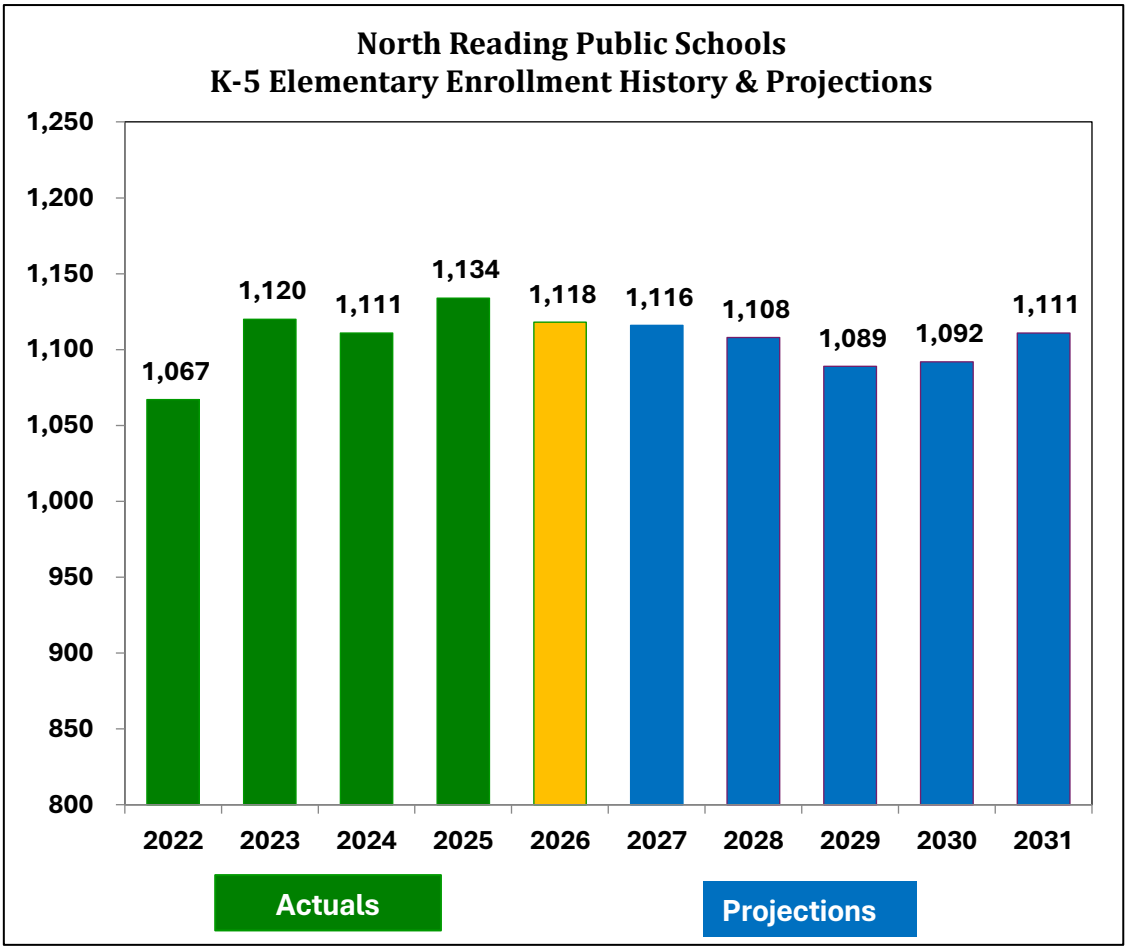

Districtwide enrollment depicted in the graph below is expected to increase over the next five to ten years. In fiscal year, 2031 highlighted below enrollment could reach 2,365 students and could exceed 2,400 students by 2032 again. However, one should realize that it is very likely these patterns will not last as long as ten years. Enrollment projections are most accurate in the early years and are less reliable more than three and five years into the future. The economy, real-estate market, and timeline of developments in town will all have an impact on the projections in the outer years.

Evidence suggest that the real estate market continues to improve. During the period of 2013-2018, many communities in the region sold only about 60-80% as many homes as in 2008-2013. In the case of North Reading, recent trends show an increase in the number of single-family homes sold in recent years. During the period of 2013-15, and average of 125 homes were sold. However, sales have rebounded to 159 homes sold in 2016, 161 in 2017, and 162 in 2018. Most recently, North Reading sold 201 homes in 2019, 221 in 2020 and 276 homes were sold in 2021. This is a significant increase than the previous three-year period. This trend indicates an increase in new families with school age children in North Reading and we have begun to see this trend influence the enrollment projections. As single-family home prices, continue to reach a ten-year high, more "Baby Boomers" who have been waiting to downsize, have been encouraged to place their homes on the market. Evidence suggests that young families are moving into North Reading. As additional families move in, previous forecasted enrollment declines have changed and enrollment projections is now indicating an increase. The increase could be even more significantly, in the outer years if the real estate, market continues to improve and recent developments planned in town come on-line. There is also planned developments in North Reading including single-family home developments and age 55 plus affordable housing units that are anticipated to come on-line over the next two to three years, which will have an impact of these projections in the outer years.

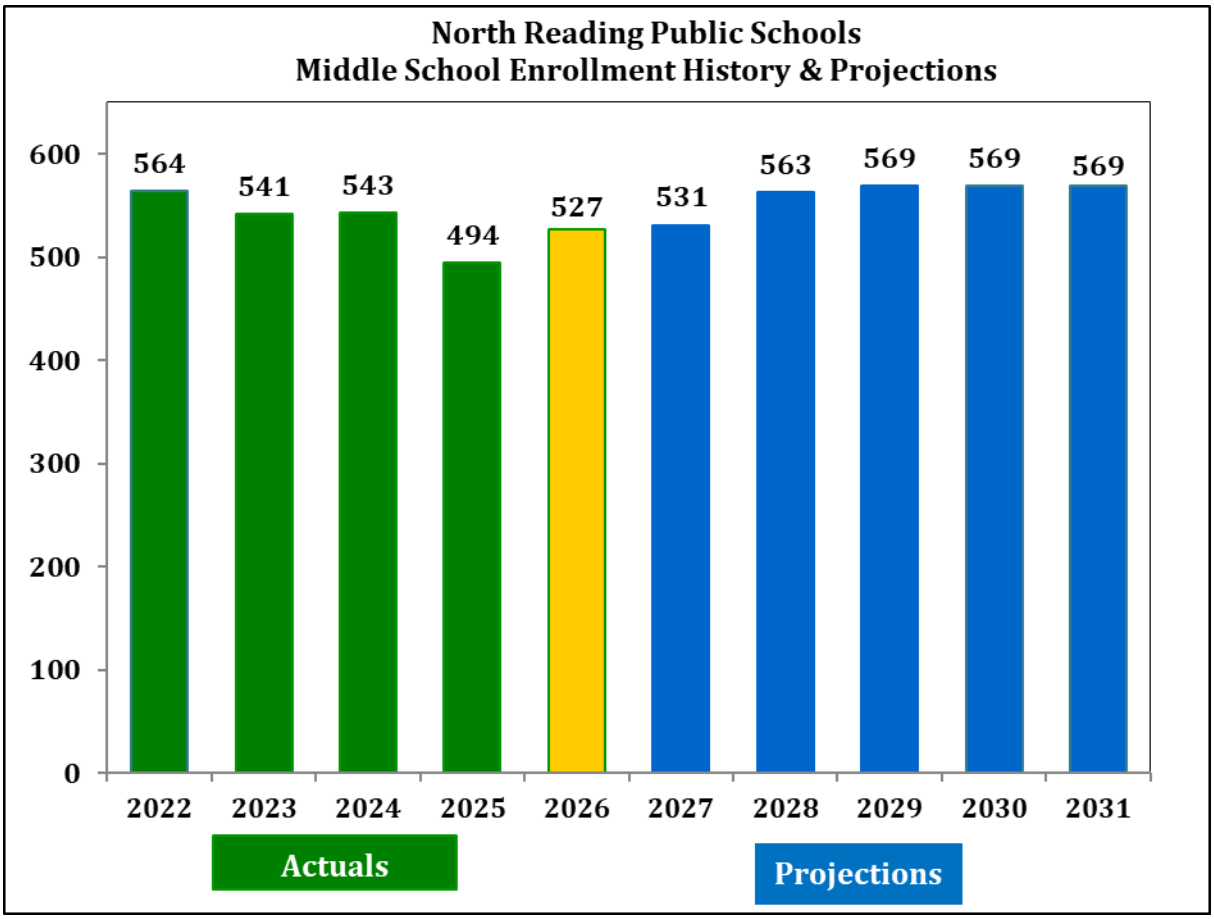

Projected Enrollment in Grade Combinations						
Year	**PK-5**	**K-5**	**6-8**	**9-12**	**K-12**	**PK -12**
2025-26 Actual	1,169	1,117	527	640	2,284	2,336
2026-27 Projected	1,166	1,116	531	629	2,276	2,326
2027-28 Projected	1,158	1,108	563	611	2,282	2,332
2026-27 Projected	1,141	1,089	569	621	2,279	2,331
2028-29 Projected	1,144	1,092	569	640	2,301	2,353
2029-30 Projected	1,163	1,111	569	634	2,314	2,366
2030-31 Projected	1,168	1,116	558	686	2,360	2,412
2031-32 Projected	1,173	1,120	555	679	2,354	2,407
2032-33 Projected	1,194	1,140	547	668	2,355	2,409
2033-34 Projected	1,199	1,145	538	681	2,364	2,418
2034-35 Projected	1,198	1,144	545	665	2,354	2,408

The above chart shows projected in grade combinations over the next ten years. All projections are most reliable in the first five years and less reliable in years six through ten. Over the next three years, K-5 enrollments are forecasted to remain steady at about 1,100 declining by only 28 students before experiencing another increase. Most of the decrease can be contributed to lower anticipated kindergarten classes due to lower birth rates and the larger cohorts of students are expected to move through the elementary grades and on to the Middle School. Grades 6-8 is expected to increase by 42 students over the next three years increasing to 569 students before experiencing another decrease in enrollment. The high school enrollment is expected to remain steady over the next three years, before leveling out at about 650 students on average. Moving forward these projections show a moderate increase in enrollment.

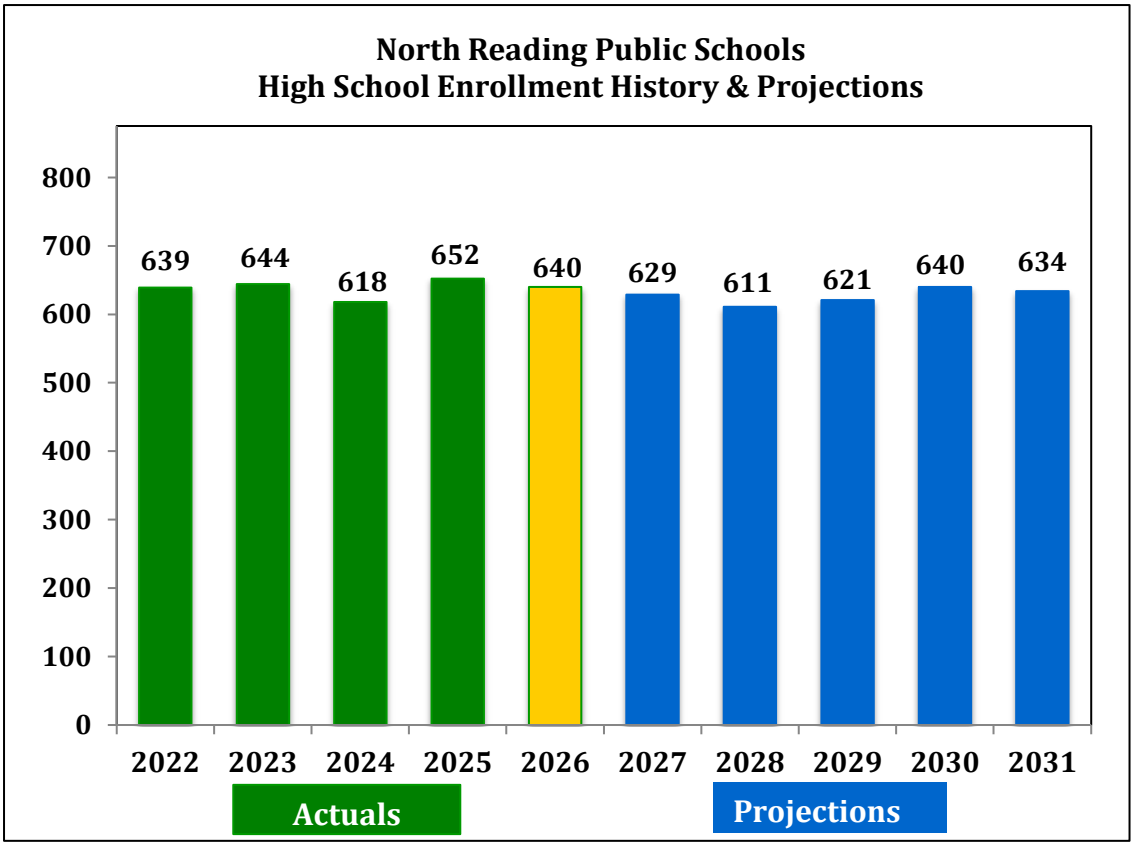

School Year	K	1.0	2.0	3.0	4.0	5.0	Total K-5
2025-26 Actual	183	175	188	201	180	191	1,118
2026-27 Projection	177	191	176	188	204	180	1,116
2027-28 Projection	160	184	192	176	191	205	1,108
2028-29 Projection	175	167	185	192	179	191	1,089
2029-30 Projection	183	182	168	185	195	179	1,092
2030-31 Projection	186	191	183	168	188	195	1,111

Elementary enrollment (K-5), next school year is projected to decrease by 2 student's system-wide. As you can see from the table below, Kindergarten enrollment is anticipated to decrease by 6 students, which can be contributed to a lower birth rate statistic from five years earlier but kindergarten enrollment can be very difficult to predict. Given total enrollment is expected to remain about the same no additional staffing is expected next year.

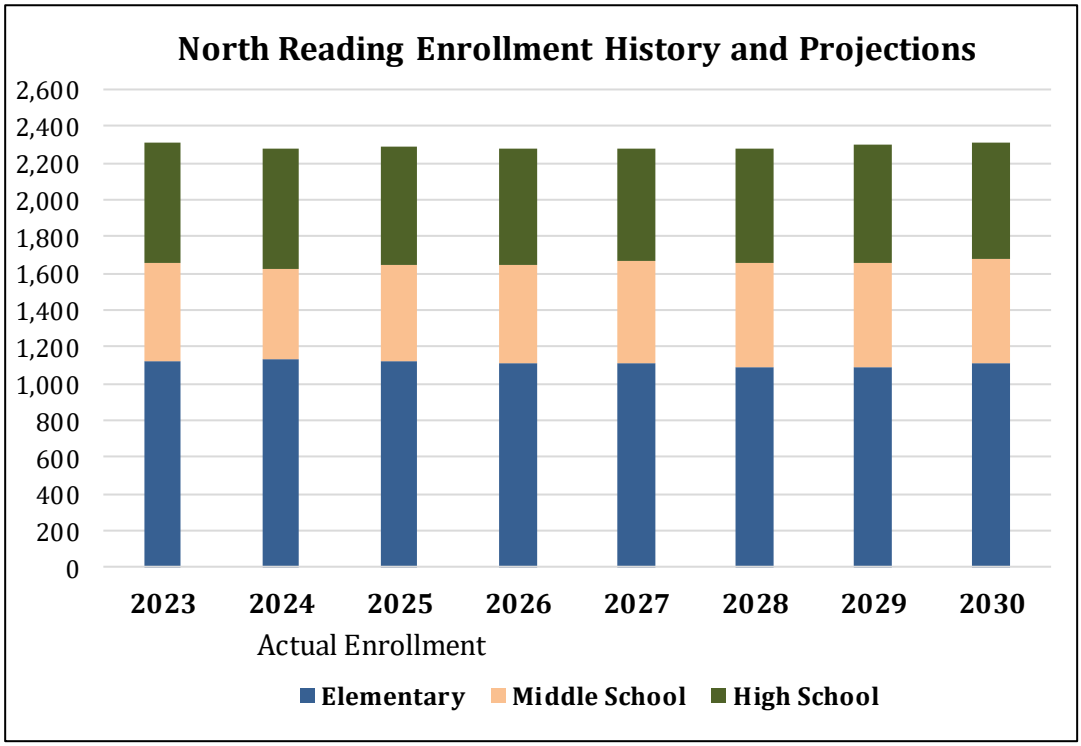

School Year	6	7	8	Total 6-8
2025-26 Actual	197	144	186	527
2026-27 Projection	189	195	147	531
2027-28 Projection	178	187	198	563
2028-29 Projection	203	176	190	569
2029-30 Projection	189	201	179	569
2030-31 Projection	177	187	205	569

Middle School enrollment is expected to increase by 4 students next school year. Over the next three years it is anticipated that grades 6-8 will increase by (42) total students. As you can see by the above chart, long-term enrollment projections indicate the middle school enrollment experience an increase and level out at about 569 students. Additional staffing may be necessary at the middle school to address changes in enrollment.

School Year	9	10	11	12	Ungraded	Total 9-12
2025-26 Actual	152	167	147	167	7	640
2026-27 Projection	167	151	165	146	0	629
2027-28 Projection	132	166	149	164	0	611
2028-29 Projection	178	131	164	148	0	621
2029-30 Projection	171	177	129	163	0	640
2030-31 Projection	161	170	175	128	0	634

High School enrollment is expected to experience a decrease in enrollment next year by 11 students and is then expected to remain steady at about 630 students over the next five years. No additional staffing should be necessary at the high school to address changes in enrollment.

As the projections indicate above, the biggest enrollment shifts will take place at the Middle School over the next five years, as larger elementary class sizes work their way into the Middle School. The elementary level will see a modest decrease in enrollment due to larger classes working their way to the Middle School and higher birth rates resulting in more Kindergarten students. The high school will experience stable enrollment over the next three years.

Section 5

Revenue Sources & Budget Subsidies

Several outside funding sources are used to offset the cost of the operating budget. These include federal and state grants, revolving accounts, and fees. Grant funds are used to offset the salary of professional or support staff, either partially or wholly and also to offset program expenses. Revolving accounts are used to offset costs, either personnel services and/or expenses directly associated with the program, while fees are assessed for a specific purpose.

Federal and State Grants

Annually, when building the budget, if there is no available information indicating federal and state grant changes, the assumption is made that current year grant funding will remain at the same level for the following year. Beginning in FY '03, all entitlement grants were folded into the No Child Left Behind legislation which has much more restrictive criteria as to how funds can be spent.

Title IIA Improving Teacher Quality

This is one of the grants created by the No Child Left Behind Legislation. In FY' 26, the funds were used to provide professional development opportunities, and fund payments to staff mentors for working with North Reading's new teachers. The FY' 27 budget assumes the grant will continue to fund the mentor program and professional development opportunities.

Federal Special Education IDEA Entitlement

This federal entitlement grant is used to fund special education paraprofessional support staff, student support services and transportation services to provide transportation for students in our special education program. In FY' 26, this grant funded 4.5 FTE paraprofessional positions, which provided a salary budget offset of $115,000. It also funded $375,000 of special education transportation services and an additional $100,000 of direct student support services. The FY' 27 budget assumes this grant will fund the same positions, transportation and student support services.

Title 1

This is also a federal entitlement grant, which has been used to fund consultant and tutoring services to students requiring additional support at our Title 1 schools: the Hood, Little, and Middle School. The FY' 27 budget assumes the grant will fund these same services.

Early Childhood – Special Education Allocation

This grant is a federal entitlement grant that funds .60 FTE of preschool paraprofessional positions providing a $17,000 salary budget offset. The FY' 27 budget assumes the grant will fund the same position.

FY' 2027 budget assumes the same funding level as FY 2026. **These grants are not annual entitlement grants. There is no guarantee they will be funded annually.*

Revolving Accounts

Facility Rental

Surplus space in the district is used for rental to outside groups and organizations. Surplus space at the Batchelder School, Hood School, and Little School is rented to the Burbank YMCA for their afterschool program. Funds collected are used to purchase needed maintenance supplies and materials across the district to maintain the school buildings. These funds are also used to offset the overhead costs of the afterschool programs and to maintain, replace, and refurbish equipment and facilities in rented space. This account is also used to offset the funds needed for operations and maintenance of the rented buildings including electrical, plumbing, security surveillance,

and HVAC services. The FY' 27 budget includes a $75,000 budgeted offset to the maintenance and grounds budget. The School Committee reviews their facility rental fee schedule on an annual basis as part of the budget process.

Food Services

The primary purpose of the program is to offer nutritious meals to all students at all schools every school day. Secondary goals are to raise and maintain student participation (sales) and pay employees fairly, while keeping prices at reasonable levels. The goal of the program is to be financially self-supporting to the extent that revenue supports the cost of all food items and cafeteria salaries. Revenues are generated from student/faculty sales as well as free/reduced federal reimbursements. As of this date, revenue is sufficient to cover food service expenses. Any shortfall in revenues needs to be funded through the school district operating budget. Universal free meals have been extended to all students since FY '21 and that trend is expected to continue in FY' 27. The additional revenue has helped the District invest back into the program with new equipment and more staff, including a Regional Dietician to assist with menu development, nutrition, and specific diet needs from parents.

Transportation

Bus privileges are provided free of charge to the following populations in accordance with state regulations: students in grades K-6 who live more than 2 miles from their school and students whose Individual Education Plan (IEP) include free busing. Students who do not meet these criteria may opt to purchase a bus pass from the district. The revenue generated from the bus user fee is deposited into a revolving account and helps defray the cost of the necessary buses for the optional busing program. The district currently operates 12 regular school buses daily, and collects, on average, $255,000 to offset the cost of those buses through the optional busing program. The FY' 2026 user fee is $550 for an individual pass and $900 per family. Contract bus cost rates accessed to the District continue to increase on an annual basis and a large 10% increase will occur in fiscal year 2027. The District also offers two late buses at the Middle School three days a week at a user fee of $100 per student. The revenue currently accounts for only 32% of the total costs of the regular transportation program, which has decreased considerably in recent years where it used to be closer to 50%.

Athletics/Activities

A user fee of $450 per athlete for each sport with a family cap of $1,600 is collected each season for students to participate in athletics. Revenue generated from user fees and gate receipts are deposited into the athletic revolving account. This revenue currently helps offset the cost of all athletic non-salary expenses including the cost of equipment, supplies, game officials and workers, athletic trainers, transportation, ice, pool, tennis rental and other dues and miscellaneous expenses. Currently, revenue collected provides an annual $340,000 budget subsidy for all athletic expenses. This accounts for about 40% of the total cost to operate the athletic program at the High School. A one-time annual fee of $200 is also assessed per student for a variety of student clubs and activities at the High School and Middle School. The revenue generated from the user fee also helps offset the costs of student club advisor stipends, which are paid on a salary schedule as

part of the contractual teacher's agreement. All fees collected are generally expended during the fiscal year in which they are assessed. Currently, revenue collected provides an annual $70,000 budget subsidy for all extra-curricular expenses. This accounts for about 55% of the total cost to operate the extra-curricular activities at the High School and Middle School.

Performing Arts

The Performing Arts extra-curricular user fees are as follows: At North Reading High School the user fee is $200 per activity, with a family cap of $1,000. At North Reading Middle School the user fee is $150 per activity, with a family cap of $600. Funds generated from these participation fees are deposited into performing arts revolving accounts and directly offset expenses associated with these activities, which include advisor stipends, set materials, props, costumes, etc. Currently, revenue collected provides an annual $26,000 budget subsidy for performing arts related expenses.

Below is a summary of the existing school department revolving account on the general ledger, and their FY '26 end-of-year balances.

Revolving Account Description	FY 25 Carry Over	FY 26 Estimated Revenue	FY 26 Estimated Expenses	FY 26 Estimated Year End Balance

Revenue All Sources

North Reading Town Administration and elected officials work closely with the North Reading School Administration and School Committee throughout the budget process to identify the available funds for both Town and School operating budgets. Like many other towns in the area, the majority of North Reading's revenue sources comes from local property taxes. Other sources of revenue include state aid consisting of unrestricted local government aid and Chapter 70 educational aid, as well as local receipts. Local receipts are revenue earned from various fees associated with licenses, permits, fines and meals and excise taxes. Fixed costs, which includes costs for health insurance, retirement, medicare, life insurance, worker's compensation, snow and ice costs are subtracted from the anticipated available revenue to determine the available funds that remain to fund operating budgets. Other revenue that helps fund both school and town budgets include other subsidies from revenue generated from user fees, tuitions, and federal and state grants as depicted in the table and graph below. The revenue plan breakdown for FY' 27 is shown below.

Revenue Source	FY 24 Budget	FY 25 Budget	FY 26 Budget	FY 27 Budget	Difference	%
Local Taxes	41,235,117	42,839,519	44,922,509	47,391,766	2,469,257	5.50%

Performance & Student Achievement Data

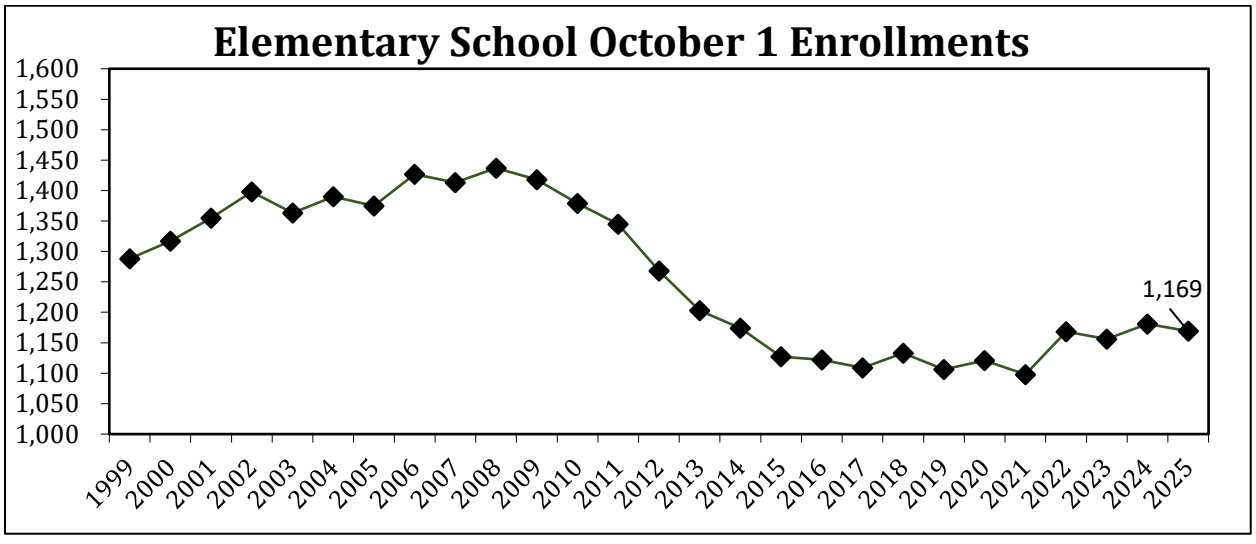

North Reading Public Schools
Performance Trends and Analysis

This report compares the student performance data of the North Reading district to students of neighboring and peer districts. Comparative information from Massachusetts Department of Elementary and Secondary Education is referenced throughout this report (http://profiles.doe.mass.edu). Where available, data from the 2025-2026 school year is used.

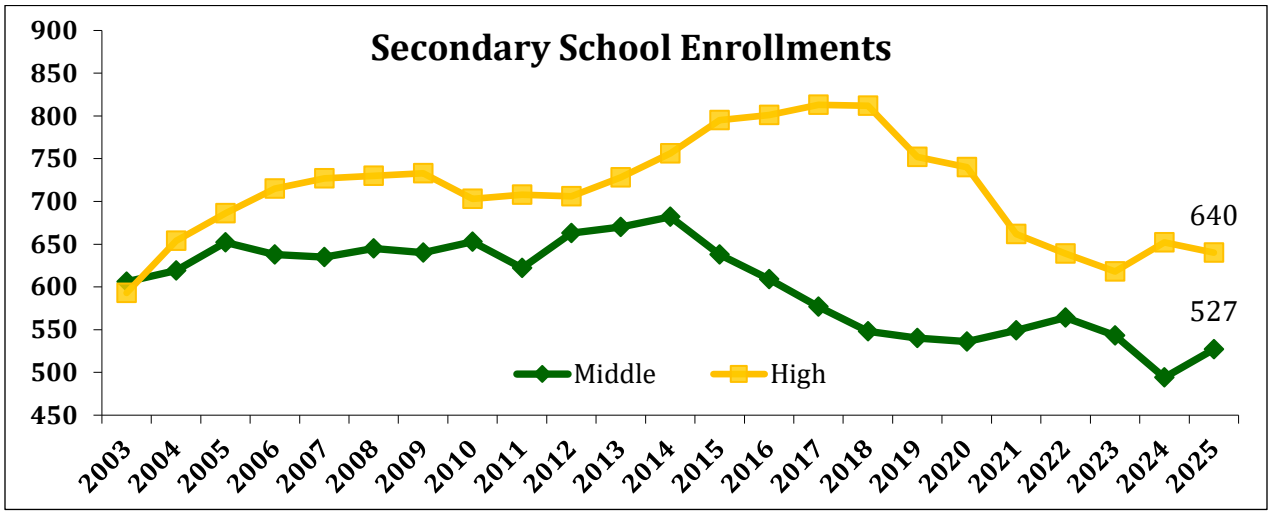

Enrollment

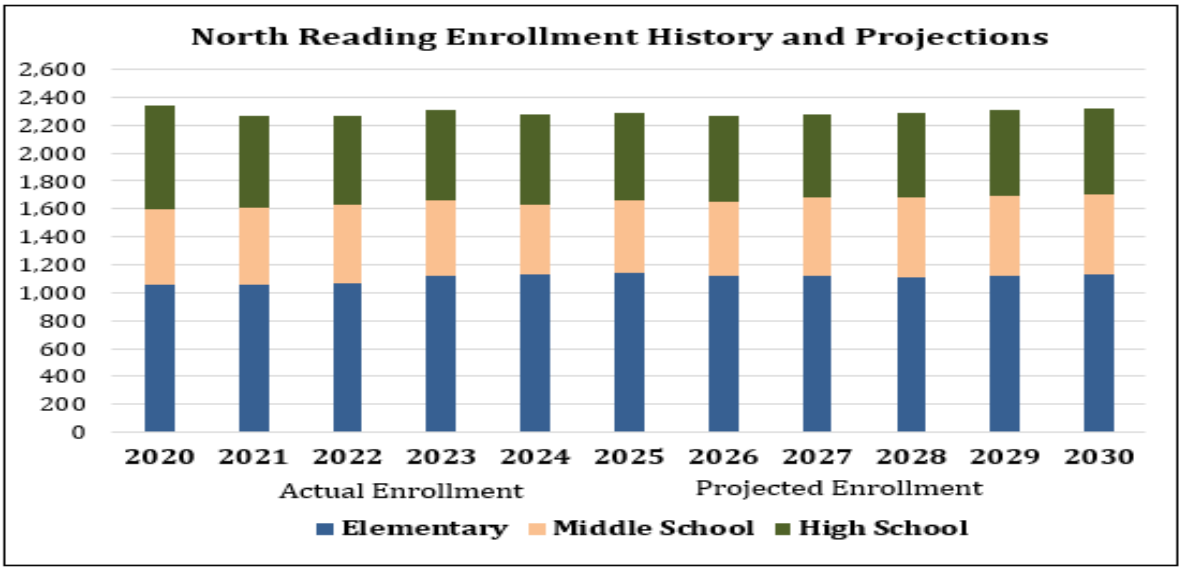

North Reading's total student enrollment has been cyclical. In the early fifties' enrollment grew quickly from 900 to 1,841 students. The 1960's saw the numbers rise to 3,217. In the 1970's enrollment grew as high as 3,461. Then in the 1980's enrollment decreased to 1,926 only to rise again during the 1990's, peaking at 2,319. The period since then has seen a growth back up to 2,812 in 2008. Since then enrollment has been on a slow decline for the next decade. Currently, student enrollment stands at 2,336, compared to 2,327 in 2025.

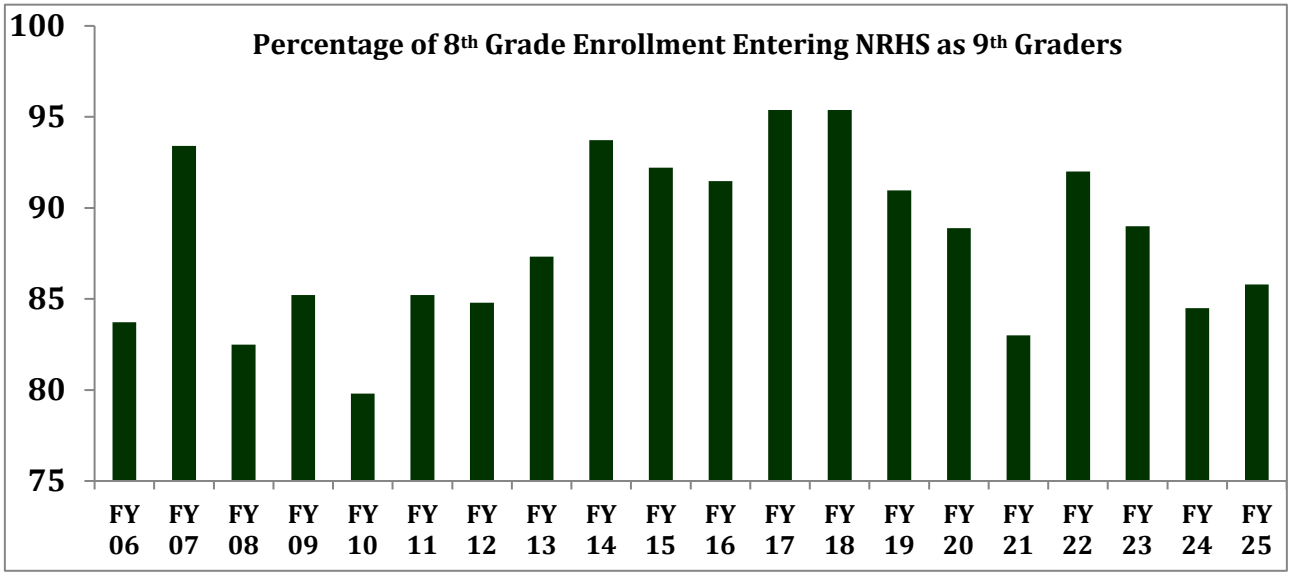

North Reading's total elementary student enrollment was on a steady decline for over a decade, peaking at 1,437 in FY 2008 and declining until reaching a low point of 1,098 students in FY 2021. This decline can be traced back to the decline in the birth rate and a slowdown in the real estate market because of the economic recession. However, recent data is showing signs that this trend is changing and enrollment will begin to experience a moderate increase. Currently, elementary student enrollment stands at 1,169 including preschool students, elementary enrollment is expected remain steady in the coming years.

North Reading's total Middle School student population peaked in FY 2014 at 682 and began to decline over the next six years, and is now at its lowest point at only 494 students. But is expected to experience increases the next few years to 566. The North Reading High School student population rose steadily and peaked in FY 2018 at 812 students and has been on a sharp decrease until the first enrollment increase in five years in FY 2023. Enrollment at the secondary level is anticipated to remain stable over the next three years with the Middle School leveling out at about 527 students and the High School at 640 students.

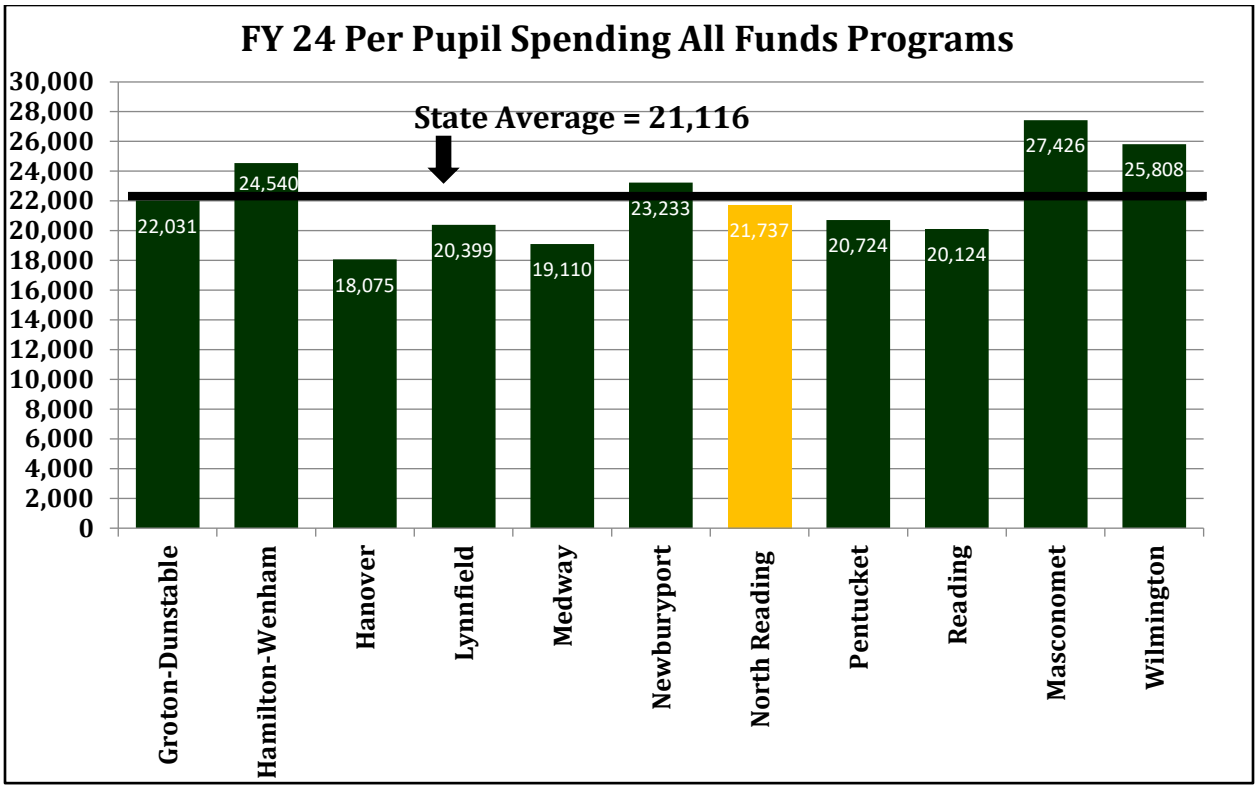

As the projections indicate above, the biggest enrollment shifts will take place at the Middle School over the next five years, as larger elementary class sizes work their way into the Middle School. The elementary level will see a modest decrease in enrollment due to larger classes working their way to the Middle School and higher birth rates resulting in more Kindergarten students. The high school will experience stable enrollment over the next three years.

In the ten-year span between 2003 to 2013, on average, 86% of North Reading 8th graders moved from the middle school to the high school. The new building project has changed this trend in recent years. In October of 2013, when the new high school opened almost 94% of 8th graders chose to attend the high school. Over the past four years from October 2020 to October 2024 the average percent of 8th graders moving on to the high school has been 86.9%. In the fall of 2024, the percentage of 8th graders enrolling into North Reading high school is 85.8%.

Finance -Per pupil spending

"Expenditures per Pupil" presents Massachusetts school spending data in a way that is comprehensive, comparable, and transparent to the general public. These calculations show **all** school operating expenditures including those outside the general fund such as grants, private donations, and revolving accounts. They include payments for local resident pupils who are being educated in schools outside of the district, as well as the overall cost per pupil. Data provides detail about how much schools spend in specific functional areas such as teaching, maintenance, and administration.

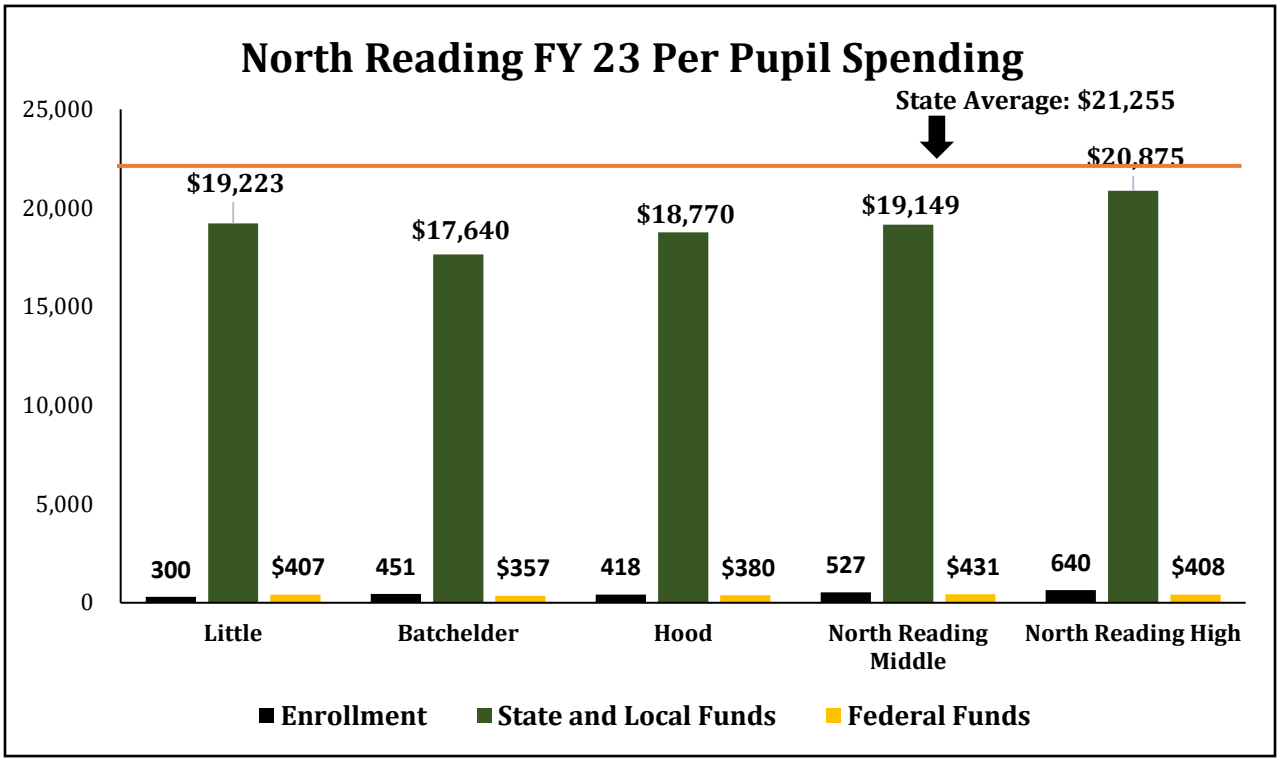

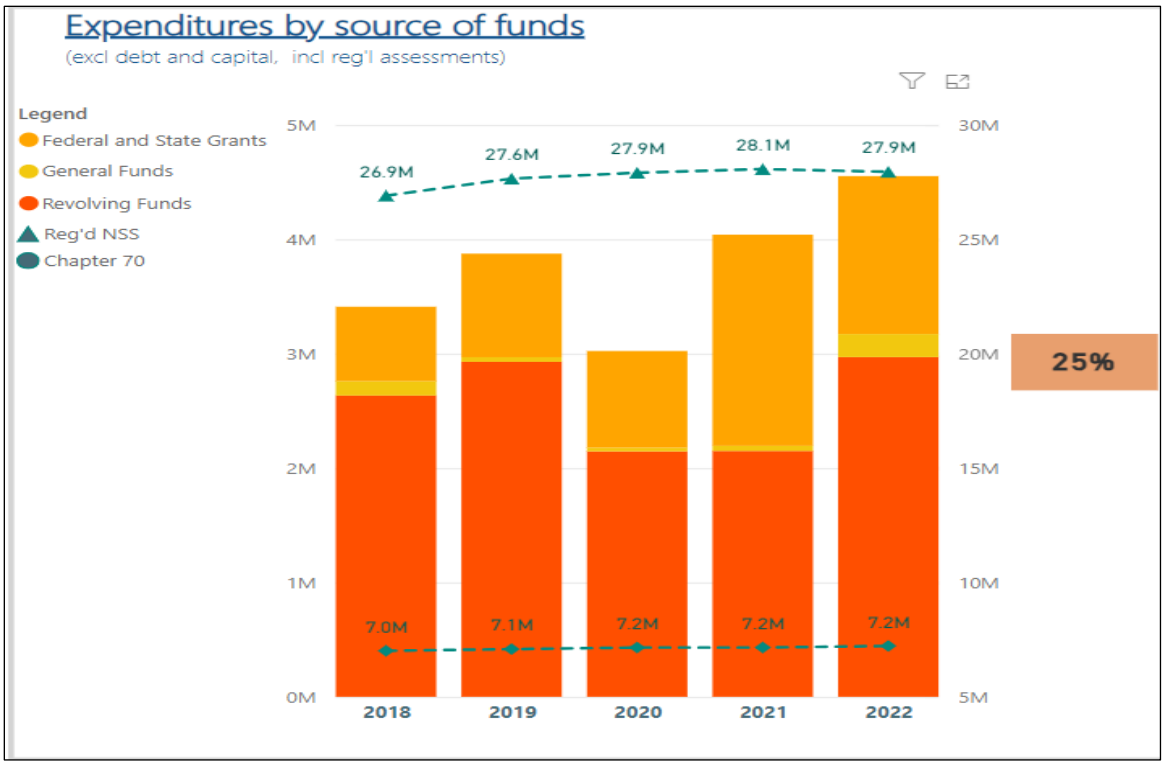

Of these 10 peer communities; North Reading ranks fifth in this grouping in per pupil spending. Historically, North Reading has remained lower than the state average per pupil spending total. From FY 2020 to FY 2022, North Reading has increased per pupil spending by about 15%. During this time, North Reading per pupil expenditures have increased an average of 6.5% lower than the state's average. In FY 2023, North Reading was just below the state average in per pupil spending, $20,852 compared to the state average of $21,377.

North Reading per pupil expenditures are, comparative to its peer group. The Administrative cost per pupil of 3% ranks similarly to the rest of the groups, as indicated in the chart above. North Reading's instructional per pupil expenditure cost ranks among the lowest of its peer group at 5%. The table above also shows North Reading is in the top half in teacher cost per pupil at 42%. North Reading's expenditures for operations, maintenance and benefit costs ranks fourth in this peer group of ten communities. These percentages show North Reading keeps up with the pupil expenditure trends of surrounding districts as they are not underspending or overspending.

Beginning, in FY 2016 the Department of Elementary and Secondary Education (DESE) begin calculating per pupil spending by school as well as by District. The spending level per school in North Reading has been very evenly distributed among the five schools as illustrated in the graphic below. On a per pupil funding basis, the North Reading High School had the highest per pupil spending for the FY 2023; when you include all the funding sources of state, local and federal appropriation. The North Reading High School spent less per student, $19,850, than the state of Massachusetts spent on average, which was $21,255 when including both state, local, and federal funds.

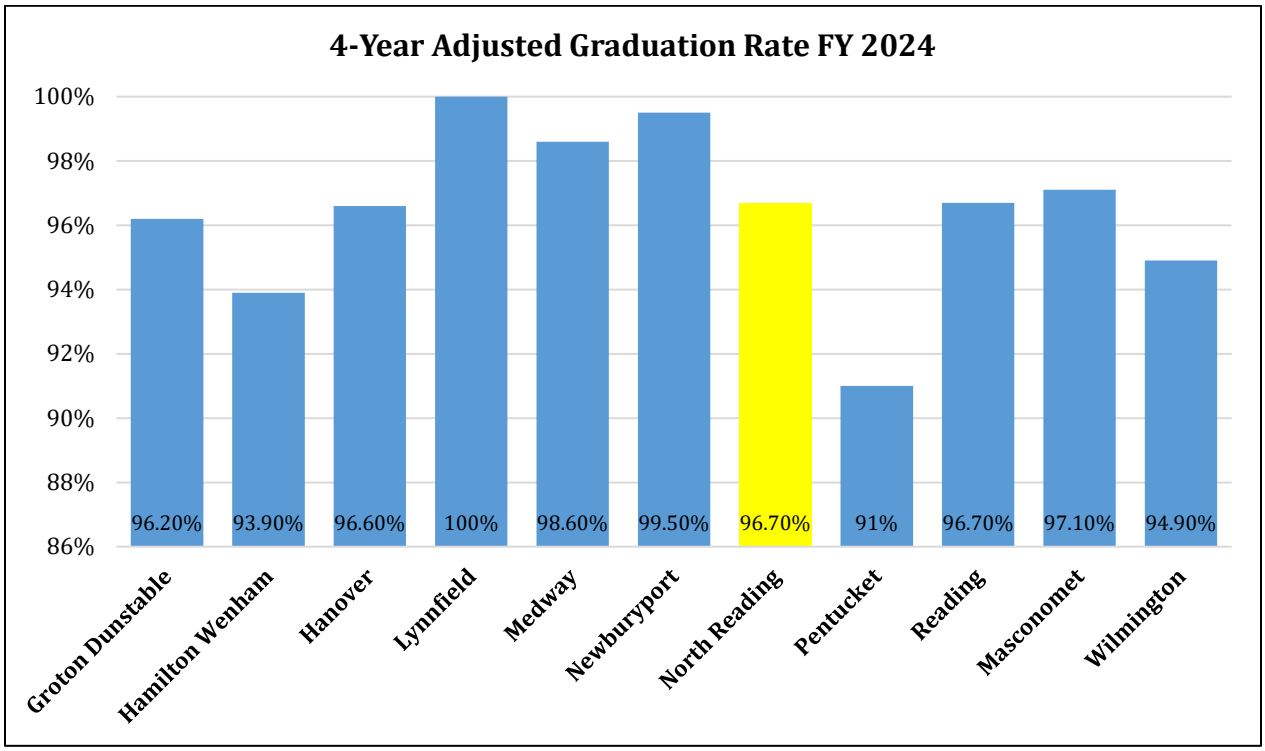

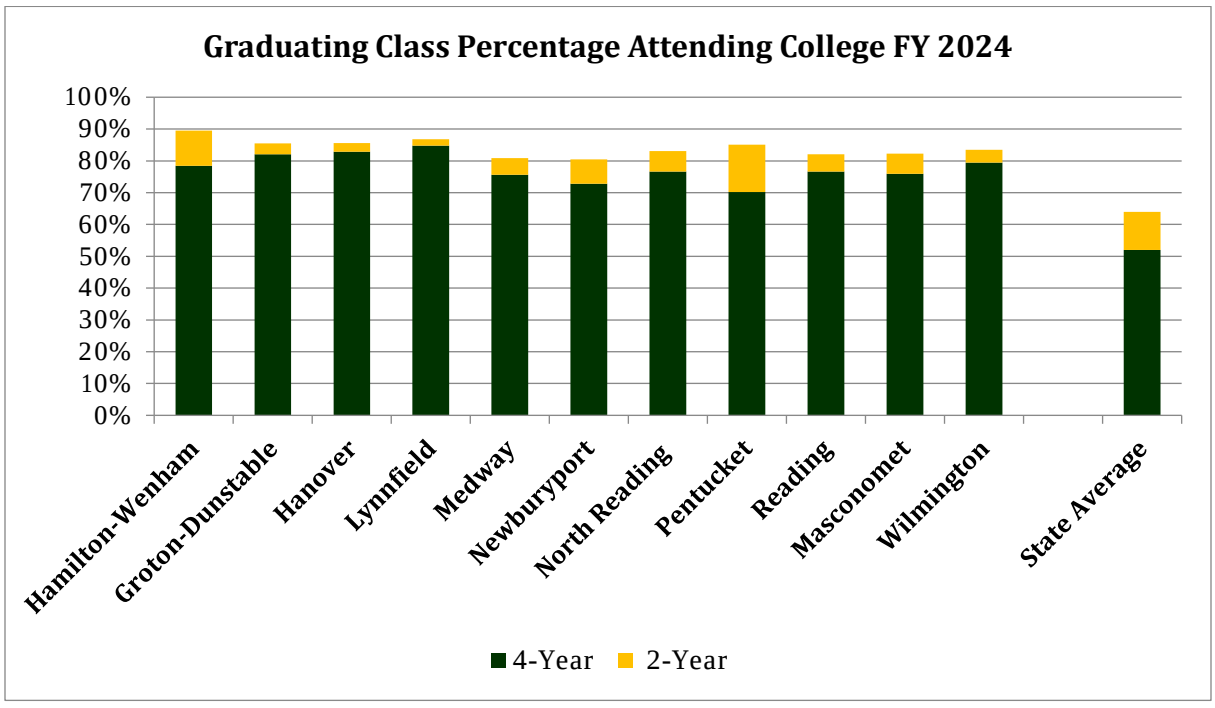

The majority of the School Department's funding comes from the general fund, which are funds appropriated at Town Meetings and revenue generated from local property taxes (71%, seen on the graphic below). The amount is very similar to North Reading's peer district and to other communities across the state who predominately rely on revenue generated from local property taxes. Other revenue sources include revolving funds, federal and state grants, and Chapter 70 state aid. As you can see from the above bar graph these other revenue sources have been flat over the last five years which has created more of a strain on local revenue sources. North Reading like many other communities across the state receive minimal funding from state aid as we are considered an affluent community. North Reading, as indicated by the graphic above, expend far more then what we are required to spend by the state, on average 16-17% more than our required net school spending amount, which is also happens to be the state average.

Graduation-Rates and Plans

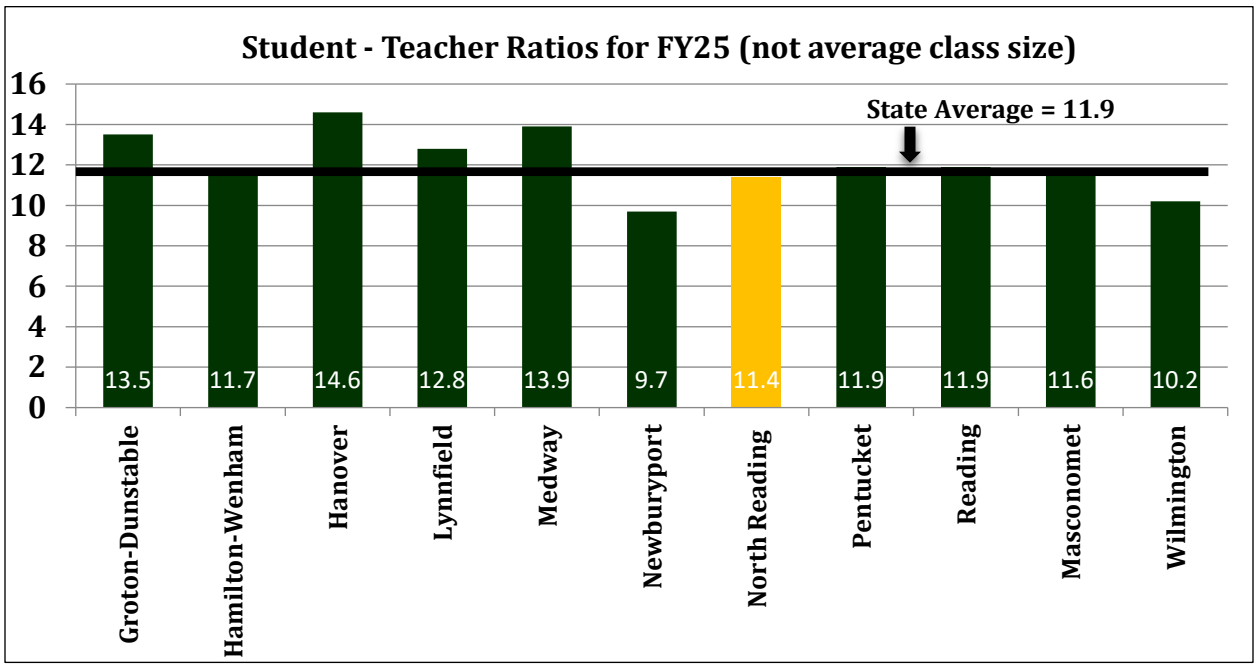

North Reading's adjusted graduation rate is lower compared to some of their peer districts with a four-year adjusted graduation rate of 96.7% in FY 2024. This statistic is 8% higher than the Massachusetts state four-year graduation rate average of 88.4%.

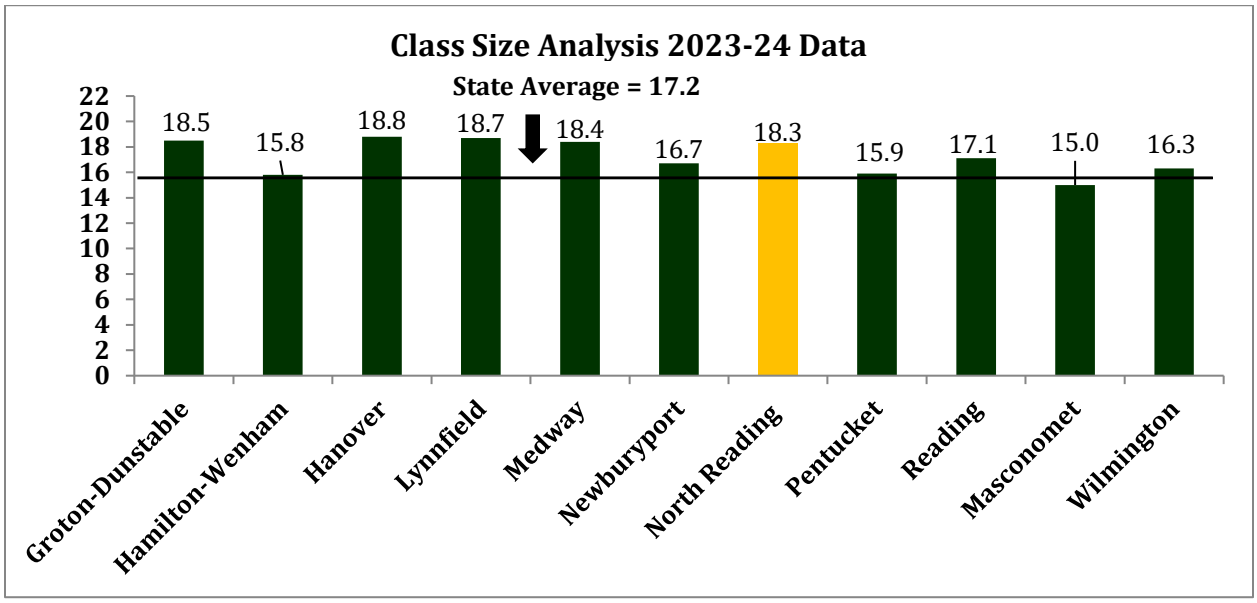

Many peer high schools also send around 80% of graduates to college. North Reading's college attendance rate has 83.1% of graduating students attending either a 4-year or 2-year college. This rate is above the state average of 63.5%.

Student: Teacher Ratio & Class Size

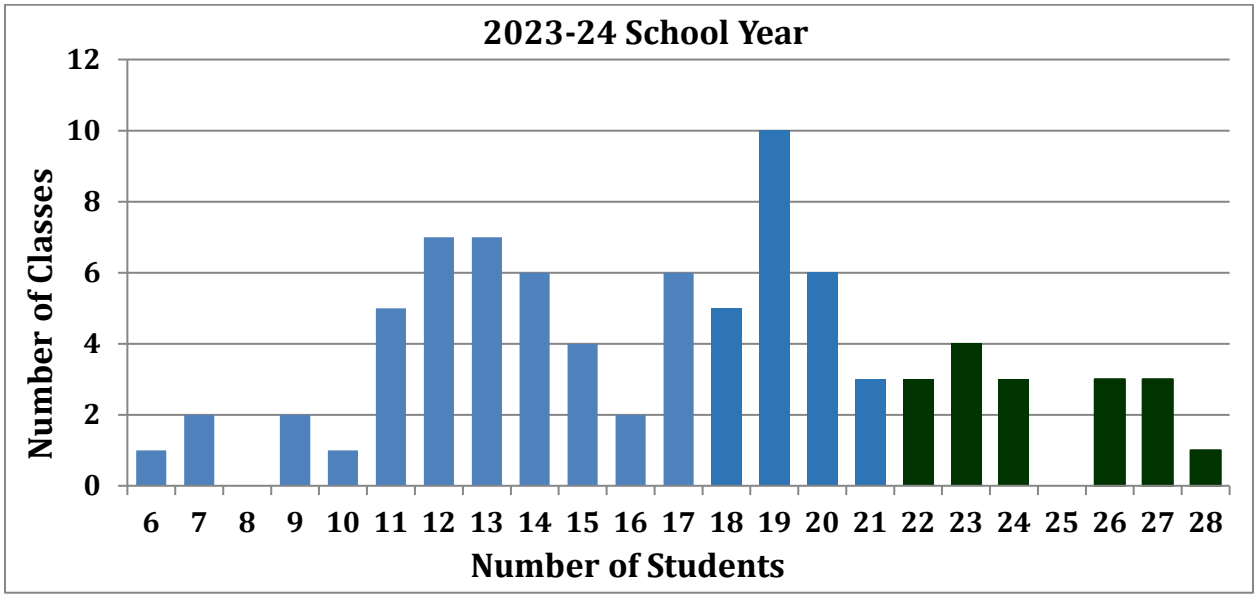

State Average = 11.9

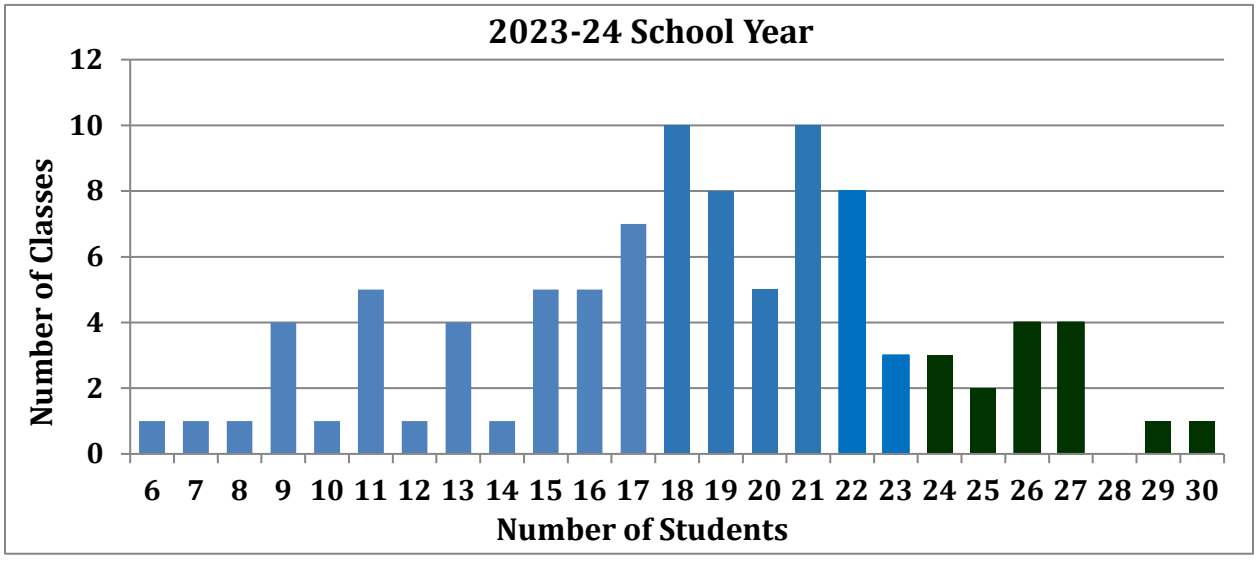

North Reading's student teacher ratio of 11.4 in FY 25 falls bellows the state average of 11.9. This mean North Reading has 1 educator for every 11 students enrolled. This can be viewed as a positive because this means students are able to form closer relationships with their teachers, which in turn can have a lasting impact on the student's ability to learn.

North Reading ranks fifth in average class sizes (at all levels) of its peer communities at 18.3, and is greater than the state average of 17.2. North Reading has had the same average class ratio for several years and has been slightly above the state average. North Reading's average class size ratio with recent staffing reductions in FY'25 is expected to increase.

In FY'23, only 10 classes in core academic subjects including elective courses have class sizes of 24 or more student. This represents 11.9% of classes at the high school, down from 32 classes from last school year. The average class size for these courses is 18. These are ideal class sizes for teaching and learning.

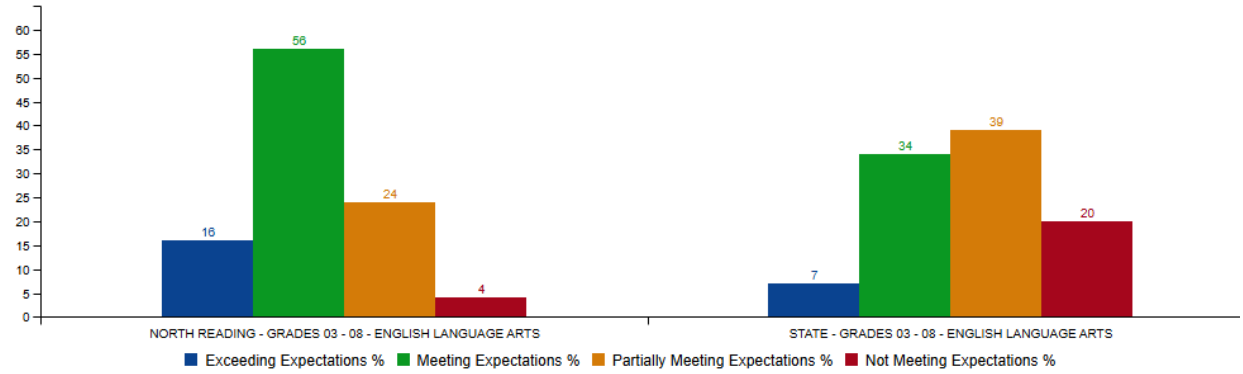

Today, 15 classes in advanced placement and honors course have class sizes of more than 24 students. This represents 15% of advanced placement and honors classes having more than 24 students, up from 10% last school year. The average class size in these courses is 18.4, which is ideal for an advanced teaching and learning experience.

MCAS: Next-Generation

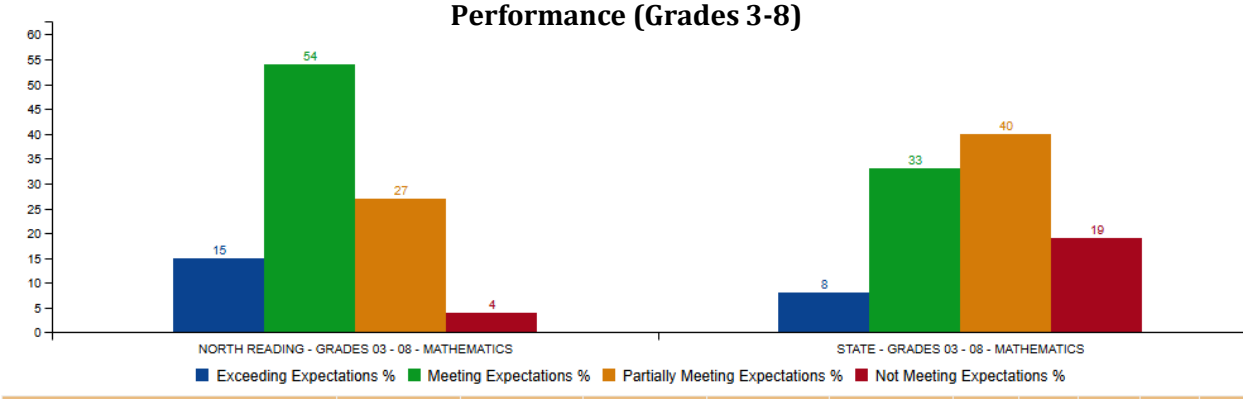

In 2024, All North Reading students performed well above the state average on the English Language Arts and Mathematics MCAS exam once again.
As seen to the graphic below, on the next generation English Language Arts 2024 MCAS test, 72% of North Reading students in grades 3 through 8, exceeded or met expectations compared the 41% of grade 3 through 8 students who met or exceeded expectations in the state.

2025 Next Generation ELA MCAS Test Performance (Grades 3-8)

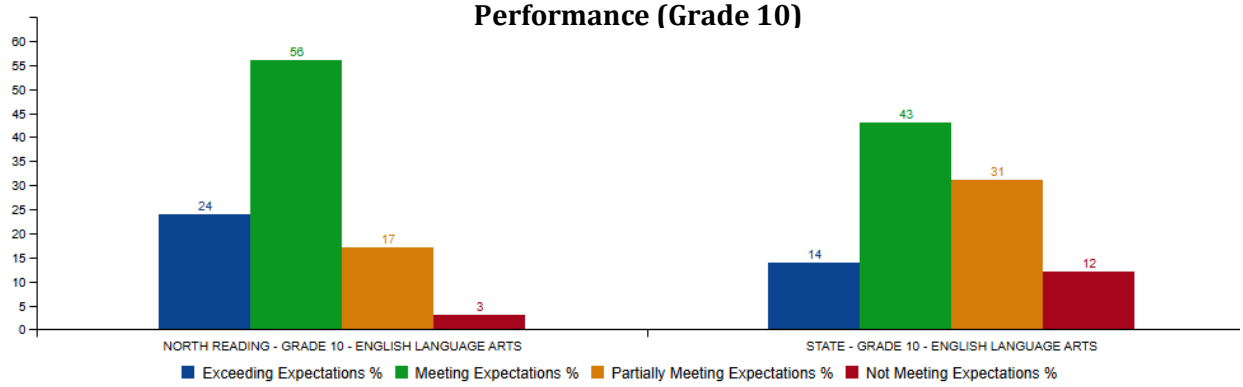

On the graphic below, North Reading students scored similarly on the Mathematics portion as they did on the English Language Arts portion. 69% of North Reading students in grades 3 through 8 exceeded or met expectations compared the 41% of students who met or exceeded expectations in the state. These percentages are improved from 2024's 65% who met or exceeded expectations, 4% higher than 2024.

2025 Next Generation Mathematics MCAS Test Performance (Grades 3-8)

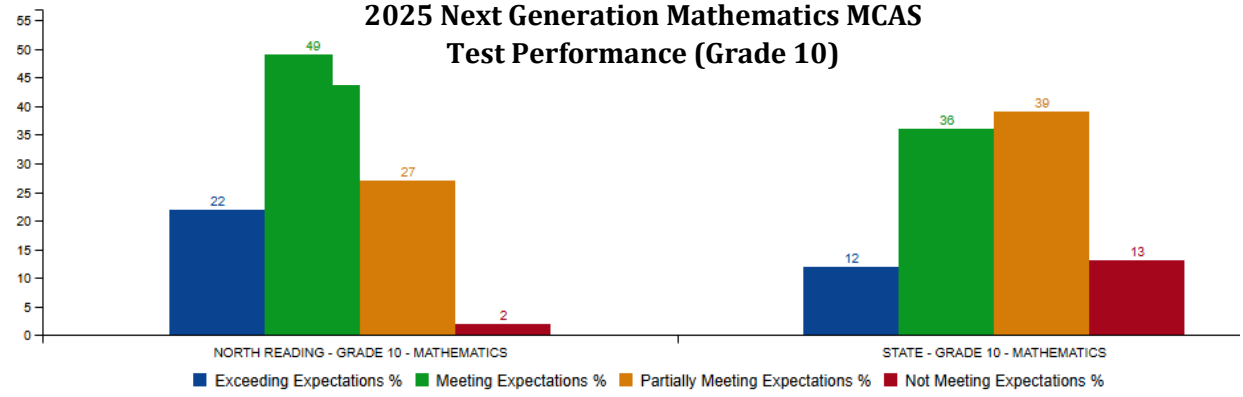

North Reading High School students have consistently performed well on the ELA MCAS exam. In 2025, 80% of North Reading students scored met or exceeded expectations, which is much greater than the state average of 57% in 2025. In 2024, 71% of North Reading students scored met or exceeded expectations, therefore the 2025 scores show furthering in the excellence of North Reading High School students.

2025 Next Generation ELA MCAS Test Performance (Grade 10)

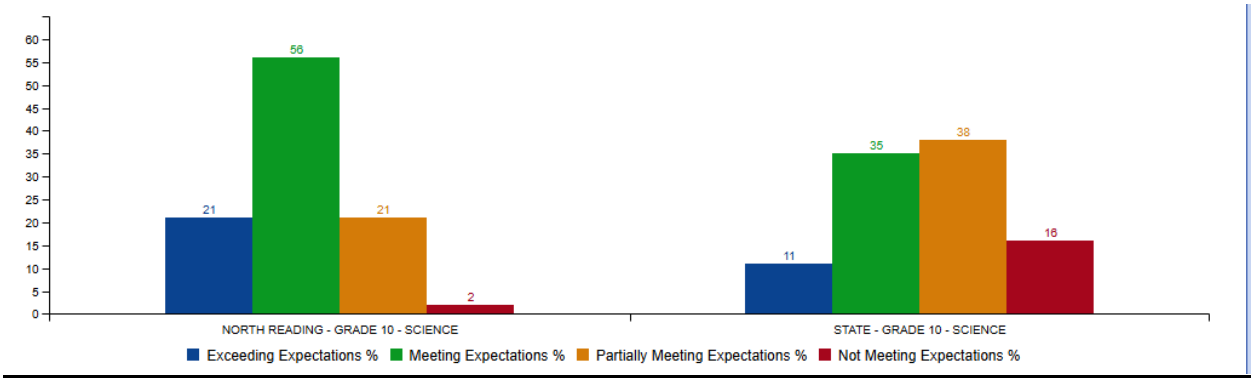

North Reading High School students have consistently performed well on the Math MCAS exam. In 2025, North Reading saw a decrease in the number of students who met or exceeded expectations from the previous year, from 82% to 71%. 71% is still greater than the state average of 48%, but shows that there is room for improvement in this department.

2025 Next Generation Mathematics MCAS Test Performance (Grade 10)

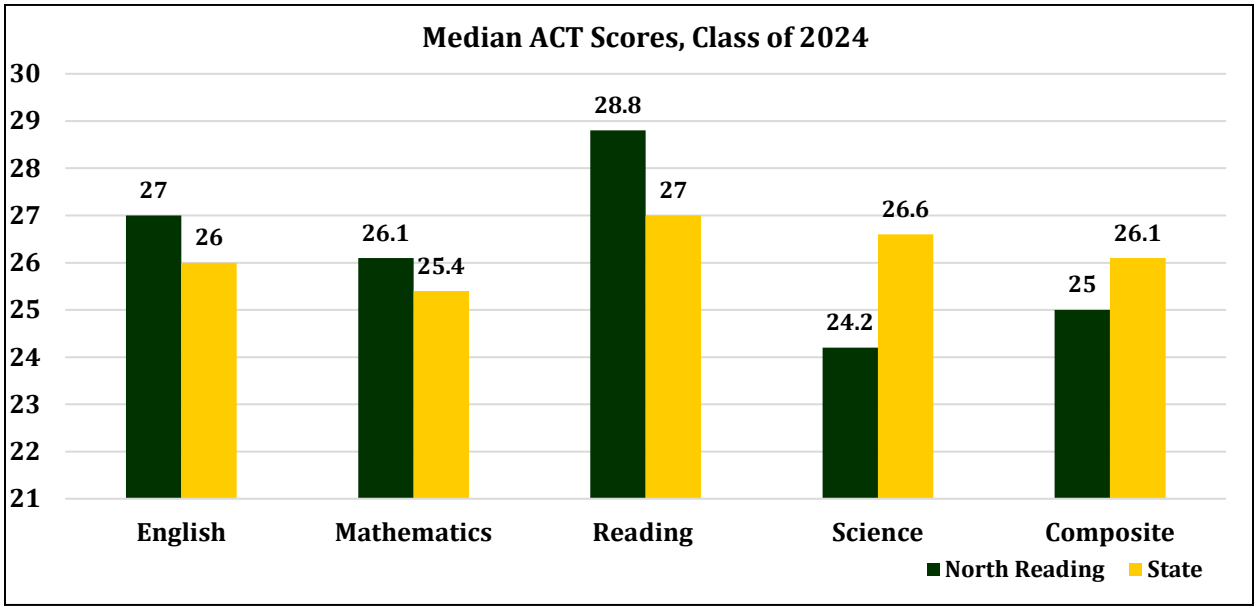

In 2025, 77% of North Reading 10th grade students met or exceeded expectations on the Science and Technology MCAS, which is greater than the state average of 46%. This is an 5% decrease from the previous year, showing that there is room for improvement in this department.

2025 Next Generation Science and Technology MCAS Test Performance (Grade 10)

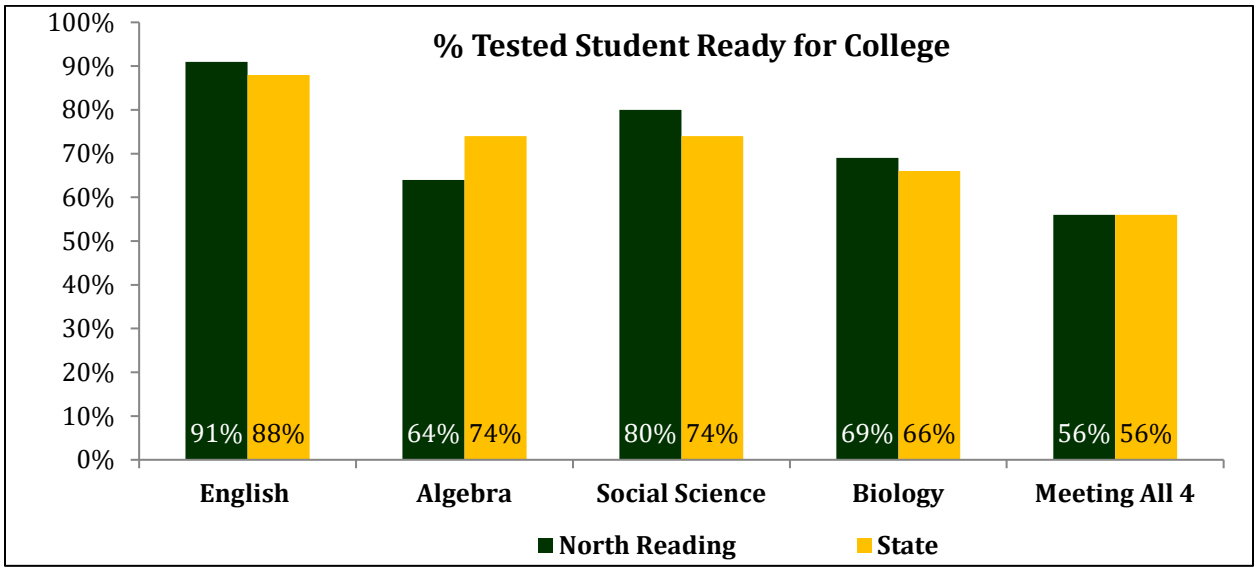

ACT & SAT-Trends and Comparisons

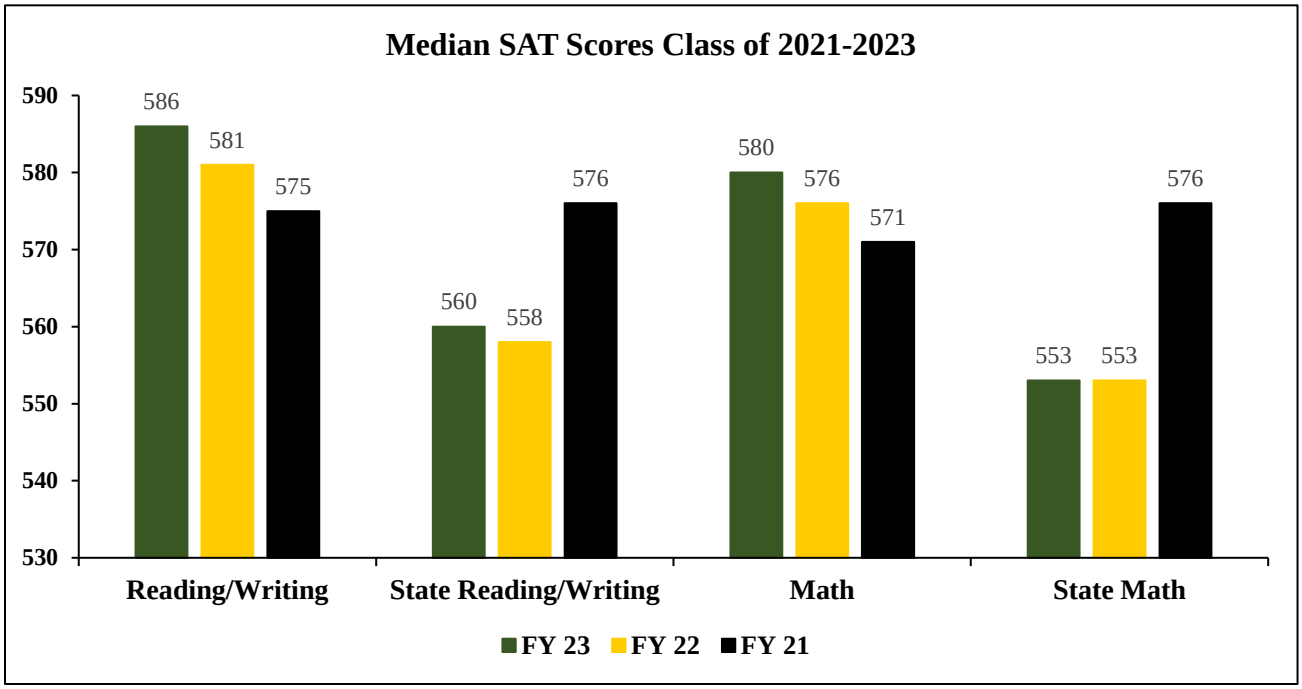

SAT and ACT tests are measures of academic readiness for college studies. North Reading students have had a strong record of performance on college entrance exams.

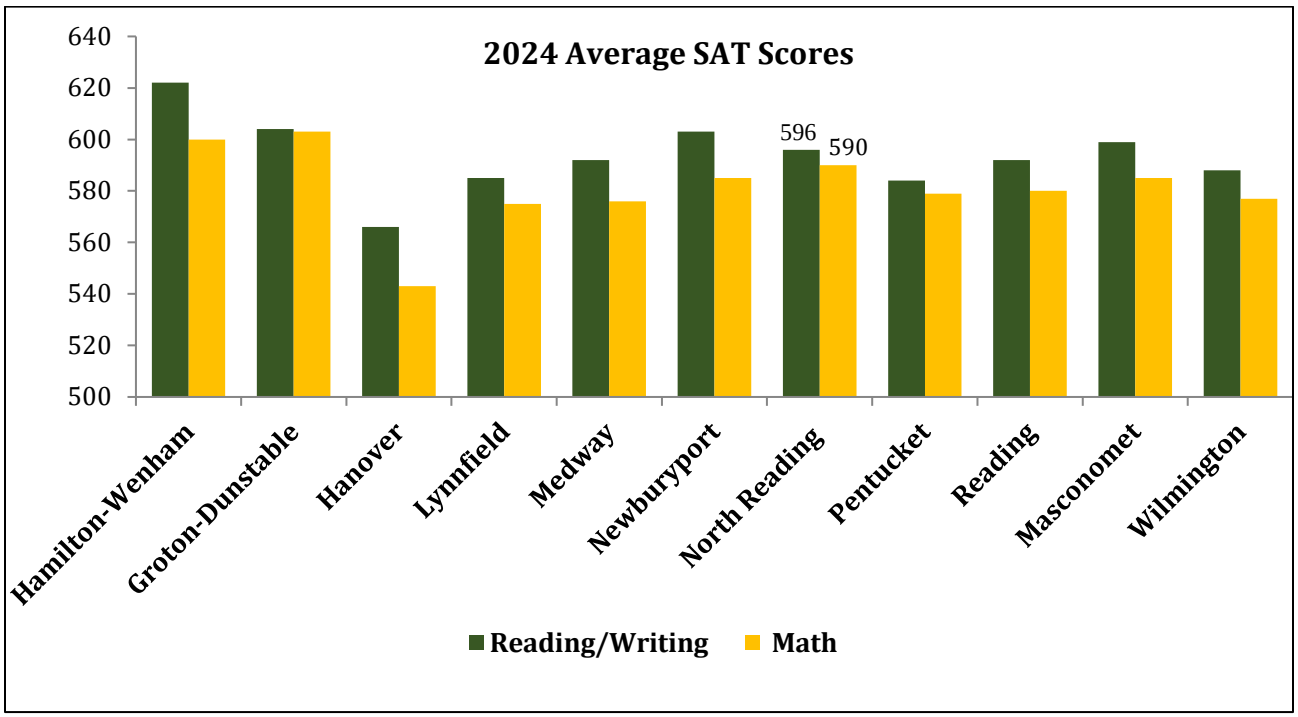

Median ACT scores for North Reading have consistently been strong and above the state average. In 2024, North Reading scored above the state average in every subject area except Science. The percent of North Reading students taking the ACT has significantly decreased in recent years, for example in 2024 only 15 students took the exam.

A benchmark score is the minimum score needed on an ACT subject area test to indicate that the student is ready to achieve a grade of B or higher in a college level course. North Reading has consistently scored high in each subject area in this category, significantly outperforming the state.

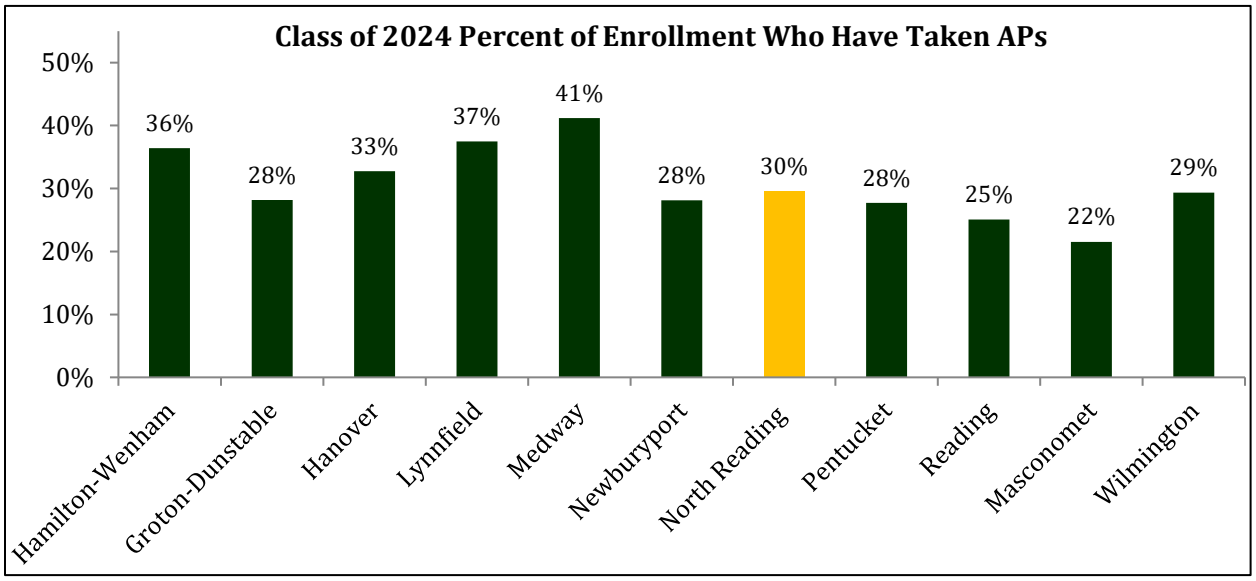

Median SAT scores for students from North Reading have historically been significantly higher than the state average and of its peer communities. North Reading students have performed very well on the SAT test. In 2023, North Reading's scores were well above the state average in both reading/writing and math.

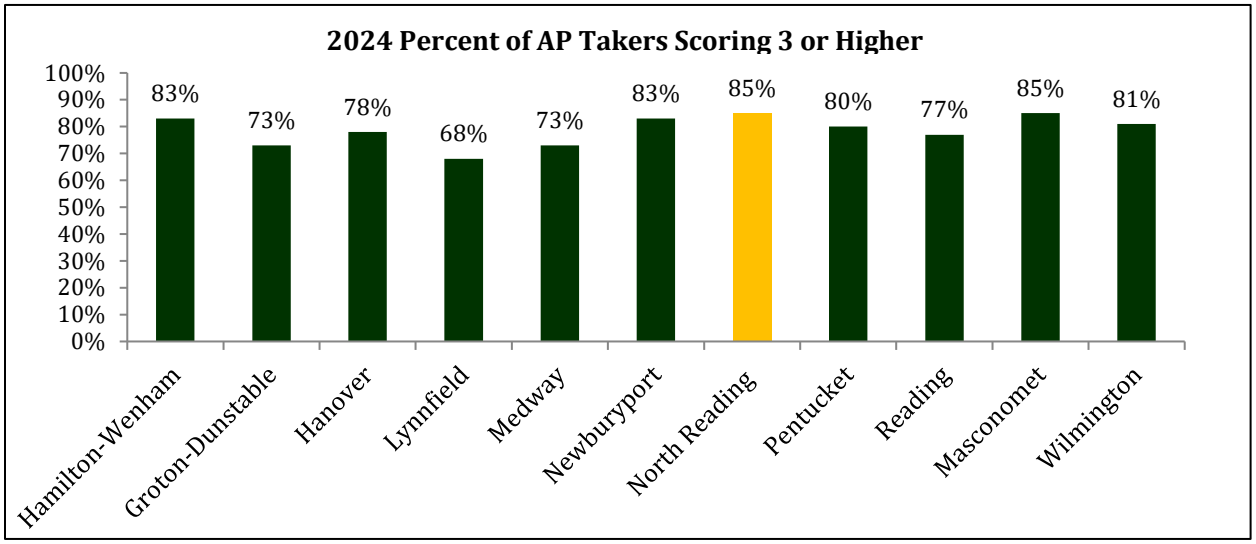

North Reading has consistently achieved SAT scores higher than the state average, which was 596 in Reading/Writing and 590 in Math in 2024. Historically, North Reading has also scored in the upper half of its peer districts, ranking fifth in both reading/writing and math.

Advanced Placement

North Reading's AP program has grown dramatically over a twenty-year period from 8 courses in 2004 to 22 courses in 2022. The number of AP exams administered has also significantly increased over this same twenty-year period from beginning at 87 to reaching highs of 500. Many of the high-level courses taught at North Reading during 10th, 11th and 12th grades rival those taught in liberal arts colleges.

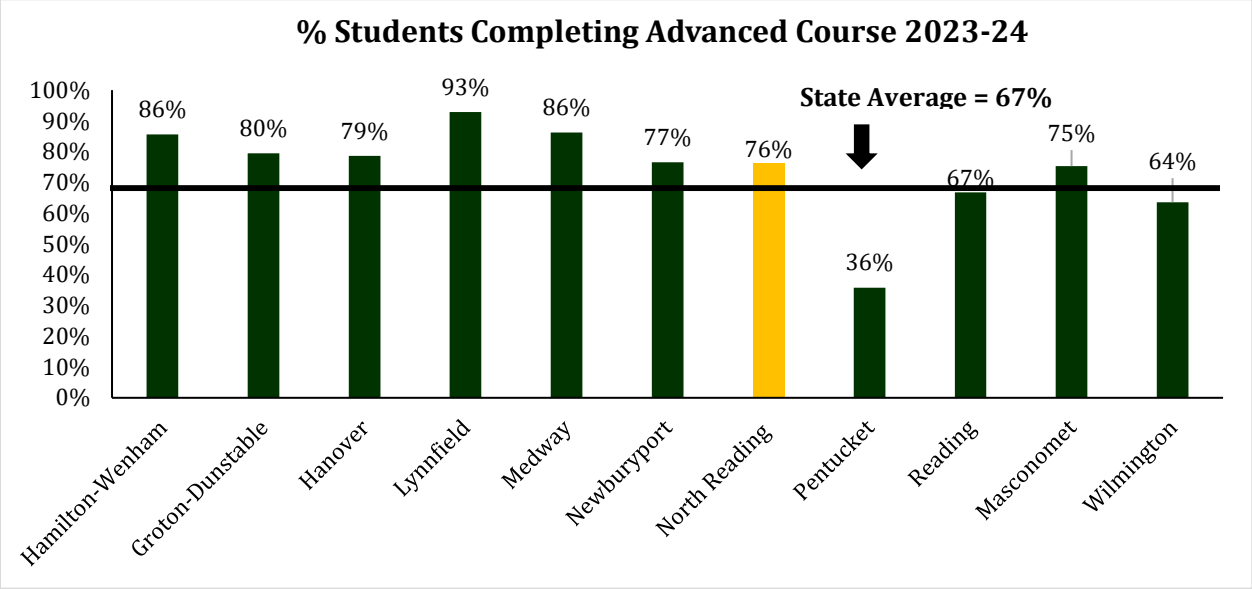

North Reading High School ranks in the middle of its peers for high schools offering the most AP courses and subsequently have more students taking AP exams. For the year of 2024, North Reading ranked fifth out of ten peer schools for the percent of each graduating cohort taking at least one AP exam while in high school, and much higher than the state average at 21.7% of the total high school student population.

Scores on AP exams of 3, 4 or 5 are considered by the College Board as predictive of college success and college graduation. 85% of North Reading students taking AP tests received 3 or higher on their exams, 5% higher than the previous year. North Reading ranks within the

top five out of the ten peer schools for percentage of AP tests with a score of 3 or higher. However, North Reading also scored higher than the state average of 70%.

North Reading High School has always had a high percentage of students taking advanced placement courses. In 2023-24 North Reading had 76.1% of 11th or 12th grade students complete at least one advanced course, which is 3% higher than last year and 9% higher than the state average of 67% this year.

College Acceptance

In 2025, 158 seniors sent 1686 applications to 324 colleges, 32 of these applications were early decision and 820 were early action. According to the Common Application, the average New England student applies to 8.5 colleges. Each North Reading senior applied to an average of 10.7 colleges (Slightly higher than the state average of 8.5). Below is a chart that details the top ten colleges or universities North Reading seniors applied to in 2024 and 2025.

2025

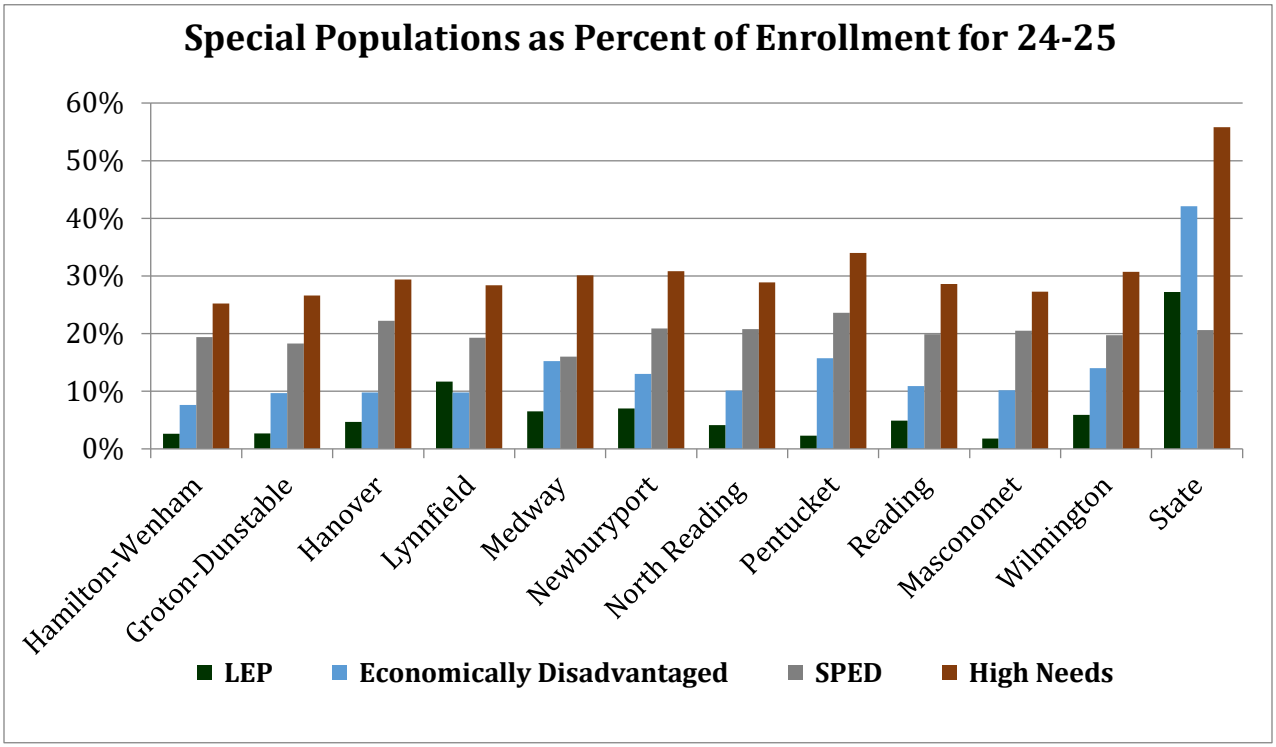

1. UMass Amherst- 93
2. University of NH- 55
3. Northeastern University- 46
4. University of Rhode Island- 38
5. University of Connecticut 37
6. UMass Lowell- 32
7. Boston University- 29
8. Merrimack College- 28
9. Quinnipiac University- 26
10. Penn State University Park- 23
10. Providence College- 23
10. Syracuse University- 23

2024

1. UMass Amherst- 48
2. University of NH -40
3. UMass Lowell -26
4. University of Connecticut -24
5. Merrimack College -23
6. University of Rhode Island- 21
7. Northeastern University -20
8. Salem State University-19
9. Quinnipiac University - 18
10. Boston University -17

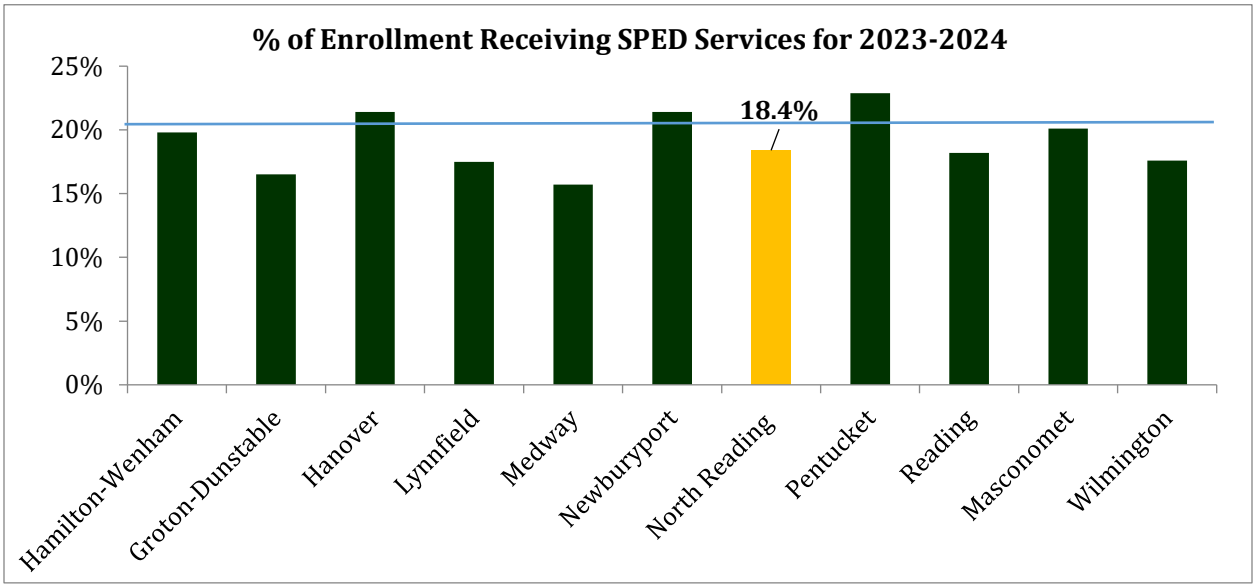

Special Populations

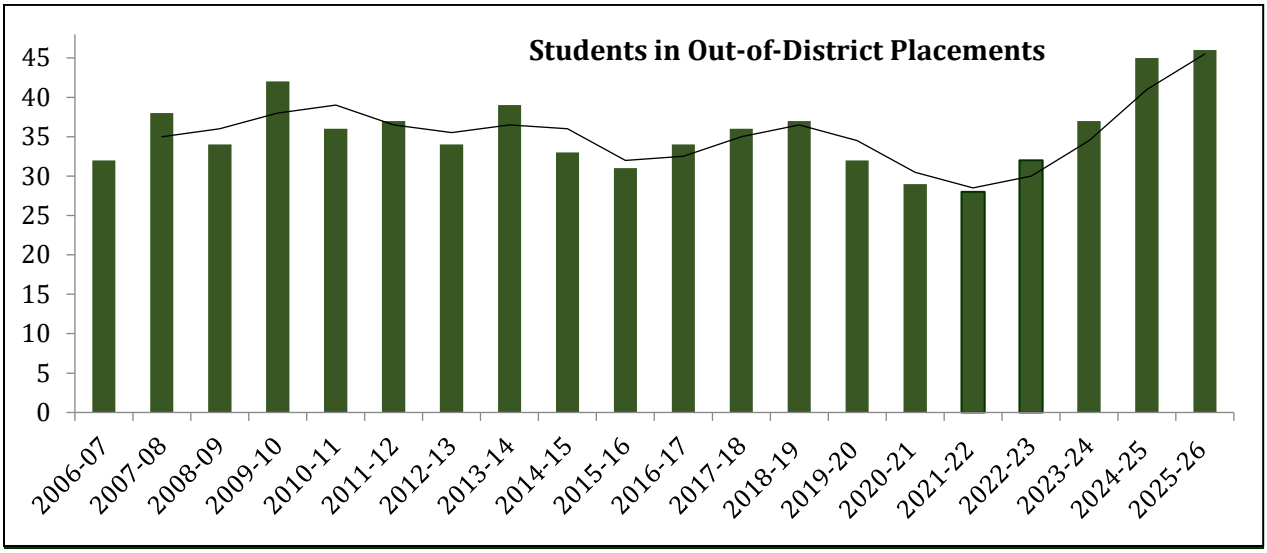

Special populations often take additional resources to support student success. These special populations include Limited English Proficient (LEP) students, students from low-income families receiving free or reduced lunch, and students receiving special education (SPED) because of a disability. Collectively, these are "high needs" students.

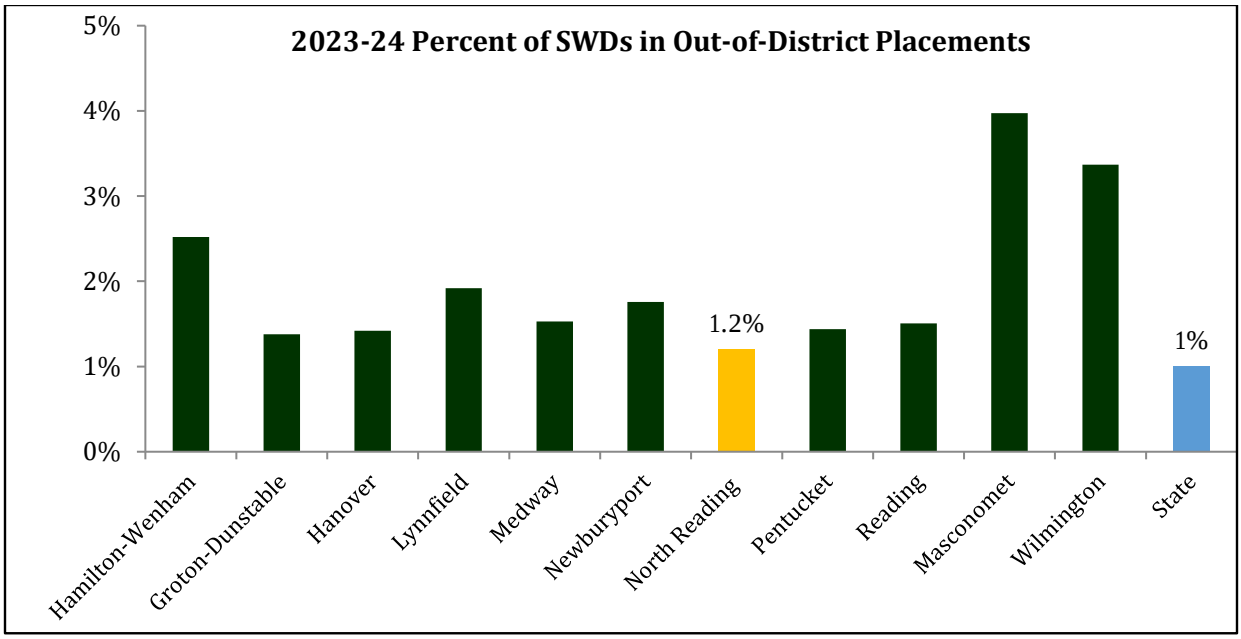

North Reading's special population is in the middle of the pack among its peers. Most students receiving special education services do so in North Reading's Learning Centers. These students are fully included in regular education classes. At the secondary level many students have one of the classes in their schedule dedicated to receiving IEP services. All of North Reading's peers including North Reading are significantly below the state's percentage of LEP, high needs, and economically disadvantaged student populations.

The percentage of North Reading students identified with a learning disability and receiving Special Education services is 18.4%, which is within median ranges of our peer districts, and just below the state average of 20.2% in 2024.

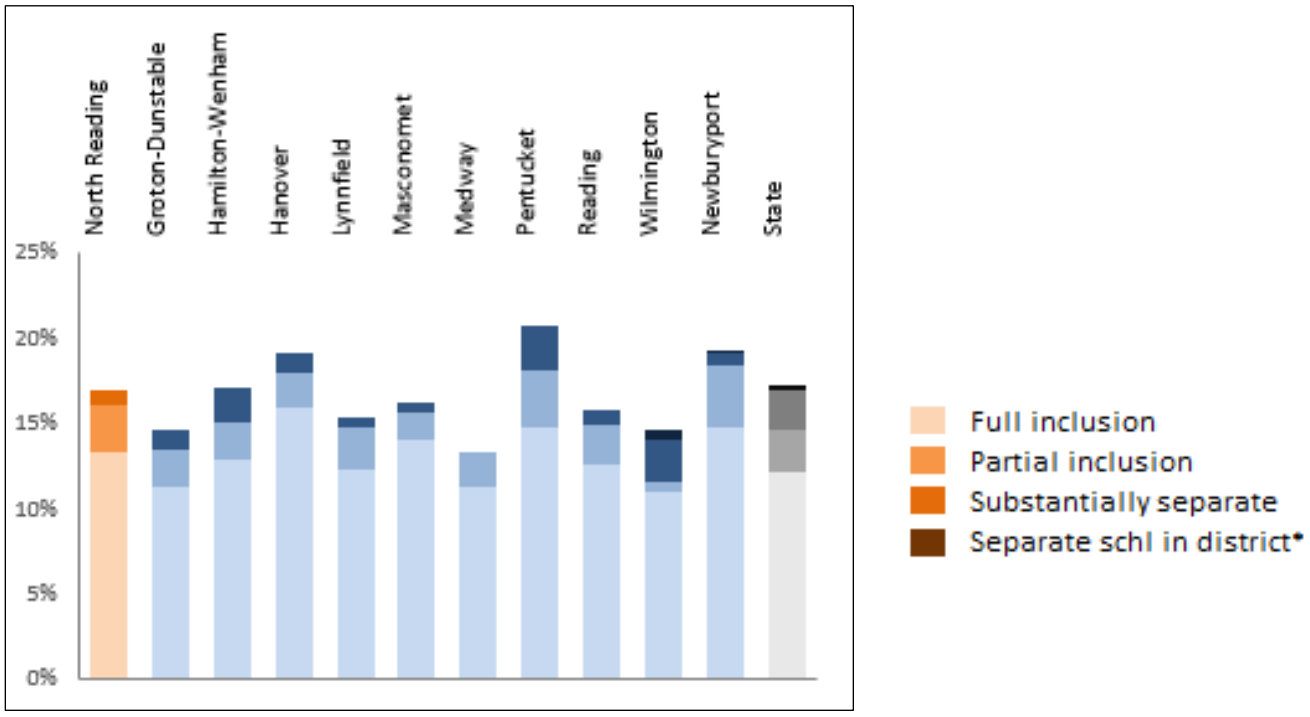

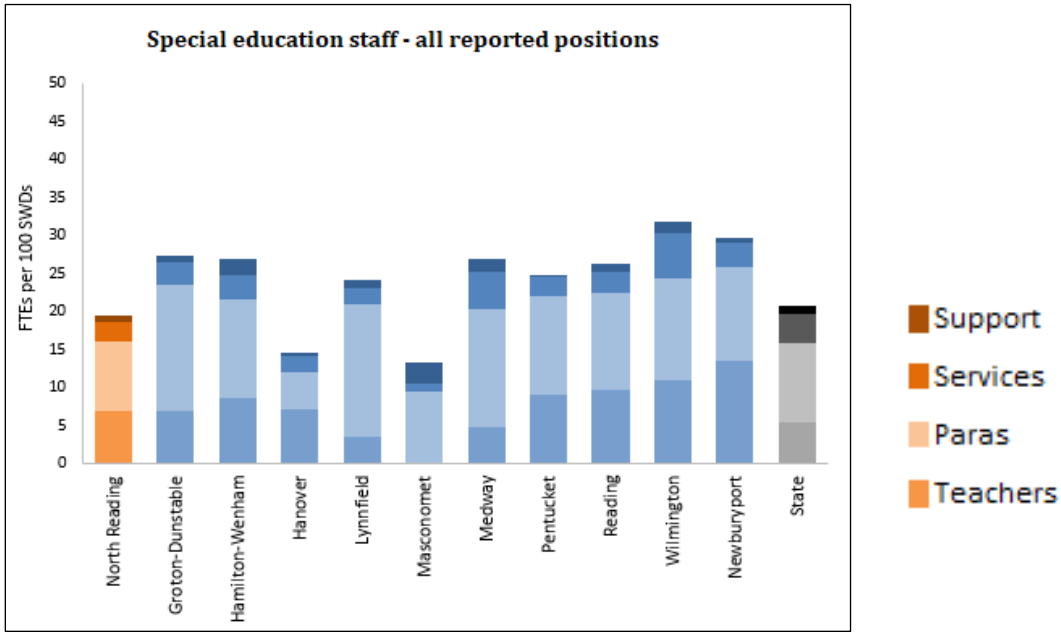

The cost of out-of-district placements can be expensive. North Reading's out-of-district placements had hovered between 32-36 for years, and the ten-year average for out-of-district placements is 35. North Reading experienced an increase in out-of-district placements in FY 14, where it reached its highest point since FY10. Currently, in FY26, out-of-district placements are on the rise and is now at 46. North Reading continues to work hard at developing specialized programs to meet the needs of all students.

North Reading ranks in the middle when comparing the percentage of students that are educated in out-of-district placements with its peer communities. North Reading is also currently right above the state average in this statistic as well. The district has been actively working toward decreasing the need for out-of-district placements. Support for "in district" students has been expanded by adding Language-Based Learning Disabilities programs and North Reading is working toward enhancing its social emotional programs and support.

The North Reading student population with disabilities has consistently been about the state average. For fiscal year 2024, 18.4% of students had a disability, which is lower than the state average of 20.2%. This represents 454 students out of the 2,383 of the total student body in the North Reading district, these numbers include students being educated outside the district.

North Reading ranks among the middle of its peer group when providing staffing to educate students with disability (SWDs). The major area of impact for North Reading is the low number of paraprofessionals, although it is at the state average, peer schools have more paraprofessionals per one hundred SWDs. It has always been a priority for North Reading to provide the instruction and support services necessary to education all students.

Section 7
Capital Improvements Plan
FY 27- FY 31

The School Department recently at an October School Committee meeting presented and received approval of their five-year large capital improvement plan. The school's capital plan consists of projects that fall into three major categories, Vehicles, Technology and Facilities. Projects that qualify as large capital must have a unit or project cost greater than $25,000 and a useful life of at least five years or more. The process of reviewing and making updates to the school's capital needs takes place during the fall each year by School Department Officials. It is the goal of the capital plan to identify short and long-term capital projects in need of funding to help move the district's educational objectives forward and to continue to provide a safe and healthy learning environment for students and staff. The School Department submits requests annually to the Capital Improvement Planning Committee (CIPC) to review. The CIPC determines the guidelines, funding strategies, and policies to provide the foundation to guide the communities' capital decisions. The nine-member Capital Improvement Committee consists of all major stakeholders, including members of the Select Board, Finance Committee, and School Committee, as well as Town and School officials.

Vehicles

The School maintains a fleet of four student services vehicles, which are used to transport students each day and three building and ground vehicles used for a variety of purposes including snow removal, deliveries, and to ensure the proper upkeep of school grounds. The School Department also has two Multi-Function Activity 15-passenger vehicles used for both athletic and extra-curricular transportation.

The School Department recently received a state grant with the assistance of State Representative Brad Jones. The grant enabled the District to replace the 2011 student services van this past school year, the oldest van in the fleet. The new van delivered in April 2024 is used daily to meet both in-town and out-of-district transportation needs of special education students. The 2011 van will remain in operation as a spare and for extra-curricular runs as needed for another year before being taken out of operation. This van is over eleven years old with over 109,700 miles on it and will eventually be traded in. The District's Special Education fleet of vehicles, with this latest addition, are in good condition and the District does not anticipate having a need for vehicle replacement until FY'28, when the 2015 van will be over 12 years old.

In addition, the School Department in FY'25 received funding to replace it's 2014 Ford F-450 utility truck used by the Grounds Department. This vehicle is over ten years old with over 90,000 miles on it but has been breaking down costing the District more in repairs each year, including costly engine and truck bed repairs in recent years costing over $10,000. The cost of replacement for this vehicle was $95,000, the School Department

is currently awaiting delivery of this new vehicle. All other Buildings and Grounds vehicles and equipment remain in good condition and are maintained by the Department of Public Works on a regular basis. The School Department is requesting in the FY'27 capital plan the purchase of a third Multi-Function Activity 15-passenger vehicle for the extra-curricular, fine-arts, and athletic programs. A third vehicle will provide much greater flexibility to allow the district to meet the needs of other extra-curricular activities including the performing arts program. The Performing Arts Department will assist with the purchase of this new vehicle if approved to reduce the cost to the Town. Having access to a third vehicle for extra-curricular transportation needs would significantly help defray the immense cost of using a contracted bus company. The buy-back period of this vehicle with the potential savings of using more in-house transportation over the outside contractor is estimated to be three years.

Technology

Other projects listed as priorities for next school year fall under the category of technology. This includes a $75,000 request to continue to replace student chrome-book devices annually to ensure the district's 1:1 student device program in grades K-12 can successfully continue. The district continues to pursue all areas of state and federal grants to assist with its technology device needs for both students and professional staff. The district has successfully worked with State Representative Brad Jone's office to secure state funding annually that has assisted with our staff and student's device needs which has helped to significantly reduce the School Department's request to the Town for this need over the last several years. Total state funding since fiscal year 2021 in this area has totaled $275,000.

Facilities

The final category is facilities and the School Department has two major projects to address in this category, one being the continuation of the Hood School Roof restoration project. The District received $200,000 in FY'25 to begin this restoration project by replacing all wet areas of the roof and repairing drainage work. The next phase of this project is to seal and coat all areas of the roof to receive a 20-year warranty and extend the life of the roof. The capital plan calls for the School Department to do this work in two phases the first part in FY'26 for $550,000 and the second part of the roof in FY'27 for $400,000.

Another request for FY' 2027 includes addressing the need of a resurfacing of the Middle/High School track as well as, the upper tennis courts. Both surfaces are showing significant signs of wear and tear, decay and cracking in certain areas. To preserve the life expectancy and integrity of these essential surfaces the district is proposing to spray and repair these surfaces starting with the Track in the summer of 2026 in FY'27 before further

decay is observed which could result in the need for a larger more costly replacement and resurfacing project. Then the Tennis courts in the summer of 2027, in FY'28, which is in a need of attention given the cracking and conditions of the courts.

The District prepares projects over a five-year period and the full capital plan and presentation can be found on the district website at www.north-reading.k12.ma.us/budget.

FIVE YEAR CAPITAL IMPROVEMENT PLAN

Notes:

1	**Special Education** The District currently utilizes three special education vans daily to transport students between in-town special education programs. Currently, the 2015 van is used as a spare van. The District received state earmark grant funding in FY'23 and used these grant funds to purchase a new van which was finally received during the Spring of 2024. This new van is now part of the regular daily transportation program and the 2015 van became the spare van. The 2015 van is next in line for replacement and the plan calls for replacement by FY'29 when it would be over 12 years old.
2	**Athletics & Extra-Curricular Activities** The District currently contracts with an outside vendor to meet its athletic and extra-curricular activity transportation needs. The contractual rates have steadily increased and the program is currently spending $85,000 on an annual basis, on average $500 each athletic run per bus. The District received a Multi-Function School Activity Bus (MFSAB) in December of 2018. The District received a second Multi-Function vehicle in July 2021. Having access to two 14- passenger MFSAB's has enabled the District to transfer between 60-70 athletic runs annually in-house, approximately 20 runs per season. This has saved the District between $20,000-$22,000 annually. A ten passenger 2011 F-350 van for the past year was part of the athletics and extra-curricular activities fleet is no longer safe to drive and did not pass state inspection and it has been taken off-line. A third Multi-Function School Activity Vehicle (MFSAB) is needed to assist the performing arts and extra-curricular needs in the District and help defray the immense cost of using a contracted bus company. A third vehicle will provide much greater flexibility to allow the District to meet the needs of other extra-curricular activities including the performing arts program. The Performing Arts Department has agreed to assist with defraying the cost of this new vehicle. The cost included assumed the Performing Arts Department will contribute $25,000 to $30,000 towards the cost of a new vehicle.
3	**Food Services** The District replaced the 2005 food service van in the summer of 2019, with funds available in the food service revolving account. The food services department uses the new transit van to satellite food between the high school and the elementary schools that don't have a full size kitchen. The van purchased in 2019, is a smaller cargo transit-van and is much better suited to serve the needs of this department and has served the Food Service program well. This vehicle has on schedule to be replaced in FY'31 but will be re-evaluated at that time.
4	**Building & Grounds** The District received funding for a new tool cat/bobcat for snow removal and landscaping purposes in FY'22. The vehicle has been used to maintain the MS/HS campus and all other schools. It is able to snow plow, sweep, front load, sand, spread and is equipped with many more attachments that has increased productivity and provided the versatility needed to properly maintain the schools year round. The 2002 Kubota Tractor should be considered for replacement in the future. The 2014 F-450 Utility truck was replaced this past summer and the District received this vehicle in Spring of 2025. The 2014 vehicle is now used as a spare vehicle and will be used on a minimal basis for snow plowing in the winter and the 2009 vehicle was traded in to help offset the cost if the new F-550 truck. This vehicle will need to be replaced with a smaller Pick-up truck for maintenance and plowing purposes in FY'28. All other Buildings and Grounds vehicles and equipment remain in good condition and are maintained by the DPW on a regular basis.

*Earmark State Grant funded in combination with operating funds in FY'26-FY'28.

Notes:

1	This District has leveraged COVID-19 funding and state earmark grants with Representative Jones to secure enough student devices to last through FY'26. When this funding is no longer available the District will need to resume their annual allotment of needed funds for device replacement in fiscal year 2027. In FY'27 the District will need to replace about a grade and quarter or about 230 devices at $325 per device for a total of $75,000 of funding needed in FY'27. Beginning in FY'2028 the District will need to resume their request for their annual allotment to replace 2 grades per year or 380 devices at $325 per device for a total of about $120,000. Beginning, in FY'29 once all instructional staff devices are updated and replaced the District is hopefully it could use state earmark grant funds to offset this cost.
2	The District every five years will need to replace aging teacher laptops that are past their useful life. Currently, there about 275 staff members will be in need of a new device over the next two years at $900 per device. The funding need for replacement of all these instructional staff devices is $250,000. The District is receiving a $100,000 earmark state grant in FY'26 that can assist with the need for computer device replacements which it will use to began the process of replacing professional staff devices, and the District is hopeful we may receive a similar allotment in FY'27 that could be used to complete the need to replace all professional and instructional staff devices in need of replacement. The District will start with the elementary school and District staff in FY'26/27 and then the MS/HS staff in FY'28. Once completed there would not be a need to request funds for staff devices replacement again until FY' 32/33.
3	The WIFI Network Infrastructure at the Middle / High School including the wireless access points and switches were upgraded in the summer of 2023. The next major network infrastructure upgrade will be at the three elementary schools. The Elementary Schools wireless network infrastructure was installed in 2017 and will be in need of an upgrade in FY' 2029. The cost includes upgrades for wireless access points and switches that will be at the end of their useful life and no longer supported in fiscal year 2028. The District would pursue e-rate category II funding that could assist with receiving a reimbursement which would help offset this cost by up to 40%.
4	The TV Studio equipment and servers in the control room are now outdated and are in need of replacement. The age and condition of the equipment does not allow the students to effectively broadcast productions and are no longer functioning properly. The equipment, services and internet connections are in need of an update so the studio can be used to it's fullest capacity to improve the experience for the students. The District is in the process of getting an update on the overall need and cost for such an upgrade but the potential cost could be up to $50,000.

FIVE YEAR CAPITAL IMPROVEMENT PLAN

Notes:

1	The four Hood Elementary School modular classroom units were installed in 2000 and are showing signs of significant age and deterioration. The expected useful life of these units is generally between 15 and 20 years with proper maintenance and upkeep. The units have been well maintained and past annual inspections but have reached the end of their useful life. The units are over 20 years old and the time has come to develop a plan to address the removal and replacement cost. The Little School expanded modular classroom was installed in 2002 and is also showing signs of significant deterioration and is beyond it's useful life at 23 years of age. The unit has been well maintained and passes annual inspections but the time has come to consider replacement. These classrooms at both schools house early childhood programs, the PreK program and other specialized learning and will be needed into the future with elementary enrollment expected to increase over the next ten years. The continued demand for specialized programs, and anticipation of a continued increase in the District's Full Day Kindergarten and early childhood programs over the next ten years this classroom space is needed into the future. A feasibility plan was conducted by a qualified engineering firm this past summer and fall which reviewed the following options: 1. Keep the existing modular buildings and renovate as recommended 2. Demolish the existing modular building and provide a new modular building in its place 3. Demolish the existing modular building and provide a new permanent building 4. Consolidate the modular buildings to one location (Hood) and build an expanded permanent building to accommodate all space needs at one location. The preferred option is option 4 to remove the Little Elementary School modular unit and consolidate to the Hood Elementary School. Instead the District would move all early childhood programming to the Hood Elementary School build an expanded permanent building. The District has completed and SOI to request funding support with the MSBA. The MSBA conducted a site visit this fall to determine if this is a project that will be accepted into their funding window. The District will find out in December if the project has been accepted by the MSBA for further consideration for a grant that would yield about 46% reimbursement. Ether way action is needed to address the conditions of these buildings and the learning and classrooms space that is needed.
2	The District has completed the first two phases of the Hood School Roof Project to restore the roof and extend it's life another 20 years. The first two phases included a cutting and replacement of all wet areas, as well as a sealing and re-coating of roof areas A,B,C,D, and E. The final phase includes sealing and coating the final sections of the roof areas F, G and H, to complete the job and receive the 20 year warranty. The cost for this final phases based on bis received last Spring is $400,000. The District request this amount in FY'27 to complete this project.
3	The District received $50,000 to begin asbestos abatement work at the Hood and Little Schools in the summer of 2013. The Hood School kitchen and storage room and the Little School nurse's office and ceiling in the storage room and B-wing boys' lavatory were addressed. Additional abatement work from the original $50,000 request continued in the summer of 2015. This additional $100,000 request would remove most of the remaining asbestos floor tile from the Little Elementary School. The proposal involves 12,000 square feet of floor tile to be removed. Contractors use an estimated pricing that ranges from $5.50 to $7.50 per square foot based on the complexities and current market conditions at the time of bid. The only other school with remaining asbestos is the Hood Elementary School and the plan would be to address this in the future; there is no immediate abatement need at this time. A good amount of the remaining asbestos tiles was addresses this past summer with some work that was done in the lobby to address damage that was done by a storm.
4	The District completed phase 1 and phase 2 of the athletic lighting field needs during the Spring and Fall of 2021. These phases provided lighting on the grass multi-purpose practice field, and expanded the use of that field for both the school and the community. Phase 3 of the project involves installing four light poles on the outfield of Carey Park (baseball field) which is used for soccer, field hockey, lacrosse and other activities both at the high school and in-town youth program including pop warner football. This would expand the use of the athletic fields at the Middle/High School campus for the school and the community. Phase 4 of the project would involved installing light poles in the Carey park infield, as well as 4 poles on the softball field to allow for games at both locations to be played under the lights at night to expand these use of these fields. These funds are being requested in FY'30 and FY'31.
5	The District upgraded the Little School Elementary HVAC system and was able to expand the HVAC's building management system. The next phase of this project would be to complete the Hood Elementary School and fully automate the HVAC control systems throughout the school similar to that of the Little School. If completed the district would maximize their ability to save energy and regulate occupancy schedules throughout each school. It is anticipated the district would save up to $12,000 annually with enhanced regulation of the school energy and occupancy schedules. This project would bring the Hood School to the same level as the Batchelder School, Little School and Middle/High School allowing for increased ability to control energy use and reduce cost. This project is being proposed for funding in FY'29 and is anticipated to cost $200,000 similar to that of the Little Elementary School which was completed in FY'22 and FY'23.
6	The District with the opening of the Middle School/High School in 2013 begin the operation of a Wastewater Treatment Plant. This plant is a bioprocess membrane plant and is highly technical and complicated operation. The plant has three membranes and two air scour blowers which were replaced in 2019, and it is anticipated they will reach the end of their five to seven year useful life in FY'26/FY'27 and will be in need of replacement. The anticipated life expectancy for this equipment is seven to ten years. The membranes died in the summer of 2019 requiring immediate replacement by the School Department. The District anticipates additional costs in the area of upkeep and replacement of parts, to that end we are seeking a capital request within our five year plan to secure funding to make such upgrades again in FY'28.

FIVE YEAR CAPITAL IMPROVEMENT PLAN

7	The windows at the Hood and Little Elementary schools are in poor condition in various locations and this needs to be addressed. The windows are over 25 years old in most classroom locations and are difficult to open and close. This would improve energy conservation efforts and reduce energy costs at these school locations. The District has identified various windows approximately 20 windows in need of replacement in FY'25 with the initial $125,000 appropriation. The cost has increased considerably and the cost with installation and removal for a new window is up to $4,000 per window. The District with an additional appropriation of $100,000 would be able to continue this replacement plan for another 25 windows in FY'29. This will continue to be a phased in approach with similar requests in future years to continue to address windows in needs or replacement at these two school locations.
8	The Middle/High School gym floor after twelve years is in need of a larger refinishing project to include a full sanding and multiple (4) coats of refinishing, including the painting of all lines, letters and logos. This is needed every ten to twelve years to pre-serve the life and integrity of the gymnasium floor. This project is being requested for FY'28 and is estimated to cost $50,000 based on current qualified vendor quotes.
9	The Middle/High School track is in need of a resurfacing as well as the Middle / High School upper tennis courts. Significant wear and tear, decay and cracking is evident on both surfaces. To preserve the life expectancy and integrity of these essential surfaces the District is proposing to spray and repair these surfaces starting with the Track in the summer of 2026 in FY'27 before further decay is observed which could result in the need for a larger more costly replacement and resurfacing project. Then the Tennis courts in the summer of 2027, in FY'28, which is in a need of attention given the cracking and conditions of the courts.
