ST. JOSEPH'S ACADEMY
HONORS GEOMETRY

Teacher: Mrs. Lisa Shah

SUMMER READINESS PACKET - REQUIRED:

Hello soon-to-be students! Welcome to Honors Geometry! This review packet contains topics that you should be comfortable with PRIOR to the start of the school year. It contains primarily Algebra 1 topics, but does have some basic geometry concepts with which you should be comfortable. The purpose of this is to make your year in Honors Geometry progress more smoothly. Geometry moves at a quick pace (whether you're in Honors or regular) and requires you to have a strong algebra foundation. What is crucial is that you understand this material and don't just rush through it to complete it.

Here are some basic guidelines you should follow.

1. This packet is due on the first day of school. You must show ALL work!

2. I will not grade every single problem for accuracy. However, if it looks like you do not understand a particular concept, I will be giving it back to you to fix.

3. Do NOT copy anyone's packet. It will not help you at all. Trust me on this.

4. Photomath or any other math solving AI is strictly prohibited.

5. Don't rush through the packet to complete it right after the end of the school year. Try to spread it out throughout the summer so it stays fresh in your mind.

6. Since you all come from different schools, there may be some topics that your school didn't cover as well as others. Here are some helpful sites that can be truly beneficial! When in doubt, google it! There are tons of videos on the internet!
   www.khanacademy.org (sign up for an account – it's free)
   www.ixl.com (if you have an account from last year)

7. If there are topics which you truly have no idea, it would be beneficial to either teach yourself or find someone that can tutor you (but be sure to do extra practice). You will still be fine if there is just one particular section on which you need refreshing, but if you truly feel like you don't know any of this material, this may not be the right fit for a class.

If you have any questions, please contact me: *Lshah@sja1840.org*

I am excited to meet you/see you again next year!

Mrs. Shah

Summer Readiness Packet (before Honors Geo) Name_____

You must show ALL WORK!

Evaluate each expression.

1) $6 + 6 - (3 - 2 + 5 + 1)$

2) $6 \cdot -5 - |-6 + 1|$

Evaluate each using the values given.

3) $|n| + p - (n + p - 1)$; use $n = -2$, and $p = -5$

4) $m^2 - n$; use $m = -3\frac{5}{6}$, and $n = -1\frac{1}{3}$

Simplify each expression.

5) $(10 - 6x) \cdot -9 + 2x$

Solve each equation for the indicated variable.

6) $x + k = w - v$, for x

7) $a + c = d - r$, for a

Solve each equation.

8) $-91 = -8n - (3 + 3n)$

9) $-6 - 3(-6v - 8) = 108$

10) $2(-3x - 2) = 8x - 6(1 + 2x)$

11) $k + \frac{3}{4} = \frac{7}{8}k + 1 + \frac{2}{7}k + \frac{1}{14}$

© 2026 Kuta Software LLC. All rights reserved. Made with Infinite Algebra 1.

Solve each proportion.

12) $\frac{4}{n} = \frac{8}{7}$

13) $\frac{9}{x-7} = \frac{3}{9}$

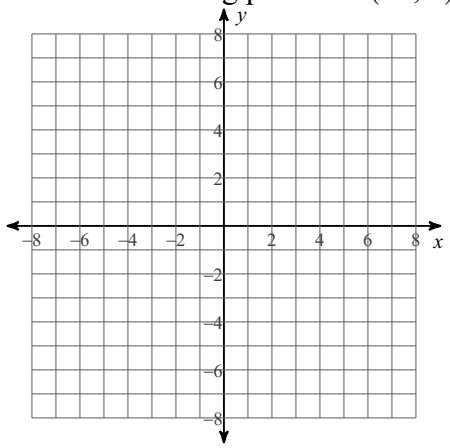

14) If you can type 345 words every 3 minutes, how many words can you type in 20 minutes?

Solve each problem.

15) 36% of 8 is what?

16) If your meal costs $30 and you are going to tip 20%, what is the final cost of your meal?

17) Plot the following points: L(–2, 5), M(0, 7), S(3, –6)

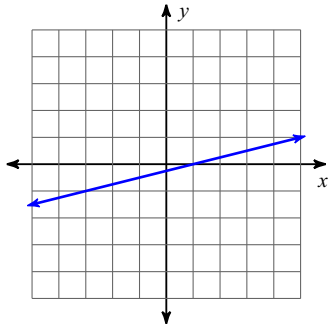

18) Is the point (–2, 12) a solution to y = -5x + 1?

Made with Infinite Algebra 1.

Find the slope of each line.

19)

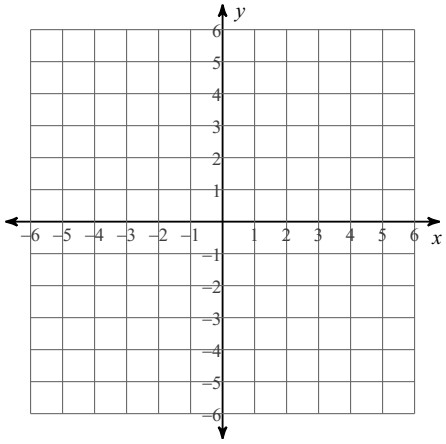

20) $(2, -20), (-19, -18)$

21) $(-8, 16), (9, 8)$

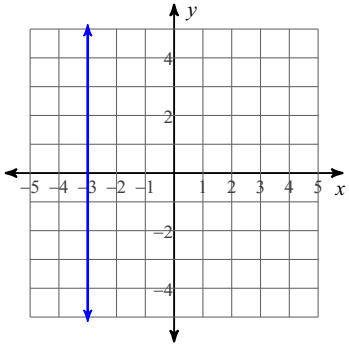

22) $7x + 2y = 4$

#23 - graph the line; #24 - write the equation of the line in slope intercept form

23) $2x + y = 4$

24)

Write the slope-intercept form of the equation of the line through the given point with the given slope. Leave your answers in reduced fractions when necessary.

25) through: $(2, 2)$, slope $= -\frac{3}{4}$

26) through: $(-3, 0)$ and $(0, 2)$

Made with Infinite Algebra 1.

Write the slope-intercept form of the equation of the line described. Leave your answers in reduced fractions when necessary.

27) through: $(-5, 2)$, parallel to $y = \frac{2}{5}x - 2$

28) through: $(3, -1)$, perp. to $y = -x + 1$

Solve each inequality and graph its solution.

29) $-4 + 9n \leq -166$

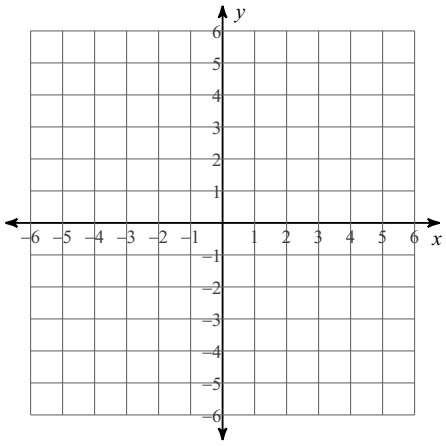

30) $\frac{v + 4}{8} < -1$

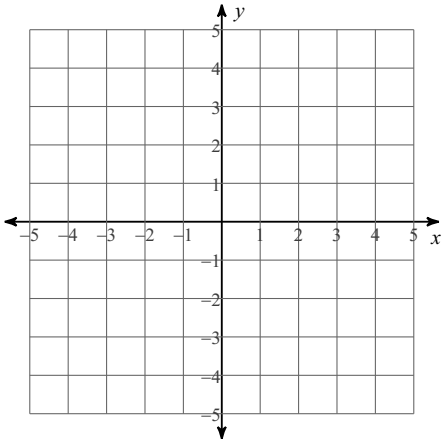

Sketch the graph of each linear inequality or system of linear inequalities.

31) $y > \frac{3}{5}x + 1$

32) $y > x - 3$
$y < -4x + 2$

Simplify. Your answer should contain only positive exponents.

33) $2y^3 \cdot 6y^6$

34) $\left(4x^{-6}y^5\right)^{-3}$

© 2026 Kuta Software LLC. All rights reserved.

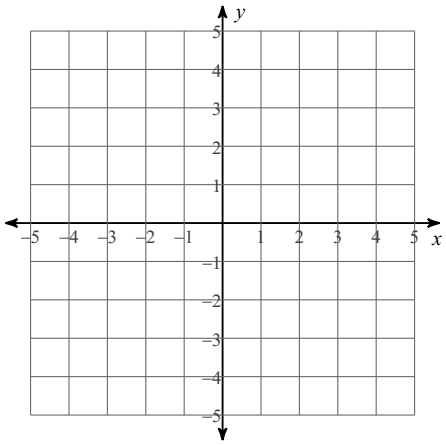

Made with Infinite Algebra 1.

35) $\left(3x^3\right)^{-5}$

36) $\dfrac{p^{-2}}{2p^{-1} \cdot 3p^4}$

Solve each system by graphing.

37) $x + 2y = 6$
$3x + y = -2$

Solve each system by substitution.

38) $y = -5x + 18$
$-x - y = 2$

Solve each system by elimination.

39) $10x - 9y = -6$
$-3x - 5y = -29$

40) $-5x + 4y = 5$
$-4x + 3y = 4$

Made with Infinite Algebra 1.

41) Gabriella's school is selling tickets to a spring musical. On the first day of ticket sales the school sold 6 adult tickets and 9 student tickets for a total of $90. The school took in $164 on the second day by selling 12 adult tickets and 14 student tickets. What is the price each of one adult ticket and one student ticket?

Find each product.

42) $(7n + 4)(n + 6)$

43) $(2k - 8)(3k^2 - 6k + 8)$

Factor each completely.

44) $n^2 - 8n + 7$

45) $x^2 - 4xy - 5y^2$

46) $10r^2 - 37r + 30$

47) $36a^2 + 332a + 72$

Solve each equation by factoring.

48) $x^2 - 6x - 16 = 0$

49) $b^2 + 2b - 17 = 7$

50) $7v^2 = 12 + 8v$

51) $21p^2 + 45 = -114p$

Made with Infinite Algebra 1.

Simplify. Answer should be in simplest radical form. There should be NO DECIMALS.

52) $\sqrt{216}$

53) $-4\sqrt{8} \cdot 4\sqrt{6}$

54) $\sqrt{4} \cdot \sqrt{8}$

55) $\dfrac{3\sqrt{15}}{4\sqrt{12}}$

56) $\dfrac{\sqrt{12}}{\sqrt{20}}$

57) $\dfrac{5}{3\sqrt{3}}$

58) $\dfrac{4\sqrt{5}}{3\sqrt{3}}$

59) $-3\sqrt{2} + 3\sqrt{18}$

For #60-#63, solve each equation with the quadratic formula. Leave answers in simplest radical form.

60) $x^2 = 3$

61) $9n^2 - 2n = 9$

62) $3a^2 - 22 = -6a$

63) $5n^2 - 9n = 9$

64) $f(x) = 3x - 3$; Find $f(-10)$

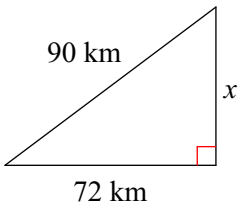

65) What is the domain and range of the following? {(-1,4), (2,6), (7,-3)}

Made with Infinite Algebra 1.

Use pythagorean theorem to find the missing side of each triangle. Round your answers to the nearest tenth if necessary.

66)

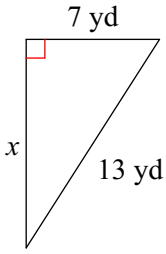

67)

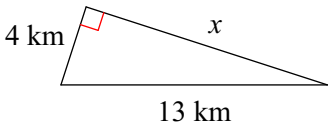

Use pythagorean theorem to find the missing side of each triangle. Leave your answers in simplest radical form.

68)

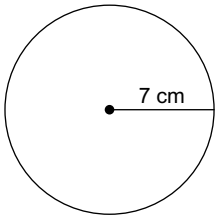

69)

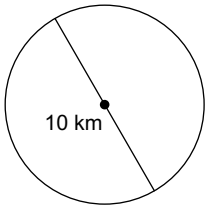

Find the area of each. Leave your answers in exact (pi) form. (No decimals)

70)

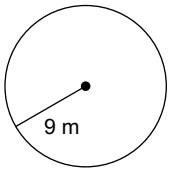

71)

© 2026 Kuta Software LLC. All rights reserved. Made with Infinite Algebra 1.

Find the circumference of each circle. Leave your answers in exact (pi) form. No decimals.

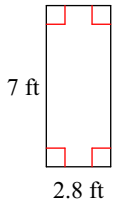

72)

73) area = 121π cm²

Find the area and perimeter.

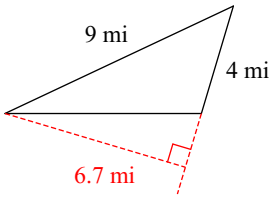

74)

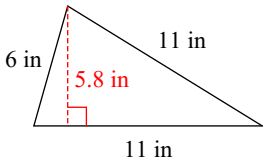

75) Find the area of a square whose perimeter is 28 inches.

Find the area of each.

76)

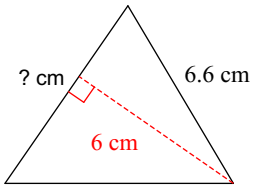

77)

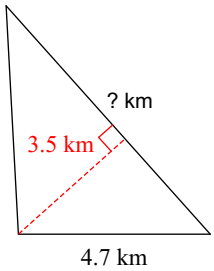

Find the missing measurement. Round your answer to the nearest tenth.

78)

Area = 20.7 cm²

79)

Area = 13.1 km²
