Using Accelerated Reader as a parent: Home Connect

1) You will need to use the following link to log-in to **Accelerated Reader Home Connect**, if you have used Home Connect previously you may find that this is a new link:

   https://global-zone61.renaissance-go.com/studentprogress/homeconnect?t=2048540

   I would recommend doing this on a PC, but phones and tablets should also work fine.

   The log-in screen should look like this:

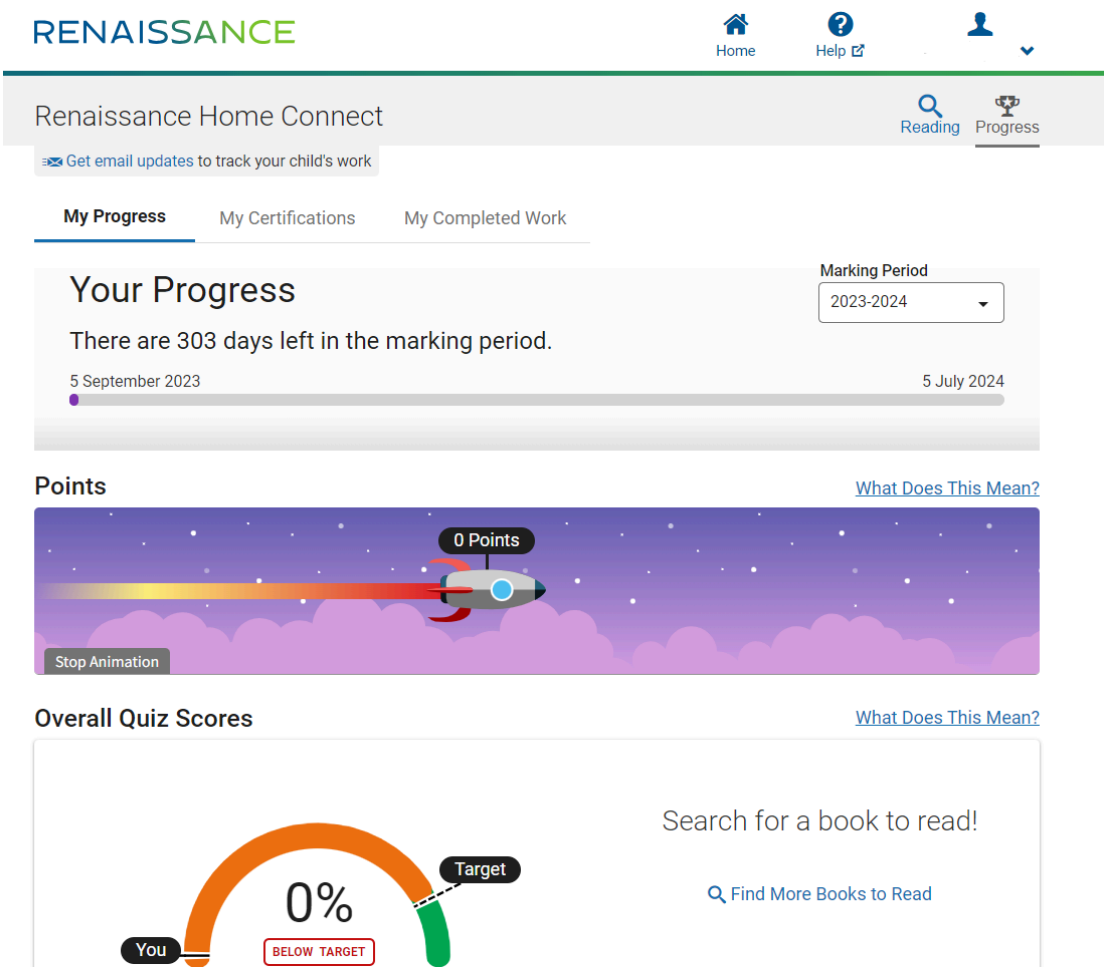

2) Log into Home Connect using the username and password of your child.

   These will look something like:
   Username: jbloggs
   Password: kiwi1234

   The password is case sensitive. You don't need to write the full email address of your child.

   The dashboard should look like this:

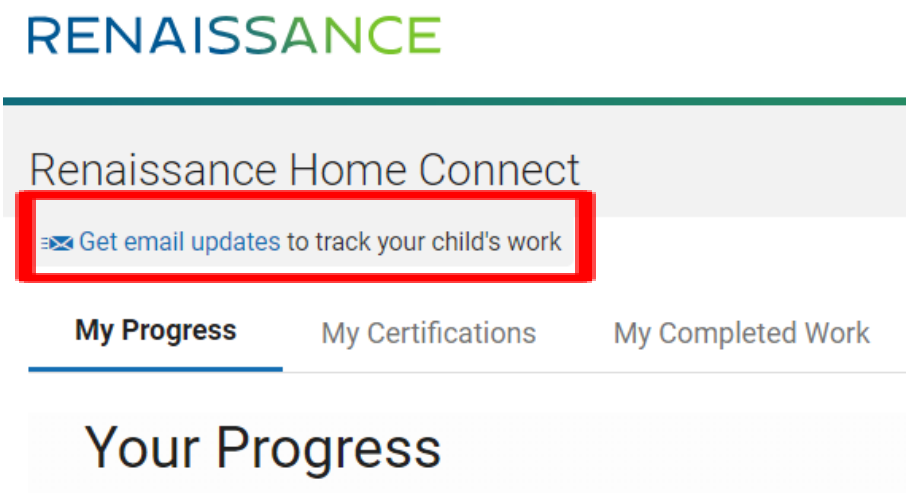

3) Click on the link ‘Get email updates’ if you would like to be made aware of your child’s progress by email. If this does not appear, try clicking ‘Home’ in the top right corner or alternatively use the following link:

   https://global-zone61.renaissance-go.com/studentprogress/home-connect/home-connect-email-subscription

   You can add up to six email addresses to be contacted about your child’s progress.

   Hopefully the system will retain your details across years, but periodically check in with your child if you have not received emails on completed quizzes and use the above link to add your email in again.

4) To start a quiz, you need to click on the ‘Reading’ tab (in the top right), search for a book that they have read and start a quiz. To check on their progress in previously completed quizzes, click on the ‘Progress’ tab and then ‘My Completed Work’.

   Pupils cannot quiz at home, they must do so in school.

   Passwords and usernames that have been forgotten can be brought up easily, but you might want to write them down at home.

   If you need further help, email Alex Dell (Prep Librarian) at **ald@felsted.org**
