## Spark Curiosity & Fun with **Mad Science** **After School CARE**

**"This program can operate alongside other aftercare providers, offering parents more options where they can choose an engaging, STEM-based aftercare experience!"**

- Hands-On STEM Fun
- Engaging Activities
- Teamwork & Collaboration
- Affordable @ \$80 per week
- PreK4 to 8th grade
- Secure App for Sign in /out
- Regular updates to parents

Parents receive weekly updates featuring a collage along with a summary of their child's activities. This allows them to see the STEM projects their child engages in each week, while the summary provides a chance for parents to reconnect with their child about the science concepts they learned.

We just wanted to say thank you to the Mad Science team at William B Travis. The kids absolutely love all the activities and experiments (and do not want us to pick them up early!)
