AP Studio Art: 2D

Choose one of the following:

Self-Portrait.

1. create a pencil drawing on paper that show proportions, values, and likeness to you. Use white paper - must be at least 11 x14 inches.
2. Based on drawing No. 1, try out a different medium for the next three self portraits. Each image is the same subject (you) but you must use different materials to create each one (e.g., pencil, acrylic, marker, collage, digital) but you are not limited to just these. You may mix media.
3. Each of three subsequent self-portraits must be created on different material - not white paper. Think about other materials that you can draw/paint on, many of them are already around you. See if you can find unusual materials or to create some of these on.

OR

100 Sketches

In a sketchbook no smaller than 5 x7", create a series of sketches to total no less than 100 pages.

Try out different types of pens, pencils, colors. You may add collage materials too.

75 of Your sketches should be observational based, not from your imagination.

The other 25 can be from your imagination.

Date each sketch.

Bring in your sketchbook for the first day of class.
