

# SUPER CURRICULUM

## A Level (Sixth Form)

### Reading

- [BPS Digest](#)
- [Phantoms in the Brain](#) by Ramachandran and Blakeslee
- [The Language Instinct](#) by Steven Pinker
- Psychology Review - This is a really good way to access and read journals/academic articles on Psychology. This can give students the edge to achieve their best and broaden their knowledge around and beyond the specification.
- [Thinking, Fast and Slow](#) by [Daniel Kahneman](#)
- [Bad Science](#) by Ben Goldacre
- The curious incident of the dog in the night – Mark Haddon
- The Lucifer Effect – Philip Zimbardo

### Watching

- [TED Talks on Psychology](#) -
- Killer: In the Mind of Aaron Hernandez
- I am killer - Netflix
- How your 'working memory' makes sense of the world – Peter Doolittle (TED Talk)
- How reliable is your memory? Elizabeth Loftus (TED Talk)
- The Brain: A Secret History – Michael Mosley (Documentary)
- Crash Course Psychology (Youtube)
- The tragedy of orphanages – Georgette Mulheir (TED Talk)
- Autism: what we know (and what we don't know yet) – Wendy Chung (TED Talk)
- Stephen Fry: The Secret Life of a Manic depressive (documentary)

### Listening

- ["The Psychology Podcast with Dr. Scott Barry Kaufman"](#) -
- ["The Brain Science Podcast"](#)
- ["All in the Mind"](#)
- ["Hidden Brain"](#)
- "Speaking of Psychology"

### Doing

- British Psychological Society - A good (and very easy) thing to follow for super curricular ideas is the British Psychological Society. This will give you plenty of ideas for careers, research and university choices.
