Executive Summary

StanCorp Investment Advisers has been retained by the Responsible Plan Fiduciary as an ERISA Section 3(38) Discretionary Fiduciary Investment Manager. As a Discretionary Fiduciary Investment Manager, we will select, remove, replace, and monitor all Designated Investment Alternatives unless a specific investment is contractually excluded. The Named Fiduciary will be responsible for monitoring our activity. Investment decisions will be based on the standards and criteria established in the Plan's Investment Policy Statement ("IPS"). What follows are the funds we have placed on Watch and/or have determined to Remove from the menu.

Broad Markets

The first quarter of 2026 was characterized by a familiar tension between a still-resilient economy and an increasingly mixed set of forward-looking indicators. Economic growth appears to remain positive, but data disruptions and revisions stemming from earlier government shutdown-related reporting issues have complicated analysis. Inflation has continued to moderate from prior peaks but remains above the Federal Reserve's long-term target. The labor market continues to show a low hire / low fire pattern that hints towards a softening rather than a sharp downturn.

One major source of uncertainty during the quarter has been the ongoing military conflict involving Iran. While the direct economic impact on the United States has so far been limited, the conflict has increased volatility in global energy markets and contributed to renewed inflation concerns. At this stage, markets appear to be treating the conflict as a manageable risk, but a meaningful escalation could have broader implications for global inflation and growth.

Domestic Equity

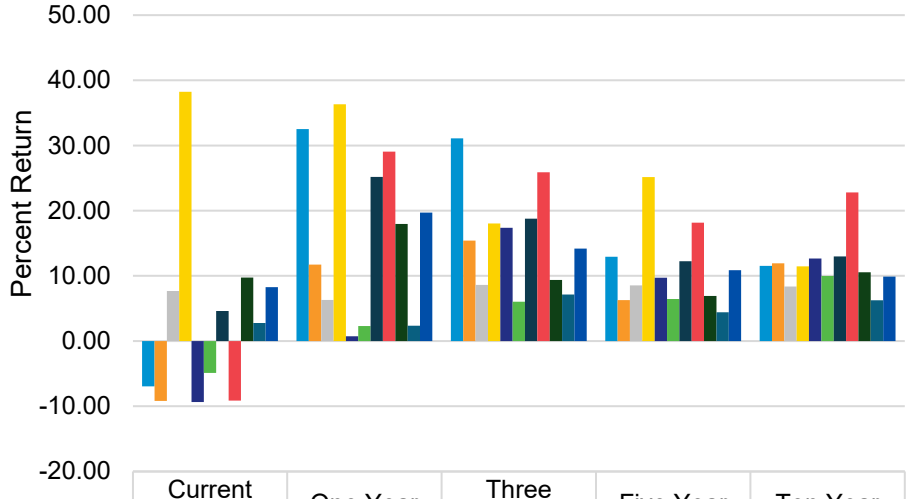

2025 started with strong GDP growth but tapered off towards the end. Final U.S. real GDP growth for the year was 2.1%. By comparison, as of April 1, the Atlanta Fed's GDPNow model estimates that the first quarter will produce 1.9% annualized GDP growth.

The labor market has posted uneven jobs growth this past quarter. Both January and March posted strong numbers, with 160,000 and 178,000 job gains, respectively. February, however, saw 133,000 net jobs lost. Taken together, job growth can best be described as weak but improving after a poor 2025. The unemployment rate is currently 4.3%.

Inflation also continues to trend in the right direction, though progress on that front remains uneven as well. In February, the Consumer Price Index rose 2.4% year-over-year, while core CPI (excluding food and energy) rose 2.5% year-over-year.

International Equity

Economic conditions outside the United States remain sluggish, with global growth continuing to run below pre-pandemic norms amid ongoing geopolitical uncertainty, restrictive financial conditions, and uneven domestic demand in various parts of the world. The International Monetary Fund projects global GDP growth of approximately 3.1% in 2026, with advanced economies growing at roughly 1.5% and emerging market economies near 4.0%, underscoring the growing divergence between regions.

Geopolitical developments have become a more significant factor in the international outlook during the first quarter. The ongoing conflict involving Iran has introduced renewed volatility into global energy markets, particularly through disruptions to shipping and supply routes in the Middle East. The Strait of Hormuz typically accounts for roughly 20% of global oil and liquefied natural gas flows, and recent disruptions have contributed to higher and more volatile energy prices. Supply risks threaten energy-importing regions like Europe and parts of Asia, increasing inflation and reducing growth if disruptions continue or worsen.

Fixed Income

Bond returns were generally negative during the first quarter, as renewed inflation concerns led to higher medium and long-term interest rates. The yield curve has steepened as compared to twelve months prior.

In March, the Federal Reserve maintained the federal funds target range at 3.50% to 3.75%, emphasizing that inflation is still “somewhat elevated” while noting that job gains have “remained low” and that uncertainty around the outlook has increased. Inflation is closer to the Fed’s 2% target than it has been in previous years, but they are expected to remain cautious, particularly given the sensitivity of inflation expectations to energy prices and geopolitical developments. As of this writing, the CME group shows that Fed rate futures are expecting neither a cut nor a raise for the rest of 2026.

How to use this Report with Graphics

Investment Policy Monitoring Criteria

- Perform in the top one-half of its respective category on either a three- or five-year basis.
- Have a minimum of $35 Million or more in total assets.
- Have an expense ratio that is 125% or less of the category average.
- Have the same portfolio manager or a member of the same management team in place for at least the previous three years.
- Maintain investment style.
- Index funds are excluded from the monitoring criteria.

Graphics Key

	Denotes criterion passes minimum standards period.
	Denotes criterion failing minimum standards period.
Watch	Investment fails one or more criteria.
Remove	Investment is recomended for removal.
Exception	Investment has been reviewed, see Recommendations and Monitoring Decisions for details.

Recommendations and Monitoring Decisions

JPMorgan US Equity R6	Ticker/ID: JUEMX	Peer Group: Large Blend
The strategy will flag as failing on a three- and five-year basis, but it is not on the Watch List as the strategy's absolute performance is greater than the category average on a five-year basis.		
MFS Mid Cap Value R6	Ticker/ID: MVCKX	Peer Group: Mid-Cap Value
MFS Mid Cap Value was added to the Watch List at the end of Q3 2025 due to performance. In 2022, returns were hampered by stock selection in financials, health care and basic materials. For 2025, security selection in utilities and industrials were the largest contributors to underperformance. Year-to-date, security selection in financials, healthcare and industrials hampered returns. We will continue to monitor the strategy.		
Thrivent Mid Cap Stock S	Ticker/ID: TMSIX	Peer Group: Mid-Cap Blend
Thrivent Mid Cap Stock was added to the Watch List at the end of Q2 2025 due to performance. In 2022, returns were hampered by stock selection in communication services, technology and consumer cyclical. For 2023, health care, communication services and technology stock selection hurt returns. For 2024, stock selection was negative in seven sectors with health care leading the way. During 2025, security selection in consumer cyclical, technology and healthcare sectors were the largest contributors to underperformance. Year-to-date, security selection detracted from performance, most notably within the technology, healthcare and consumer cyclical sectors. We will continue to monitor the strategy.		
Hartford International Opportunities R6	Ticker/ID: IHOVX	Peer Group: Foreign Large Blend
Hartford International Opportunities was added to the Watch List at the end of Q2 2025 due to performance. From 2021-23, security selection and allocation in Asia emerging markets was the primary contributor to underperformance. This was especially true for strategies in the category that expressly invest outside of developed markets, unlike most of the strategies in the category which limit their portfolios to mainly developed countries. In 2022, Co-portfolio manager Tara Connolly Stilwell assumed leadership of the team and strategy at year-end 2023 in preparation for the retirement of lead portfolio manager, Nicolas Choumenkovitch, which occurred in June 2024. For 2025, while security selection in technology and communication services was positive, financial services and consumer cyclicals selection detracted. Regionally, overall allocation and security selection was positive, but dampened by an overweight to and selection in Asia-emerging. Year-to-date, security selection in financial services, industrials and technology detracted. Regionally, security selection in Japan and Asia-ex Japan was a detractor. We will continue to monitor the strategy.

Putnam Large Cap Value Y (PEIYX)

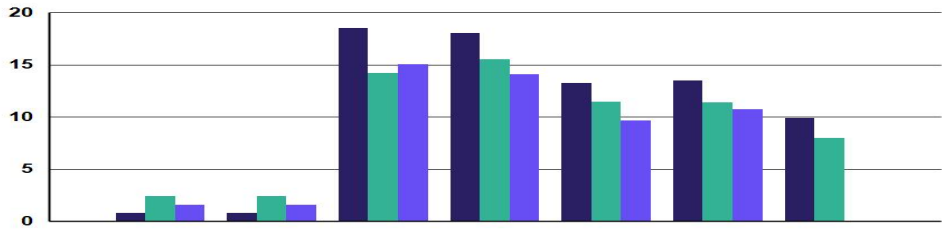

Fund Objective

The investment seeks capital growth and current income. The fund invests mainly in common stocks of U.S. companies, with a focus on value stocks that offer the potential for capital growth, current income, or both. Value stocks are issued by companies that the adviser believes are currently undervalued by the market. The adviser may consider, among other factors, a company's valuation, financial strength, growth potential, competitive position in its industry, projected future earnings, cash flows and dividends when deciding whether to buy or sell investments.

Vanguard Value Index Adm (VVIAX)

Fund Objective

The investment seeks to track the performance of the CRSP US Large Cap Value Index that measures the investment return of large-capitalization value stocks. The manager employs an indexing investment approach designed to track the performance of the index, a broadly diversified index predominantly made up of value stocks of large U.S. companies. The manager attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

JPMorgan US Equity R6 (JUEMX)

Exception

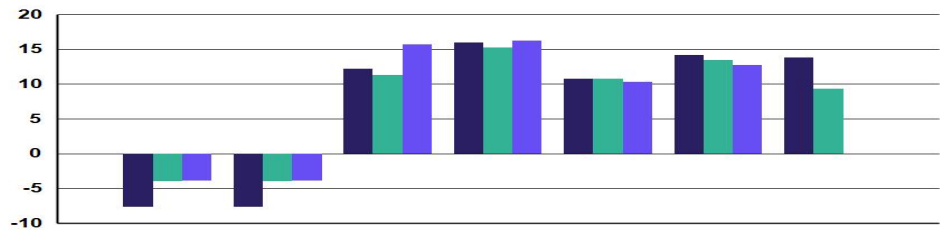

Fund Objective

The investment seeks to provide high total return from a portfolio of selected equity securities. Under normal circumstances, the fund invests at least 80% of its assets in equity securities of U.S. companies. "Assets" means net assets, plus the amount of borrowings for investment purposes. In implementing its strategy, the fund primarily invests in common stocks of large- and medium-capitalization U.S. companies but it may also invest up to 20% of its assets in common stocks of foreign companies, including depositary receipts.

Vanguard 500 Index Admiral (VFIAX)

Fund Objective

The investment seeks to track the performance of the Standard & Poor's 500 Index that measures the investment return of large-capitalization stocks. The fund employs an indexing investment approach designed to track the performance of the Standard & Poor's 500 Index, a widely recognized benchmark of U.S. stock market performance that is dominated by the stocks of large U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index. The fund is non-diversified.

Harbor Capital Appreciation Retirement (HNACX)

Fund Objective

The investment seeks long-term growth of capital. The fund invests primarily in equity securities, principally common and preferred stocks, of U.S. companies with market capitalizations of at least $1 billion at the time of purchase and that the Subadvisor considers to have above average prospects for growth. The stocks of mid and large cap companies in the fund's portfolio are those the Subadvisor expects to maintain or achieve above average earnings growth. The fund may invest up to 20% of its total assets in the securities of foreign issuers, including issuers located or doing business in emerging markets.

MFS Growth R6 (MFEKX)

Fund Objective

The investment seeks capital appreciation. The fund normally invests the fund's assets primarily in equity securities. Equity securities include common stocks and other securities that represent an ownership interest (or right to acquire an ownership interest) in a company or other issuer. The adviser focuses on investing the fund's assets in the stocks of companies the advisor believes to have above average earnings growth potential compared to other companies (growth companies). The fund is non-diversified.

MFS Mid Cap Value R6 (MVCKX)

Watch

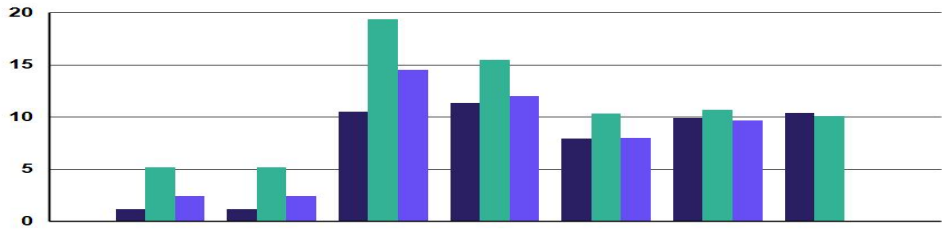

Fund Objective

The investment seeks capital appreciation. The fund normally invests at least 80% of the fund's net assets in issuers with medium market capitalizations. The adviser generally defines medium market capitalization issuers as issuers with market capitalizations similar to those of issuers included in the Russell Midcap® Value Index over the last 13 months at the time of purchase. It normally invests the fund's assets primarily in equity securities.

Vanguard Mid-Cap Value Index Admiral (VMVAX)

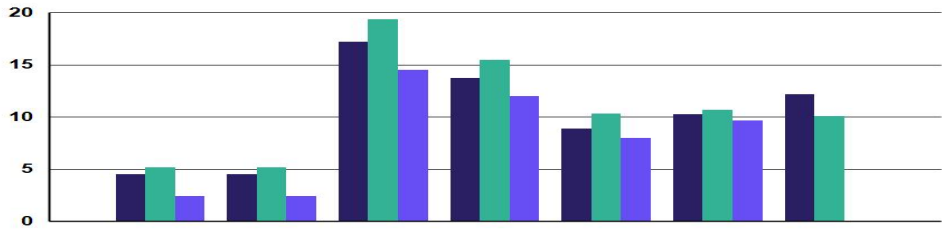

Fund Objective

The investment seeks to track the performance of the CRSP US Mid Cap Value Index that measures the investment return of mid-capitalization value stocks. The fund employs an indexing investment approach designed to track the performance of the CRSP US Mid Cap Value Index, a broadly diversified index of value stocks of mid-size U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

Thrivent Mid Cap Stock S (TMSIX)

Watch

Fund Objective

The investment seeks long-term capital growth. The fund invests at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in equity securities of mid-sized companies. The Adviser focuses mainly on the equity securities of mid-sized U.S. companies which have market capitalizations equivalent to those included in widely known indices such as the Russell Midcap® Index, S&P MidCap 400® Index, or the mid-sized company market capitalization classifications published by Morningstar or Lipper, Inc.

Neuberger Mid Cap Growth R6 (NRMGX)

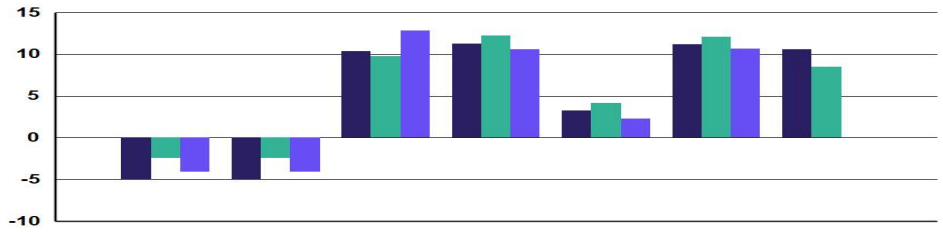

Fund Objective

The investment seeks growth of capital. The fund normally invests at least 80% of its net assets in common stocks of mid-capitalization companies, which it defines as those with a market capitalization within the market capitalization range of the Russell Midcap® Index at the time of purchase. It seeks to reduce risk by diversifying among many companies, sectors and industries.

DFA US Targeted Value I (DFFVX)

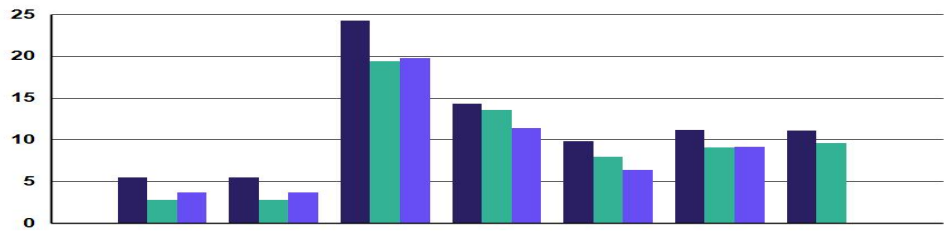

Fund Objective

The investment seeks long-term capital appreciation. The fund purchases a broad and diverse group of the readily marketable securities of U.S. small and mid cap companies that the advisor determines to be value stocks with higher profitability. It may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices, to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the fund.

Vanguard Small Cap Value Index Admiral (VSIAX)

Fund Objective

The investment seeks to track the performance of the CRSP US Small Cap Value Index that measures the investment return of small-capitalization value stocks. The fund advisor employs an indexing investment approach designed to track the performance of the CRSP US Small Cap Value Index, a broadly diversified index of value stocks of small U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

DFA US Small Cap I (DFSTX)

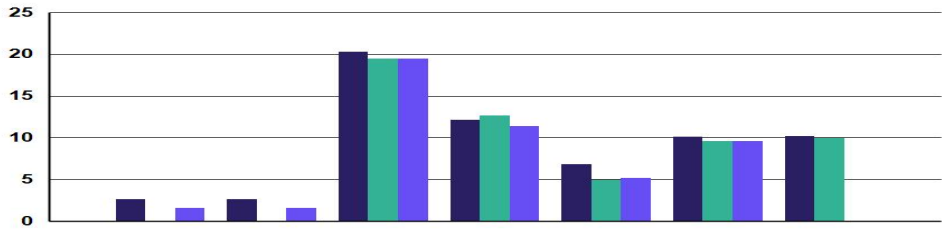

Fund Objective

The investment seeks long-term capital appreciation. The fund, using a market capitalization weighted approach, purchases a broad and diverse group of readily marketable securities of U.S. small cap companies. A company's market capitalization is the number of its shares outstanding times its price per share. Under a market capitalization weighted approach, companies with higher market capitalizations generally represent a larger proportion of the fund than companies with relatively lower market capitalizations.

Hood River Small-Cap Growth Retirement (HRSIX)

Fund Objective

The investment seeks long-term growth of capital. The fund, under normal market conditions, invests at least 80% of its net assets plus any borrowings for investment purposes in common stocks of U.S. corporations that are judged by Hood River to have strong growth characteristics or to be undervalued in the marketplace relative to underlying profitability and have a market capitalization which, at the time of purchase, is consistent with the capitalization ranges of the S&P SmallCap 600® Index and the Russell 2000® Growth Index ("small-cap companies").

Vanguard Developed Markets Index Admiral (VTMGX)

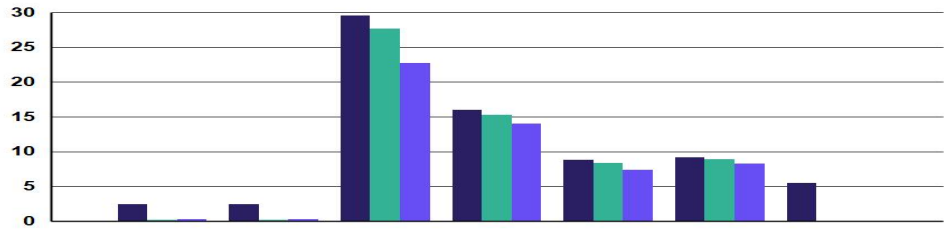

Fund Objective

The investment seeks to track the performance of the FTSE Developed All Cap ex U.S. Index. The fund employs an indexing investment approach designed to track the performance of the FTSE Developed All Cap ex U.S. Index, a market-capitalization-weighted index that is made up of approximately 3,957 common stocks of large-, mid-, and small-cap companies located in Canada and the major markets of Europe and the Pacific region. The Advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

American Funds EUPAC R6 (RERGX)

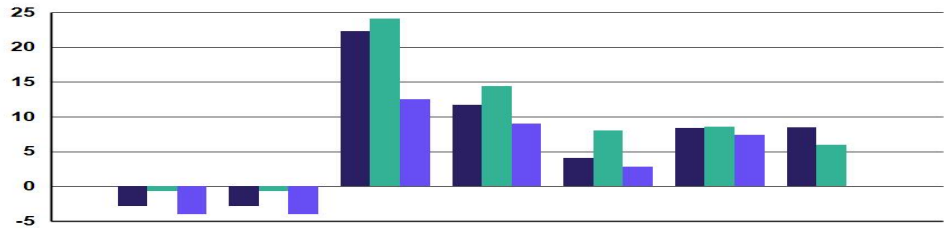

Fund Objective

The investment seeks long-term growth of capital. The fund invests primarily in common stocks in Europe and the Pacific Basin that the investment adviser believes have the potential for growth. Growth stocks are stocks that the investment adviser believes have the potential for above-average capital appreciation. It normally will invest at least 80% of its net assets in securities of issuers in Europe and the Pacific Basin. The fund may invest a portion of its assets in common stocks and other securities of companies in emerging markets.

MFS International Growth R6 (MGRDX)

Fund Objective

The investment seeks capital appreciation. The fund normally invests its assets primarily in foreign equity securities, including emerging market equity securities. Equity securities include common stocks and other securities that represent an ownership interest (or right to acquire an ownership interest) in a company or other issuer. The advisor focuses on investing the fund's assets in the stocks of companies the advisor believes to have above average earnings growth potential compared to other companies (growth companies).

Vanguard Short-Term Federal Adm (VSGDX)

Fund Objective

The investment seeks current income while maintaining limited price volatility. Under normal circumstances, the fund will invest at least 80% of its assets in bonds issued or guaranteed by the U.S. government and its agencies and instrumentalities, many of which are not backed by the full faith and credit of the U.S. government. The majority of these investments will have a dollar-weighted average maturity of 1 to 4 years. The fund may invest in derivatives instruments, such as options, futures contracts, and other swap agreements.

Vanguard Interm-Term Treasury Adm (VFIUX)

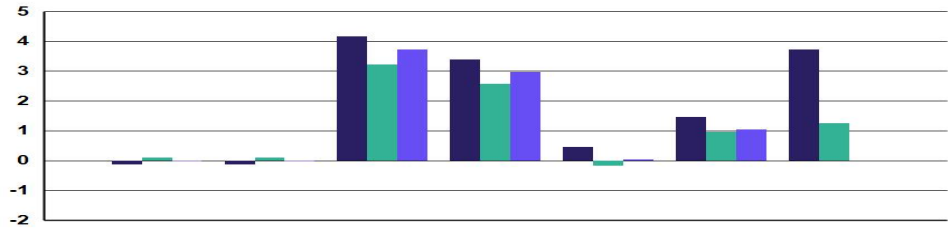

Fund Objective

The investment seeks to provide a moderate and sustainable level of current income. Under normal circumstances, the fund invests at least 80% of its assets in U.S. Treasury securities, which include bills, bonds, and notes issued by the U.S. Treasury. It is expected to maintain a dollar-weighted average maturity of 5 to 10 years. The fund may invest in derivatives instruments, such as options, futures contracts, and other swap agreements.

Vanguard Total Bond Market Index Adm (VBTLX)

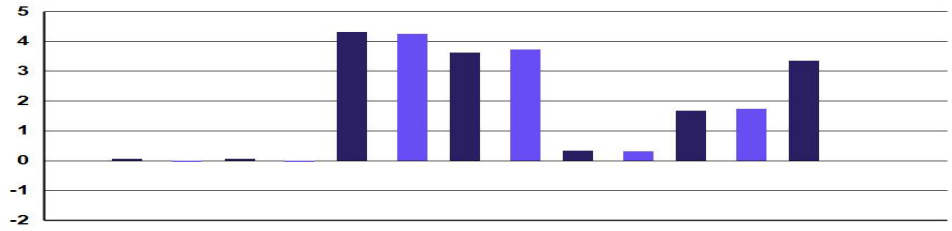

Fund Objective

The investment seeks to track the performance of the Bloomberg U.S. Aggregate Float Adjusted Index. This index measures the performance of a wide spectrum of public, investment-grade, taxable, fixed income securities in the United States-including government, corporate, and international dollar-denominated bonds, as well as mortgage-backed and asset-backed securities-all with maturities of more than 1 year. All of the fund's investments will be selected through the sampling process, and at least 80% of its assets will be invested in bonds held in the index.

Dodge & Cox Income X (DOXIX)

Fund Objective

The investment seeks a high and stable rate of current income, consistent with long-term preservation of capital; a secondary objective is capital appreciation. The fund invests in a diversified portfolio of bonds and other debt securities. The fund will invest at least 80% of its total assets in (1) investment-grade debt securities and (2) cash equivalents. "Investment grade" means securities rated Baa3 or higher by Moody's Investors Service, or BBB- or higher by Standard & Poor's Ratings Group or Fitch Ratings, or equivalently rated by any nationally recognized statistical rating organization, or, if unrated, deemed to be of similar quality by Dodge & Cox.

Vanguard Federal Money Market Investor (VMFXX)

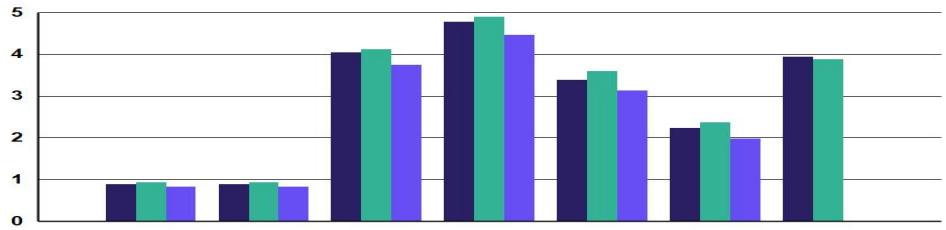

Fund Objective

The investment seeks to provide current income while maintaining liquidity and a stable share price of $1. The fund invests primarily in high-quality, short-term money market instruments. Under normal circumstances, at least 80% of the fund's assets are invested in securities issued by the U.S. government and its agencies and instrumentalities. The adviser maintains a dollar-weighted average maturity of 60 days or less and a dollar-weighted average life of 120 days or less. The fund generally invests 100% of its assets in U.S. government securities and therefore will satisfy the 99.5% requirement for designation as a government money market fund.

Vanguard Balanced Index Adm (VBIAX)

Fund Objective

The investment seeks to track the performance of a benchmark index that measures the investment return of the overall U.S. stock market with 60% of its assets; the fund seeks to track the performance of a broad, market-weighted bond index with 40% of its assets. The fund employs an indexing investment approach designed to track the performance of two benchmark indexes. With approximately 60% of its assets, the fund seeks to track the investment performance of the CRSP US Total Market Index. With approximately 40% of its assets, the fund seeks to track the investment performance of the Bloomberg U.S. Aggregate Float Adjusted Index.

Information for funds for which StanCorp Investment Advisers is not acting as an investment advisory fiduciary is included in this Quarterly Monitoring Report as a courtesy, and its inclusion does not constitute investment advice by StanCorp Investment Advisers or its affiliates. StanCorp Investment Advisers is not responsible for making any recommendations with respect to the inclusion or removal of any investment option that it subadvises or is issued by an affiliate.

Actual results may differ from the performance shown herein. Average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions. Returns for periods less than one year are not annualized. For funds less than one year old, the Since Inception return figure is not annualized and represents an aggregate total return. Returns presented are net of underlying fund expenses and gross of any recordkeeping or administrative fees charged by Standard Retirement Services which generally include any fees, as applicable, for investment advisory services provided by StanCorp Investment Advisers. These fees would reduce returns.

Overall ratings are provided for the specific share class shown. Different share classes may have different ratings. Morningstar rankings represent a fund's total return rank relative to all funds that have the same category. The percentile ranking is based on the fund's total return percentile rank relative to all funds that have the same category for the same time period. The highest (most favorable) percentile rank is 1% and the lowest (least favorable) percentile rank is 100%. Morningstar rankings do not include the effect of sales charges.

Past performance does not guarantee future results. The value of an investment will vary so that an investor's shares, when redeemed, may be worth less than their original value. Fees and expenses will decrease investment returns so investors should take them into consideration prior to investing. Gross expense ratios represent the Total Annual Operating Expenses for the fund and do not reflect any fee waivers or reimbursements that may be in effect at the time the expenses are calculated. The net expense ratio reflects the expenses being charged by the fund at the time the expenses are calculated after taking into account any applicable waivers.

Asset allocation and diversification do not ensure a profit or protect against loss in declining financial markets.

Adjusted indicates an adjustment in the reported performance or expense figures of the underlying fund by the amount of revenue sharing returned to plan assets. Category Ranks and Averages do not apply to adjusted data.

Unadjusted refers to the performance or expense figures reported by Morningstar.

Hyphens appear in data columns to indicate that data is not available.

CUSIP, Net Expense Ratio and Turnover Ratio for Group Annuity investments pertain to the associated underlying mutual funds.

Some investments require a delayed import and will be available approximately 45 days after month end. Therefore, some of the data may be empty or outdated until it is available. Peer groups are comprised of all of the funds that match an investment's category as classified by Morningstar. Morningstar Category identifies funds based on their actual investment styles as measured by their underlying portfolio holdings over a three-year period.

Based on Morningstar data, the system calculates data points on: Product History; peer group rankings for Calendar Year, Standard Deviation, Alpha, Treynor Ratio, Sharpe Ratio, and Expense Ratio; and all peer group rankings for money market funds.

Morningstar reports Manager Tenure at the fund portfolio level, while Product History is listed for the fund share class. As a result, more recent share classes may have much longer manager tenures than the reported Product History.

Net Assets reported in this report may be current as of the end of the month prior to the end of the quarter or the end of the last month of the quarter, depending on when net asset data was made available to Morningstar.

Alpha, Beta and R-squared statistics are calculated using the best-fit index as determined by Morningstar.

Morningstar groups mutual funds and exchange traded funds into different fund universes, although the same category types are used in both universes. Rankings are done within the separate universes, so that mutual funds are ranked with other mutual funds within the same category, and exchange traded funds are ranked with other exchange traded funds within the same category. As a result, a mutual fund and an exchange traded fund that share the same category are ranked relative to different peer groups.

Funds that focus on certain sectors may involve a greater degree of risk then broadly diversified funds. In addition to the risks associated with equity investing, investments in small and mid-cap companies and narrowly focused investments typically exhibit higher volatility and are less readily marketable than investments in larger companies or more diversified strategies. Similarly, international investing involves certain risks, such as currency fluctuations, economic instability, and political developments. These risks may be accentuated in emerging markets. Real estate investment funds are subject to special risks, such as tax law changes, and general economic conditions that may affect the value of the underlying real estate assets. Funds that invest in bonds are subject to certain risks including interest-rate risk, credit risk and inflation risk. Derivatives are subject to a number of risks, such as liquidity, interest rate, market, credit and management risk. A fund investing in a derivative instrument could lose more than the principal amount invested. The principal value and investment returns of mutual funds, money market funds and stocks are neither guaranteed nor insured by the U.S. Government. Indices are unmanaged, do not incur fees and cannot be invested in directly by an individual.

Employers and plan participants should carefully consider the investment objectives, risks, charges and expenses of the investment options offered under the retirement plan before investing. The prospectuses for the individual mutual funds contain this and other important information. Please read the prospectus carefully before investing. Investments are subject to market risk and fluctuate in value.

Standard Stable Asset Fund is a group annuity product issued by Standard Insurance Company. Amounts contributed and the fulfillment of any guarantees specified in the group annuity contract are insurance claims supported by the full faith and credit of Standard Insurance Company. Standard Stable Asset Fund is neither a mutual fund nor a bank product and is not insured by the FDIC or any other federal governmental agency. Standard Insurance Company provides and periodically resets a guaranteed crediting rate for Standard Stable Asset Fund. However, plan sponsors may instruct Standard Insurance Company to reduce the crediting rate in order for Standard Retirement Services to reduce certain administrative fees for plan-related services. Your plan's crediting rate may be lower than the guaranteed crediting rate once the reduction has been applied. Past interest rates are not indicative of future rates. Standard Stable Asset Fund may not be available in all states.

Information on Standard Stable Asset Fund may be obtained by contacting your Standard Insurance Company representative.

If the plan sponsor selects The Standard Stable Asset fund as the cash equivalent investment option for the plan and instructs Standard Insurance Company to reduce the crediting rate as described above, the Annualized Returns for the fund as shown in this report is net of that reduction. Current regulations do not permit StanCorp Investment Advisers to recommend the Standard Stable Asset Fund to plan sponsors and plan participants. Once a plan sponsor, or its designed fiduciary (other than StanCorp Investment Advisers or its affiliates), selects the Standard Stable Asset Fund, allocations to the fund are in accordance with the allocation percentage for the cash equivalent sleeve in the models.

Please refer to StanCorp Investment Advisers' Form ADV disclosure brochure for additional details. StanCorp Investment Advisers creates general asset allocation models for use when providing investment advisory services. The allocation percentages to the asset classes in each model are set and updated, as necessary, based on certain assumptions made about market conditions, the rate of return for each asset class, average internal fees and expenses of an investment option, etc. No specific investment option was considered when setting the allocation percentage of each asset class. Therefore, the allocation percentage for the cash/cash equivalent sleeve of each asset allocation model does not take into account any specific investment option selected or whether the plan sponsor has instructed the issuer to reduce any crediting rate. Consequently, investment results may vary among investors using the same asset allocation model and the same investment options.

The Standard is the marketing name for StanCorp Financial Group, Inc., and its subsidiaries. Standard Insurance Company provides insurance services and issues a group annuity contract for retirement plans. Standard Retirement Services, Inc., provides financial recordkeeping and plan administrative services. Investment advisory services are provided by StanCorp Investment Advisers, Inc., a registered investment adviser.
