

Summer 2026 program:

# Build Apps with AI for Kids

by: **SwiftLearn.ai**

In this class, students will utilize AI tools and solutions to build an app of their choice. Whether they want to create a homework helper, an interactive day planner, or a video game, kids will learn how to interact with AI to bring their ideas to life. The class will conclude with a "show and tell" session for students to share their creations with their parents.
