

Kronos Phone Access

These instructions will show you how to access Kronos through your phone rather than on the computer or time clock.

Disclaimer: You will need to be connected to the District's network and have your Location settings turned on in order to access certain features (such as Clocking In or Out).

District Website

On your phone, go to the District website. Here, you will be able to click the Kronos icon like you would on a computer. This will take you to the login where you can enter your Single Sign On credentials.

UKG Ready App

Please note: Use of the app is purely optional, as the District does not provide support for personal devices.

On your phone, you will need to find and download the UKG Ready app for your phone provider app store. Once you have the app installed, you should be able to sign in.

Additional information may be needed to set up your access the first time. If you are asked for the "Company Short Name", please contact Anya Klinginsmith (AKlinginsmith@ecsdfi.us) or Dasia Williams (dwilliams20@ecsdfi.us).
