

Fence

Where will it go?

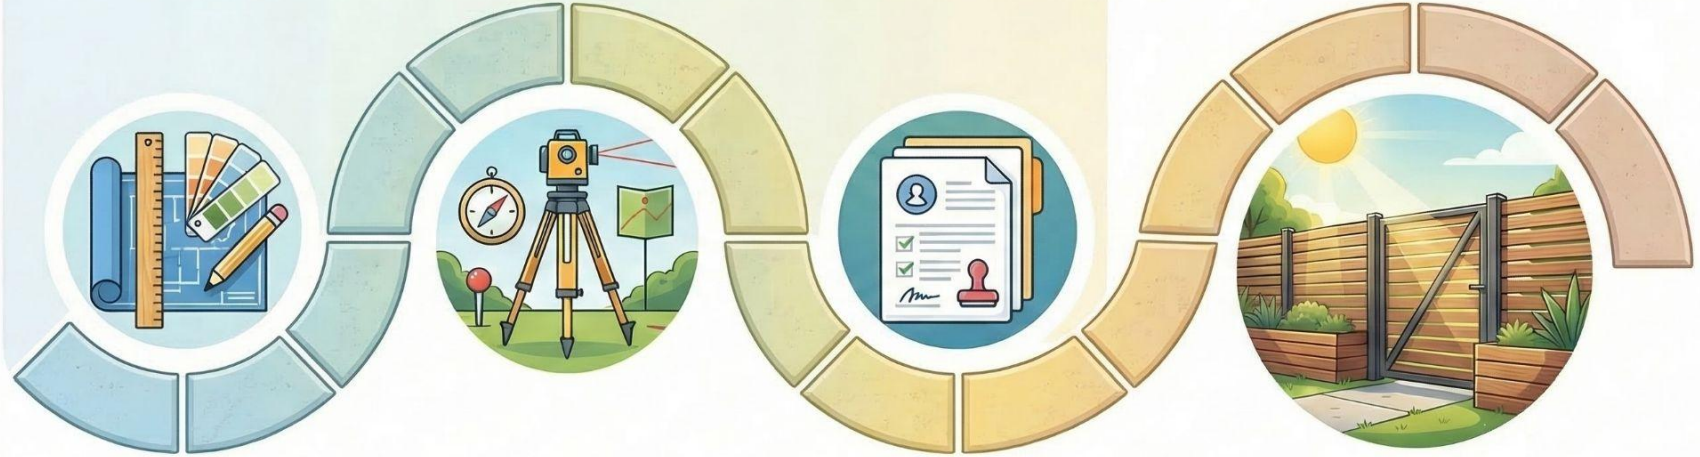

Green = Parts of the campus perimeter where fencing or physical boundaries already exist

Red = Places where fencing will be installed

Timeline for Installation

Phase 1: Planning & Permissions

January: Design Consultation

The project kicks off by hiring a professional designer.

February: Property Assessment

Professional surveyors are brought in to accurately assess the property lines.

March–April: Permit Submission

Necessary documentation and permits are submitted for approval.

Phase 2: Project Completion

Summer 2026: Final Installation

The physical fence installation is completed during the summer season.
