CONGRATULATIONS TO OUR GRADUATES

GRADE 5 PYP EXHIBITION

Pypx Reflection: Sugar Addiction
My pypx topic was about Sugar Addiction. I had a display where I had my stuff to present. In my pypx display I had a poster of math, language and 2 art pieces. I also had table of foods and drinks that have sugar. At the end I would ask the person what they learned. Then I would give them candy that doesn't have too much sugar.

The presentations were good cause I did good. They were good cause people were listening and understanding what I was saying. People were also answering a lot of people were answering my questions which was good. I also liked the way people were telling me what they learned. I like the way they told me that they never knew this and that.

I learned that a bottle of coke has 65 grams. I also learned that a chupa chup lollipop has 40 grams of sugar. I advice the next class to work hard. they also should try not to disturb us. Amanda like my class. does. Hope have a wonderful year.

SUGAR ADDICTION

GRADE 5 PYP EXHIBITION

HORTICULTURE IN SCHOOLS

My PYPx (More plants in school!)

Hello so my exhibition was about more plants into schools. I had many reasons for why I chose this project. I also planted 17 plants which went really well. They grew healthy and I gave each class a plant as a gift. I was very grateful for the help of my expert.

The presentations went well people were listening instead of talking. I wasn't stressed and felt calm. I also noticed that I wasn't stuttering. I also made a poster about my expert she helped me alot and also gave me advice on many plant activities like plant painting and plant measuring. I made a quiz for the end and also had plant facts.

One thing I learned is that plants aren't only simple living things. Plants are also a good inspiration for kids learning and also release peoples stress. My advice for the next grade 5 is that when your presenting don't get distracted by people, present out loud. And finally concentrate on your presentation and your audience.

FOOD SAFETY

My PYPx topic was on food poisoning.

For my topic I made 3D bottle of one poisoning bottle and two medicine bottle. Also I made an art work of a burger and a sick person and 3 posters on food poisoning.

All the presentations were good because some were happy, some were disturbing and annoying. I did really well in memorizing my speech and reading the causes and symptoms of food poisoning.

I learned from my experts that food poisoning is caused by the way you cook the food. My advice for the next grade 5 do not get in trouble. They should have more time for work and they should not play games.

CULTURE AND FASHION

PYPx Reflection: Max Article

My name is Audrey and my project was about Cultural Fashion for South Korea, Haiti and South Africa. And I made 3 collages. I had 1 dress for Haiti, 1 skirt for South Africa and 1 dress for South Korea. I also made a beautiful timeline for it.

It was easy to show my presentation to the school. They gave me very good feedback. Someone said that they loved the collage for South Africa. Gyu-Fun's dad loved the part I did for South Korea so much. My mom was very proud and my dad as well was proud.

I am gonna be the future Grade 5 students (Grade 4 right now).

- Make sure put and write a lot of information.
- When you will write down your info only put the key parts (I mean the important info).
- Good Luck!

GRADE 5 PYP EXHIBITION

SPORTSMANSHIP

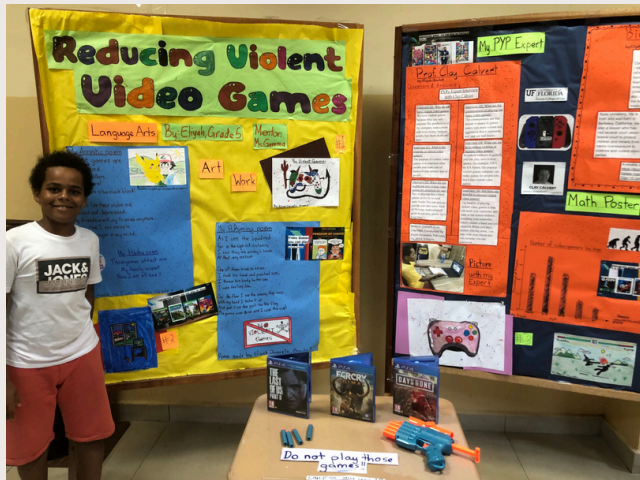

PYPX Reflection

My PYPX topic was about Sportsman ship. I made 3 paragraphs about Sportsman ship. I also made 3 paragraphs of the be team leader, the kindness player, the positive player in soccer, also the respectful player and the player that show go fire play, and also off my expect.

It was good and kind of being because we needed to stand up there for a very long time. That know is being. I was reading without my stake. I did stop at anytime. I just find and read. I did it was very hard but I did it.

I learn you should not cheat doing a game. you should not be mean with your teammates. And also a good team leader. The next class should do more better then we did. They should be focus on their work. They should not play when the teacher get out of class.

VIDEO GAME VIOLENCE

My Pypx Reflection

My pypx topic was about reducing violent video games. I made 3 poems related to my topic. Haiku, Acrostic and Rhyming poems. I made 1 poster with all my research questions and answers. I made 3 paintings which were related to my topic.

My presentation was good because people said the displays were beautiful. And some people said my presentation was the best. I made people learn new things they didn't know. I taught elementary kids that they shouldn't play violent games.

During my presentation I learned things myself. One thing I learned was that violent games cause aggressions. An advice I would give for next years grade 5 would be to look at your audience & speak loud and clear. Listen to your audience's opinion. Don't stress and calm down.

SMOKING DANGERS

My PYPX Reflection ♡ May Article
Objective: 3 paragraphs

① What was my pypx about (what did I make)?

My pypx topic was about how smoking is bad. Something that really pushed me to do that was that a lot of people are dying prematurely and I hope it stops.

② How were the presentations (what did I do really well)?

My presentation was really good. I'm happy because I taught a lot of people that smoking is bad. Something else is that I convince my cousins that smoking is bad with my presentation.

③ What did I learn (advice for the next 5th graders)?

I learned that you could catch a lot of deadly diseases. During the interview I had with Dr. Susanna my expert he told me that there's an other disease called trans-porria. You could catch it when someone smokes next to you. My advice for you guys is to work hard and play less video games.

GRADE 5 PYP EXHIBITION

ENDANGERED SPECIES

PYPX

My pypx topic was about endangered species. My partner was ~~Ben~~ because I came late. In our project we made an acrostic, concept, & free verse poem. We also made paintings of a javan rhino & a vaquita. For the 3D part we made turtles out of the bottom of a bottle & bottle caps. And we created a slideshow about Andy Warhol the most famous endangered species artist in the world.

Our audience was respectful. Most of them had lots of great questions & we were happy to answer them. I felt like I did well presenting & communicating to the audience. And the audience were great listeners.

During the process of all this I learned alot about how these animals need help. And how ther are people & compans that are helping them out. Like the WWF & the NIMF. Some advice for the future 5th graders this may feel a bit tough so pick a topic you like. Good luck!

5/14/24 Gyaem
Pypx reflection

My presentation was about Endangered species. I worked with Becky. We made vaquita and rhino's painting. And other posters like lined graph, bargraph. And poems. We also made 3D item which is a turtle out of plastic. The presentation was great! We shared lots of information as well. Some of the audience were nice but mostly interruptive like talking during the presentation. Or just living/taking selfies. It wasn't nice.

I learned that we shouldn't litter or pollute. And there are so many extincted species o.a endangered. And need to protected them. My advice to next 5th graders is use your time wisely and use your time management skills. Also it is helpful when you make a plan before the PYPX.

NATIONAL PARKS

5/15/24

PyPX Reflection

My PyPx was about the Ntional Parks. For the 2 boards I had many posters and pieces of artwork. Some of the posters include: A pie chart, about the 10 biggest National Parks, an essay about 5 National Parks I want to go to, ect.

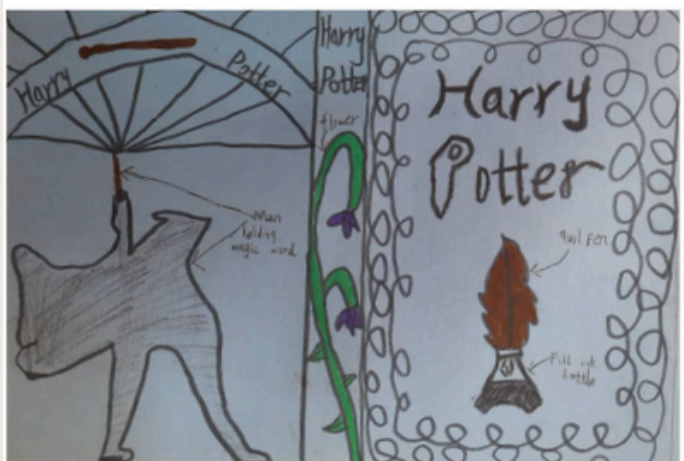

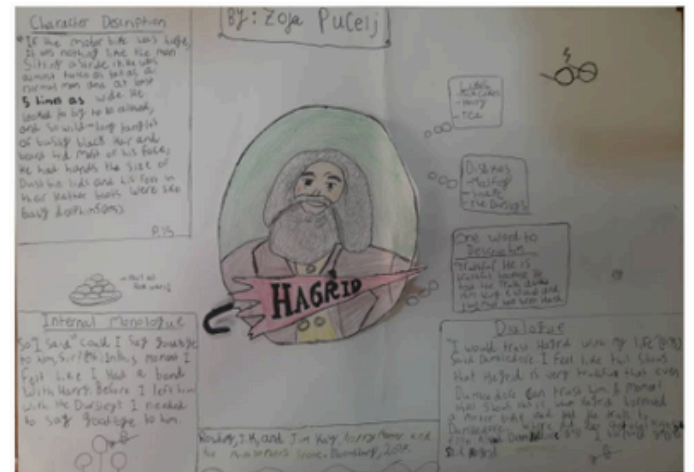

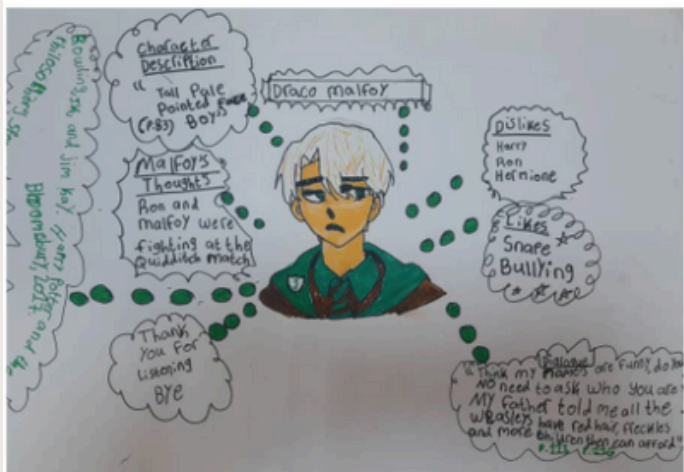

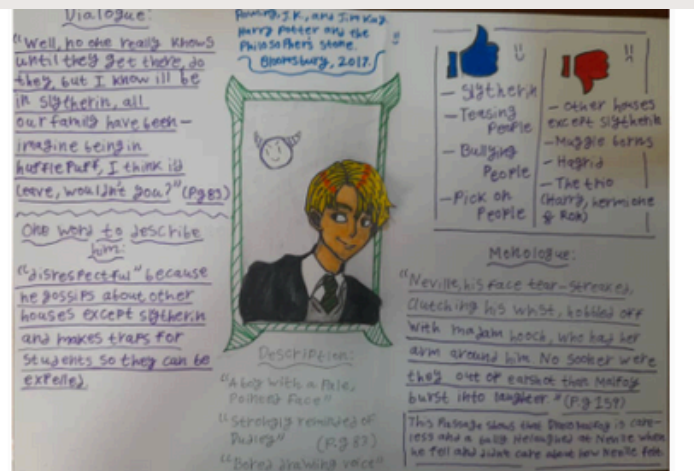

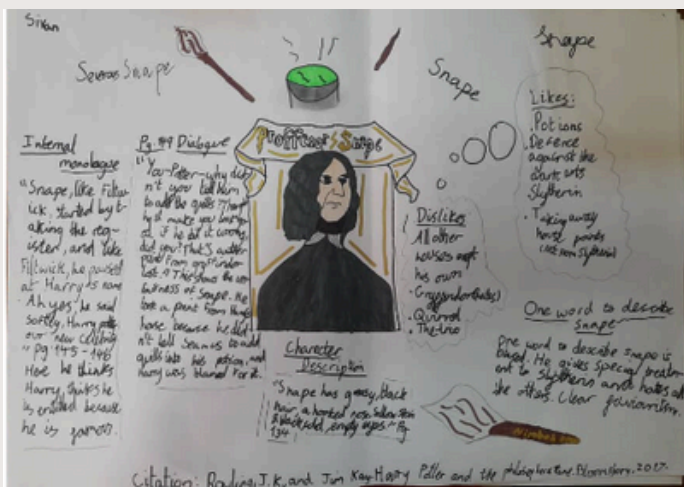

I think My Presentation was good. I got a little nervous with the older kids, but after a while I grew more and more confidence with my presentation. I think I did well with showing my art pieces and posters, and I really enjoyed doing the PyPx.

I learned that doing the PyPx was not just a project but a life lesson to reaserch about things we as a person want and doing that has gave us new passions. Some advice for the next 5th grade class is don't loose intrest. Doing the project might be boring at times but you need to do good to pass. More advice is that choose a good topic that you truly love for it will give you a fun time. Do good, and try your best.

LANG & LIT GRADE 6

In Grade 6 Language & Literature, students finished the unit titled "Characters who we love and hate." In this unit, students explored Harry Potter and the Philosopher's Stone by JK Rowling. Students specifically focused on characters, how the author writes them, and our emotional reaction to them (and why!) They had two different summative assessments: the first was a characterization analysis of a chosen character, and the second was a newly imagined book cover based on a theme from the novel. Enjoy a selection of student's analytical and creative skills.
