Grade 5 Exhibition

Insight into the Primary Years Program Exhibition (PYP)

The PYP exhibition is a crucial aspect of the IB PYP initiative, which requires significant creativity, dedication, and research. This exhibition involves group collaboration, presentations, and action, as well as extensive inquiry. Our students were thrilled to showcase their projects to their peers, parents, and the school's leadership team. During the exhibition, the students exhibited their robust research skills, applied approaches to learning skills (ATLs), conducted interviews with experts, reflected on their progress, created art, worked collaboratively, and solved problems. They also rehearsed their presentations, culminating in a final display board that showcased their hard work.

Grade 5 Exhibition

May 1st Labour Day

Yesterday, the ASOY faculty and staff commemorated Labour Day. The event included the presentation of medals to staff who have dedicated 5 to 25 years of service to the school. Awarding a medal to each faculty member who reaches this milestone is a tradition. Notably, two members were honoured for their 25 years of service.

Presenting their Artist Research and Creating Digital Versions of Artworks of their Chosen Artist

Music Unit 1 - Digital Songwriting

Through the activities of researching, ensemble performing, active listening, and appraising, students will get to know the possibilities and power of their own voices, types of voices, as well as different vocal and vocal-instrumental music examples representing the variety of vocal music genres. Students used technology to compose an original song without using any acoustic instruments and performed it individually and in groups to communicate a theme and a message through their lyrics.

Grade 7 Design

Innovative Cross-Grade Project: Grade 7 Students Design Podcast Audiobook for Younger Students

The 7th class is gearing up for their upcoming design unit and has developed a unique project idea. The project aims to engage elementary students through small group activities. Specifically, groups of grade 7 students will ask grade 1 and 2 students to share their favourite storybooks. Then, these stories will be recorded as a podcast audiobook and shared back with the students for their evaluation.

This innovative project is an ideal opportunity for students of different grades to come together and collaborate. It also offers younger students a chance to gain technical experience while allowing the 7th and 8th graders to use their skills to contribute to their school community.

Athletics Award Ceremony 2023

The ASOY Athletic Award Ceremony 2023 was held last night, where we celebrated the achievements of all the sports teams who competed against local and international schools. The event recognized individual players for their outstanding contributions to their respective teams and presented them with certificates of merit. We extend our heartfelt congratulations and gratitude to the students, coaches, staff, and parents who made this year's ASOY Parrots sports teams such a resounding success!
