CANVA STORIES

February, the month of love! As Valentine's Day crept around the corner, the Middle school and High school student council organized our yearly Candy grams. Handing out forms to all students and teachers at ASOY gave everyone a chance to buy something special for a person they share a bond with.

A big thank you to the following students for organising this event for the whole school:

Akansa Enow (11th) (President)
Ariel Mekeme (12th) (Vice-president)
Feraya Njong-Aliga (10th) (Treasurer)
Gia Alimenti (12th) (Class rep)
Ricky Tchonang (11th) (Class rep)
Aboubakar Nana Bouba (10th) (Class rep)
Kenneth Enow (9th) (Class rep)

In Grade 4, we worked on this project to show everyone what we were doing in our Unit of Inquiry about Space.

During the unit about Space, we learnt that there are eight planets and many things out there, such as asteroids, comets, meteoroids, dwarf planets and many more. We also learnt a lot about the worlds, like whom they were discovered by and some characteristics such as mass, distance from the sun, moons, surface temperature, rings, orbits and rotation.

We decided to do the model because we wanted to make the planets look realistic in the background. We have stars, asteroids, comets and meteoroids. You can also see the asteroid belt and black holes. We used our creativity and imagination, but we had to work hard to complete it, but it was fun.

We are thankful to all of you that are pleased with our work, and we hope you enjoyed looking at our work.

By Grade 4 students.
