WORK-BASED LEARNING CONTINUUM

For Secondary State Approved CTE Programs

Quality CTE Work-Based Learning (WBL) is demonstrated by a full continuum of experiences progressing in quality and intensity that is accessible to every student throughout their program of study. To prepare a dynamic workforce for the future of Michigan, students need to be exposed to as many career options as early as possible. CTE students refine their career goals through coursework consistent with their career interest area, contextual learning, and career preparation while meeting academic and technical standards. The goal of Work-Based Learning experiences for CTE student learners is to provide more advanced real-world experiences that help students link their educational decisions to career options. Examples of these experiences are illustrated below:

WORK BASED LEARNING CONTINUUM

The term **WORK-BASED LEARNING** means **sustained interactions** with **employers** or community professionals in real workplace settings, to the extent practicable, or simulated environments at an educational institution that foster in-depth, first-hand engagement with the **tasks** required of a given career field, that are aligned to curriculum, instruction, and CTE Program standards.
