Summary

Dance Education

Active Learning's dance programs are based on the California Performing Arts Standards integrated with the Common Core State Standards to ensure the appropriate developmental level for each grade is met and implemented through our structured classes. We provide instructional classes in classical, street and multicultural dances that include Folklorico, West African, and the latest in pop culture! Our research based, classroom practiced lessons, and structured schedules set our program apart from any other dance class. Our lessons actively engage the students in the learning process, which is our priority. Beginning with foundational concepts in dance technique and skills, students explore various activities and outcomes based on four main areas: Skill building/creating Responding/connecting Performing/presenting Recognition Within the core of the structure, students gain a comprehensive cardio-fitness workout integrated with social-emotional concepts, art, music and movement into captivating lessons. Each hands-on learning class encompasses the development of English-Language skills and opportunities for students to explore, create and innovate their ideas through movement while applying various skills. Lastly, students develop, practice, and present their final performances to highlight lessons learned and celebrate achievement.
