

Bottom Line: Tuition Must Reflect True Cost - Not **MORE** Not **LESS**

The State formula (Seneca Falls Formula) is the most fair and consistent method for both our partner districts and Greenwood Lake taxpayers. It helps ensure we are not paying more than the actual cost of educating our students.

The higher tuition rate previously seen with Tuxedo was largely due to its very small student population, which can significantly skew per-student costs. In contrast, Chester and Warwick have larger enrollments, resulting in more stable and representative tuition rates.
