Quality Lessons, Quality Learning

"Lesson observation is not about judgement, but about growth."

This term, The Leadership Team lesson observation focus was Mathematics as part of our ongoing commitment to quality teaching and learning across the school. These observations play an important role in ensuring that effective teaching practices are taking place in every classroom and that the IEA pedagogy remains consistent and purposeful.

During the observations, we focused on the delivery of Mathematics lessons, including the use of explicit teaching strategies, student engagement, lesson structure, questioning techniques and opportunities for students to explain their thinking and confidently solve problems.

The lesson observations also provided valuable opportunities for professional discussions and reflection between teachers and school leaders. Through feedback and conversations, teachers were able to celebrate strengths in their teaching while also identifying areas for further growth and improvement.

At our school, lesson observations are not about fault-finding, but about supporting teachers in strengthening their practice and ensuring all students receive high-quality learning experiences. We are proud of the positive teaching and learning taking place in our classrooms and appreciate the dedication of our staff in continually striving for excellence in education.

Ms. Carmelita Memo,
Deputy Principal

IEA TIPS ENGAGEMENT WITH PREP CLUSTER IN PREP BA CLASS

Throughout this term, the TIPS inductees were included in the learning journey of Prep BA through the three rounds of Literacy Block. They supported students in Phonemic Awareness, Phonics, and Shared Reading, helping to build confidence and strengthen early literacy skills.

Prep BA students welcomed the inductees with excitement and kindness.
Their curious minds were eager to ask questions, explore sounds, recognise letters and participate in learning activities with enthusiasm. They showed great teamwork, confidence and joy throughout each session, creating a positive and supportive classroom environment for everyone involved.

Welcome to Class 2HI

WELCOME TO THE INFORMER

We are **super excited** to have you visit our class this week. My friends are learning about 2D shapes. Its **extremely exciting** to learn about **properties of shapes**, **patterns in shapes** and **how to make these shapes.** The trickier shapes are those with more sides.

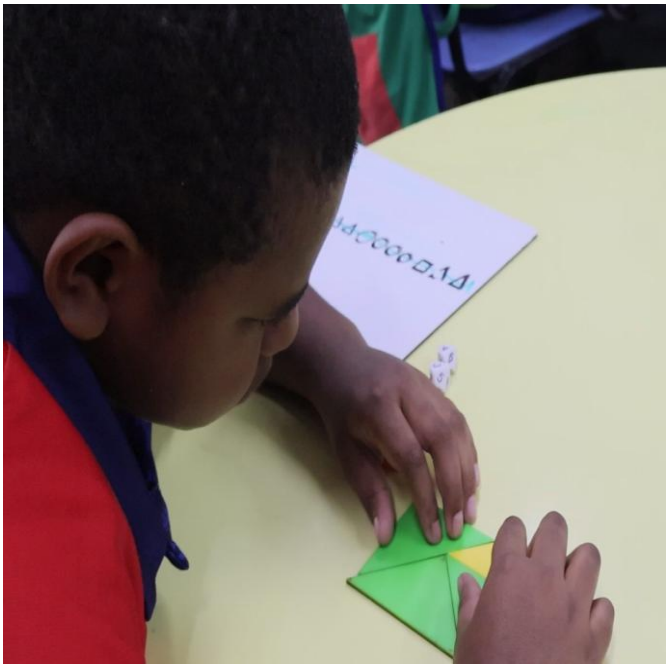

Learning about shapes is important because a lot of professions deal with shapes. Example: **Architects, engineers, artists, builders, fashion designers** and many more.

So for the grade 2 here are some pictures of what they have been doing.

A Sneak peak of what we are learning in Inquiry this term

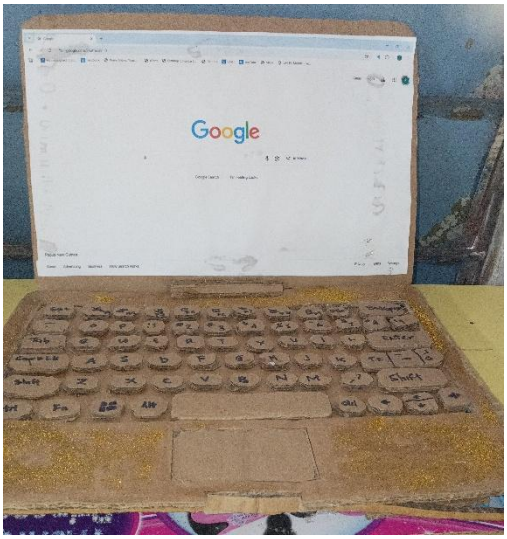

This term in our inquiry lessons, we have been studying materials and their properties. A material is any substance or matter used to make objects. Materials can be natural like wood (trees), cotton (plants), wool (animals), and rock. Also, materials can be man made like plastic, glass and paper.

Properties are the special characteristics of a material that decide what it can be used for.

Some examples include: hard, soft, rigid, transparent, elasticity, etc…

Welcome to Grade 6ST

WELCOME TO THE INFORMER

Exploring Science Behind Everyday Life: Gr 6 Inquiry STEM Excursion to Port Moresby International School

As part of promoting Inquiry and STEM learning, students attended an educational excursion to Port Moresby International School to observe a live Science demonstration lesson by the Science Department. The experience enriched classroom learning through real-world scientific investigation, encouraging curiosity, critical thinking, collaboration and deeper understanding of practical Science concepts and applications.

The excursion featured an interactive Science lesson by Mr. Kavanamur on acids, bases and neutral substances in household items. Students investigated and tested common substances such as vinegar, soap, lemon juice, detergent, baking soda and water using indicators to identify their pH levels and classify them as acidic, basic or neutral.

This Inquiry STEM excursion provided students with a meaningful and memorable learning experience that enhanced engagement, curiosity and deeper understanding of science in action. It aligned with what the students were learning at Koro campus in their Inquiry STEM lessons. We sincerely thank Port Moresby International School and Mr. Kavanamur for warmly welcoming our students and delivering an inspiring, informative and highly engaging demonstration lesson that enriched their scientific learning and fostered positive Inquiry skills.

Welcome to Koro Discovery Centre

WELCOME TO THE INFORMER

Book Week excitement is growing across Koro Campus, with many students enthusiastically accepting the Principal's Reading Challenge and enjoying the opportunity to read more independently. Students have now completed their poster advertisement drafts, and the final submission date has been extended to Wednesday, 27th May. Entries may be digital or hand drawn. A Big Shout out to the Preston family for their generous book donation to the Discovery Centre. Certificates of Appreciation have been placed inside each donated book. Special thanks also to Hollie Osbourne, whose donation inspired other students to contribute. You too can become a Book Donor and be recognised during Book Week celebrations. The final day of term will feature a Book Swap and Dress Up Day for Koro Campus as we celebrate our "Symphony of Stories."
