Huron School District Strategic Plan

"Completely Committed to Kids!"

Beliefs	Initiatives
We are committed to fostering unity and active involvement, while providing resources and support for the safety and well-being of every member of our district.	Encourage community connections to support the safety and overall well-being of our school district and community.
Prioritizing safety and social and emotional supports for all members of our school community is essential.	Cultivate a safe, caring, respectful, and purposeful learning environment by prioritizing school safety measures and providing necessary trauma informed emotional supports and resources for students, families, and staff within our district.
Effective communication serves as the cornerstone of building strong relationships, promoting understanding, and ensuring transparency.	Provide a streamlined means of communication that is consistent and evolves with our schools and community.
All students deserve access to high quality educational opportunities that prepare them for success in an ever-changing world.	Support a K-12 aligned instructional framework based on content standards, promoting academic rigor, professional development, differentiation to meet students' diverse needs, integration of career and technical education, enrichment opportunities, and engagement in learning.
It is important to foster an empowering culture, providing students and staff with opportunities to develop as agents of leadership and positive change.	Create a dynamic learning environment where staff and students are provided with leadership opportunities, mentoring, and adaptive systems of support that actively promote staff and student voice, while encouraging a culture of empowered leadership that embraces a growth mindset.

Our vision is to inspire personal growth in every student and to ignite the passion for learning and leadership.
