HURON SCHOOL DISTRICT

ZERO-TAX-RATE INCREASE BOND PROPOSAL

On May 5, Huron School District residents will vote on a $65 million, zero-tax-rate increase bond proposal.

Why the bond matters:

- Maintains strong, reliable school facilities that serve the whole community
- Helps protect local property values
- Many building systems are decades old and nearing the end of their life
- Heating, cooling, and ventilation require modernization
- Safety and communication systems need updates to meet current standards
- Proactive replacements help avoid more expensive emergency fixes later

What zero-tax rate increase means:

- The proposal continues the school district's current tax rate
- No new tax and no increase to the rate residents already pay
- Made possible because existing debt is being paid down
- Allows the district to fund improvements while keeping the rate stable

Why these upgrades are being proposed:

- Aging heating, cooling, ventilation, and electrical systems require updates to stay reliable
- Classrooms, technology, and furniture need modernization to support today's learning
- Playgrounds, athletic areas, and performance spaces need improvements to remain safe and functional
- Safety upgrades, including controlled entry points, modern cameras, access controls, and dependable communication systems, are needed to meet current standards.

If approved, the proposal would fund upgrades and improvements without increasing the current tax rate.
