

To better prepare you for the upcoming school year in 8th grade, students are required to complete summer work. Although not all assignments must be completed in one sitting, I do not recommend that you wait until the end of summer to complete it. This is comprised of 6th and 7th grade previously learned concepts and some introductory courses of 8th grade as well as algebra. Each course will need a completion grade of 80% or above to be given full credit.

This is a **REQUIRED** assignment, and if you do not complete it on time or choose not to complete it, it **WILL** negatively impact your grade as well as your performance for the upcoming school year.

Work must be completed prior to August 6th, 2026, BEFORE 8:00 AM.

Directions on how to sign up and complete the required coursework:

Step 1. Direct your browser to <https://www.deltamath.com/students>

DO NOT GO TO DELTA MATH THROUGH LAUNCHPAD...enter directly through your browser

Step 2. Click the yellow “register” button and enter this code to join: **Y32E-E24B**

YOU MUST REGISTER WITH YOUR PERSONAL EMAIL AND NOT THE SCHOOL EMAIL

Please use your real first and last name so I can give you credit for your own work!

Step 3. Complete the required coursework at your own pace (yes, you must do all of it)

Do not use AI or any unauthorized aid to complete these assignments

Step 4. If you have completed all assignments with the grade that you are happy with, then you are done with the coursework for the summer. **Your grade will be entered on the first day of class.**

Step 5. I strongly encourage all students to create a Khan Academy account and complete the “getting ready for 8th grade math” module. It is not mandatory but will help prepare you for the coming school year.
