Algebra 2 Summer Packet: DUE FIRST DAY OF SCHOOL (Daily Grade)

This packet is required for all upcoming Algebra 2 students and is a review of topics covered in your previous math courses. It is essential that you have mastered these skills PRIOR to taking Algebra 2.

During the first week of school, you will be given a **quiz** over the topics covered in this packet.

I have created a class in DeltaMath and have linked additional practice for your convenience. If you are struggling with a topic, find it in the DeltaMath assignment and look at the worked examples. You may also practice similar problems until you have mastered the skill. The DeltaMath assignment is not mandatory, it is simply there for you to use if needed.

Below are some formulas that you may find useful:

Linear Functions

Slope Formula: $m = \frac{y_2 - y_1}{x_2 - x_1}$

Point Slope Form: $y - y_1 = m(x - x_1)$

Slope Intercept Form: $y = mx + b$

Standard form: $ax + by = c$

Quadratic Functions

Difference of two squares: $a^2 - b^2 = (a + b)(a - b)$

Standard form of a quadratic: $y = ax^2 + bx + c$

Quadratic Formula: $x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$
