Gloria Menoutis
School Business Executive

September 2021

To Whom It May Concern:

In 1986, the United States Congress passed the Asbestos Hazard Emergency Response Act or AHERA. This law required that all schools, kindergarten through 12th grade, conduct inspections of their buildings to identify asbestos containing building materials. The law further required that the school district or local educational agency (LEA) develop a management plan based on the findings of those inspections. These management plans provide information regarding the management and control of asbestos containing materials in the building.

One of the requirements specified under section 40CFR763.84 sub section C is to ensure that workers and building occupants or their legal guardians are informed at least once each school year about inspections, response actions, post response action activities and periodic inspections and surveillances that are conducted. This memo will serve to meet that annual notification requirement. Our facilities have been inspected initially during 1988 and in subsequent 6 month intervals performing the required 6 month surveillances and the triennial inspections. All of this material may be viewed Monday-Friday during normal working hours (8:00 AM to 4:00 PM) at the Nyack Administration Office, Buildings and Grounds Office at 13A Dickinson Avenue, Nyack, NY.

I hope that this information is sufficient for your needs, and should you have any questions or concerns, please do not hesitate to contact my office at (845)353-7033.

Sincerely,

Gloria Menoutis
